ARIES DEALER PORTAL

Access free marketing resources and order from our easy, new online ordering system!

At ARIES, we want to give you the tools you need to successfully market the ARIES brand and further your business. As such, we are proud to introduce our Dealer Portal. This online dealer-exclusive site is a one-stop shop for ordering ARIES parts and downloading all our latest marketing resources.

The ARIES Dealer Portal allows you to:

- Look up parts by vehicle and order them using a single username and password
- Access product content, photography, videos and more
- Download up-to-date vehicle application data

envision™ ARIES CONFIGURATOR

Let your customers 'try on' ARIES with the most advanced online vehicle customizer!

Envision™ ARIES is an interactive, digital vehicle customization tool that lets your customers view any ARIES accessory, fully installed, on any vehicle, from the comfort and convenience of their own computer or device. They simply select the year, make and model, specify the style and color, and then select one or more ARIES accessories to preview.

This powerful, new tool features:

- Over 5,000 vehicles with years ranging from 1915 to 2016
- A spectrum of vehicle colors, styles and lifts
- A connection to our dealers through Where to Buy

NEW IMAGERY, CONTENT & DATA

Implement our growing content resources in your store and on your website!

ARIES has undergone some major changes recently, refocusing our marketing strategies and customer support efforts. In addition to video, we have refined and expanded our photo library, written content and vehicle application data.

We have built an extensive photo library, consisting of professional product images, in-use images and lifestyle shots. We have expanded our written content offering,

including rich product descriptions, bullet points and more. We have also refined our application data to make it easy for our customers to find the products they are looking for.

All of these resources are available for you to use on your website and in printed materials. They can be accessed through the ARIES Dealer Portal at ariesautomotive.com, using our FTP server and Reporting tool.

UNMATCHED VIDEO LIBRARY

Show your customers the ARIES difference with our expanding video resources!

With a new, professional video team at our headquarters, ARIES is in the process of building a library of videos to support our dealers, installers and consumers. We offer installation videos, product feature videos and more, to show our customers the benefits of ARIES products. We now have over 50 videos, with new ones added every week.

NEW PRODUCTS

NEW PRODUCTS

At ARIES, we pride ourselves on offering something different – something that no one else in our industry has and that will keep our customers coming back for more. We are always working toward new innovations by listening to our customers and focusing on their passion.

For 2016, we are pleased to present several new products that will further set ARIES apart. Our new AdvantEDGE™ series features a unique, eight-sided tube profile and all-aluminum construction to specifically accent the style of modern trucks and SUVs. The series includes a bull bar, side bars and headache rack, all with the same angular, extruded aluminum design.

AeroTread™ Running Boards

Also for 2016, ARIES has added an entirely new product category: running boards. We are offering two running board options: fast, lightweight AeroTread™ to complement today's crossover or SUV, and tough, ready-to-work RidgeStep™ for hardworking commercial trucks.

We have also added new Jeep® products, including our Jeep® rocker steps, as well as many new applications within our existing product lines. We continue to offer grille guards, side bars, bull bars and more to provide a custom fit for a wide variety of vehicles.

AeroTread™ running boards are sleek and lightweight to accent the latest crossover or SUV. They feature an extruded aluminum base and full-length, non-skid treads. They mount using vehicle-specific brackets and come in two front trim finish options: polished stainless or black carbide. **Page 100**

Carbide black powder coat finish option

RidgeStep™ Commercial Running Boards

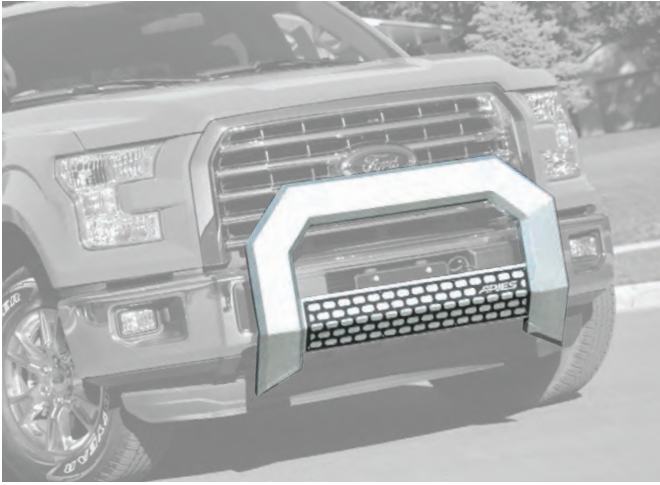

Powerful, defined and uncompromising as a mountain ridge, ARIES RidgeStep™ commercial running boards are made from solid steel with zero plastic parts. They come in four base lengths for reduced inventory and feature a tough, textured black powder coat finish. **Page 104**

Carbide black powder coat finish

AdvantEDGE™ Bull Bar

The AdvantEDGE™ bull bar boasts all-aluminum construction and a unique look to accent the style of today's trucks and SUVs. It mounts with a track system and custom brackets and has a reversible crossbar for auxiliary lights. It is available in a black carbide or chrome powder coat finish. **Page 28**

Carbide black powder coat finish option

AdvantEDGE™ Side Bars

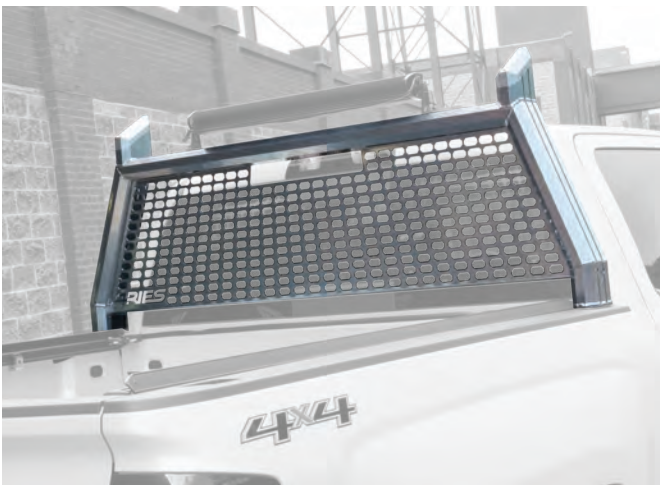

AdvantEDGE™ side bars offer a fresh look for the modern truck. They are made with all-aluminum construction, including the end caps, and a stamped aluminum tread to be lightweight and rust-free. They come in four lengths and two finishes: black carbide and chrome powder coat. **Page 64**

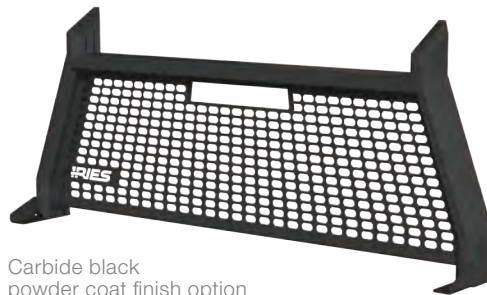

Carbide black powder coat finish option

AdvantEDGE™ Headache Rack

The AdvantEDGE™ headache rack is designed to protect and add style to the modern pickup truck. It features all-aluminum construction and uses a stake pocket anchor system. It also has a top track for auxiliary lights and is available in black carbide or chrome powder coat. **Page 110**

Carbide black powder coat finish option

Jeep® Rocker Steps

Jeep® rocker steps offer more than extra side protection. With their wide, flat profile and heavy-duty design, they offer a solid step, plenty of ground clearance and added protection on the trail. They are constructed with high-strength steel and shielded in a textured black powder coat finish. **Page 126**

Jeep® Fender Flare Side Markers

Jeep® side markers easily mount onto the side of our Jeep® fender flares and provide bright, DOT-approved, LED lights. The LED components are long-lasting and are able to be spliced directly into the existing factory harness for a seamless installation. **Page 131**

Winch Fairlead Mount

The winch fairlead mount easily and securely mounts onto our modular Jeep® bumper winch housing and offers two sets of mounting holes to accept most types of fairleads. It is made with 1/4" thick steel and protected with a durable carbide powder coat finish. **Page 137**

PRODUCT INDEX

When it comes to automotive accessories, ARIES has the variety and quality your customers are looking for. We offer custom-fit, vehicle-specific bull bars, grille guards side bars and running boards, as well as a full line of custom Jeep® products.

Our specialty liners are packed with ARIES-exclusive features and patented designs to give you the aftermarket edge. So whether they will be ruling the road or charging off it, get your customers ready for the drive with ARIES Automotive.

AUTO ACCESSORIES GUIDE

The automotive accessories industry is ever changing and expanding with new designs, tech and terminology. As the ARIES product line continues to expand, we want our customers to stay fully informed and knowledgeable about our products.

The ARIES Auto Accessories Guide is a basic guide to our products and offers helpful information associated with the industry. It lays out the differences between our various products, what advantages they offer you and your customers, and it provides details about various terms used in our application guide.

In addition to the following sections, we have arranged a list of terms and definitions that are used in this catalog, on our website and throughout our other marketing materials. While these terms are used consistently within ARIES and widely across the industry, they may not reflect those used by other brands and manufacturers.

MATERIALS AND FINISHES

ARIES Automotive offers products that come in a wide variety of materials and finishes. There is no single finish to satisfy every need, taste and preference, and without knowing the differences, it can be difficult to help your customers make a purchasing decision.

The following guide describes some of the key characteristics and advantages of each material and finish we use in our products. It also lists some of the products associated with each to help you determine which products will best suit your customers.

MATERIALS

/ 201 stainless steel

This type of stainless steel is relatively harder than other types of stainless and offers good overall rust resistance, especially when properly coated. As an alternative to the polished stainless steel look, 201 stainless is used in ARIES 3" Stealth™ bull bars and covered in a high-gloss black powder coat finish. It provides a solid black finish option that can withstand moisture and road salt, making it a preferred choice for cold-weather climates.

/ Carbon steel

Perhaps the most common type of steel, carbon steel is preferred for its high strength, and ARIES carbon steel is cold rolled to add even more strength and hardness. Though it is not highly rust-resistant, carbon steel can easily be preserved with the right powder coat finish. Carbon steel is used for a variety of ARIES products, including our new RidgeStep™ commercial running boards, Pro Series™ accessories and removable mud flaps. It is the all-around steel of choice for adding extra strength and durability.

/ 304 stainless steel

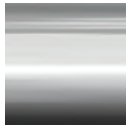

This variation of stainless steel is higher in nickel content, allowing it to be very resilient to rust and corrosion. It is used in a number of ARIES products, from grille guards to side bars, and typically comes with a mirror-like polished finish. We also use 304 stainless in our bull bar skid plates to keep them free from rust despite frequent exposure to moisture, dirt and debris. 304 stainless steel is the ideal choice for anyone who prefers the look of polished stainless over black.

/ T6 aluminum alloy

Aluminum is commonly known to be lightweight and rust-free, making it an ideal material for truck accessories. T6 aluminum, however, provides an additional advantage by going through a heat treatment process to increase its overall hardness. We use T6 aluminum in many of our Jeep®-specific accessories, as well as in our Big Step™ side bars. It is the ideal material for off-roading, being completely free of rust and keeping excessive weight off the vehicle.

FINISHES

/ Polished stainless

With a mirror-like finish, polished stainless steel adds a bright accent to any truck accessory.

Though not all polished stainless finishes are necessarily highly rust-resistant, the polished stainless steel offered by ARIES is a 304 stainless, meaning it has a large percentage of nickel content to be truly rust-resistant. This allows the polished finish to maintain its flawless, mirror-like appearance despite the elements and changing seasons. Polished stainless steel is available on a number of ARIES products, including many of our grille guards, bull bars and side bars.

/ Brushed stainless

A brushed finish is created by treating a metal surface with an abrasive. It has a somewhat grainy appearance compared to a polished finish and offers a unique texture, helping to

hide minor scratches and imperfections. All ARIES bull bar skid plates are made with brushed 304 stainless steel to maintain a consistent finish in spite of nicks, scratches and scuffs from road debris. Brushed stainless is an excellent choice on and off the road, helping to protect and preserve the vehicle's front end.

/ High-gloss black powder coat

Smooth and reflective like dark glass, this polyester-based finish offers excellent rust resistance and a sleek alternative to the flatter finishes. We put our high-gloss black through

a salt spray test to ensure long-lasting protection. It is applied to ARIES 3" Stealth™ bull bars to further protect the stainless steel construction from corrosion and provide a black finish option made specifically for cold climates to resist extreme temperatures, moisture and road salt.

/ Semi-gloss black powder coat

Similar to our high-gloss black finish, semi-gloss black powder coat is polyester-based to be durable and rust-resistant. It is typically applied to carbon steel products and is

designed to withstand moisture, scratches, chipping and peeling over time. Our semi-gloss black is also UV-resistant to help prevent fading. Like polished stainless, we offer this finish on several of our products, from grille guards and side bars to Jeep®-specific accessories.

/ Chrome powder coat

This polyester-based finish is designed to have the shine of chrome with the durability of a powder coat. Though it is not an actual chrome finish, it offers a reflective, polished appearance

and is very resistant to scratches, chipping and peeling. Chrome powder coat is applied to our new AdvantEDGE™ products, including the bull bar, side bars and headache rack.

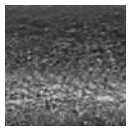

/ Silver powder coat

Similar to our chrome powder coat, this finish offers a bright metallic look without being overly lustrous. It is also designed to be very durable, resisting scratches, peeling and rust.

The silver powder coat finish is specifically offered as an option for our aluminum modular bumpers and it is intended to work well alongside our textured black powder coat finish.

/ Textured black powder coat

Textured black has a wrinkled-like appearance that is specially designed to hide scratches, grime and dirt. Because of this characteristic, textured black is an ideal choice for off-road

and work vehicles. We also put our textured black powder coat through an extensive salt spray test to ensure the best possible corrosion resistance in any season. Textured black is used on our Pro Series™ products, Big Horn™ bull bars, Big Step™ side bars and several of our Jeep® accessories.

/ Carbide black powder coat

Carbide powder coat is a gritty, flat finish compared to a high-gloss or semi-gloss black. However, it is also typically more durable.

Our carbide black is polyester-based and very resistant to rust, wear, chipping and scratches. It is offered as an option for our new AdvantEDGE™ series products, including the AdvantEDGE™ bull bar, side bars and headache rack.

TRUCK CAB GUIDE

Automotive manufacturers use different names for their various truck cab sizes. While Ford may call its largest cab the SuperCrew, Toyota calls it the CrewMax. However, all truck cabs generally fit into one of three categories: regular cab, extended cab or crew cab.

/ Regular cab

This type of truck cab has two full-size, front-hinging doors and provides seating for two or three people. Unlike the other cab types, it has no extra space or seating behind the first row.

/ Extended cab

This type of truck cab has at least two full-size, front-hinging doors and extra seating behind the first row. The back seats are accessed either by tilting and sliding the main seats forward or by opening a set of smaller, rearward doors. The rear doors are usually suicide doors but can also be standard front-hinging doors.

/ Crew cab

This type of truck cab is the largest and has four full-size, front-hinging doors. It offers the most room with two full rows and seating for up to five or six people.

TRUCK CAB NAMES BY MANUFACTURER

The table below lists each truck cab name by manufacturer and size. This categorization is only intended to promote a better understanding of the three basic types of truck cabs and does not imply certain design similarities across the various makes and models.

In the ARIES Application Guide, the names will reflect those actually used by each manufacturer.

Truck Cab Names By Manufacturer			
	Regular Cab	Extended Cab	Crew Cab
Chevrolet / GMC	Regular Cab	Double Cab	Crew Cab
Honda Ridgeline	--	--	Crew Cab
Ford	Regular Cab	Super Cab	SuperCrew
Dodge & Ram	Regular Cab	Quad Cab	Crew Cab & Mega Cab
Nissan Titan	--	King Cab	Crew Cab
Toyota Tacoma	Regular Cab	Access Cab	Double Cab
Toyota Tundra	Regular Cab	Double Cab	CrewMax

BULL BARS VS GRILLE GUARDS

The ARIES line includes both bull bars and grille guards, including our new AdvantEDGE™ bull bar and Pro Series™ grille guard. When helping your customers decide which accessory to select for their vehicle, it is important to know some of the differences.

/ Bull bars

A bull bar is generally designed with an A-shaped frame, consisting of a main outer tube and a center, horizontal tube or crossbar. The main tube extends up from the underside of the vehicle to cover a portion of the bumper and even the grille on certain models. Typically, a bull bar bolts onto the vehicle's frame and covers just the center portion of the vehicle's bumper and grille.

Bull bars are mainly found on pickup trucks, Jeep® and SUVs. Many come with a crossbar that can accept aftermarket lights, as well as a skid plate that attaches to the lower portion of the frame to deflect stones and other small road debris.

Bull bars are different from grille guards in that they:

- Generally cover less area than grille guards
- Do not have side brush guards to cover the headlights
- Usually come with a skid plate

/ Grille guards

If bull bars have an A-shaped frame, grille guards could be said to have an H-shaped frame. A grille guard (sometimes referred to as a brush guard) is essentially made up of two vertical members, called risers, and a center, horizontal member, called a crossbar or center flange. The risers are usually equipped with mounting holes to attach the grille guard to the frame.

Most grille guards also have a pair of side brush guards attached to the risers that extend outward to wrap around the vehicle's headlights, as well as a top tube and bottom tube spanning between the risers.

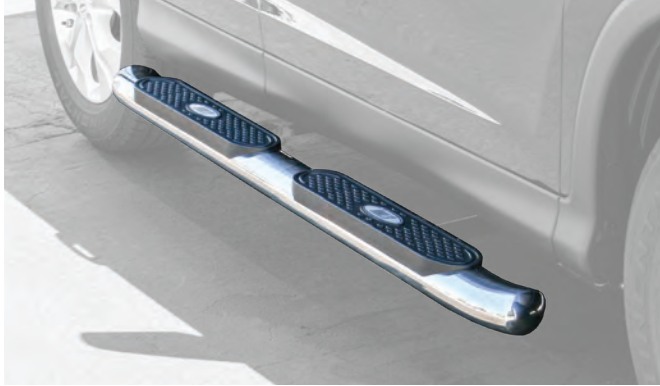

Like on a bull bar, the grille guard crossbar is typically designed to accept aftermarket lights, whether using pre-drilled holes or an LED light bar housing such as on the ARIES Pro Series™ grille guard.

Grille guards are different from bull bars in that they:

- Generally cover a large portion of the front end
- Have brush guards to protect the headlights
- Do not have a skid plate

SIDE BARS VS RUNNING BOARDS

For 2016, ARIES has introduced several new side accessories including an entirely new category of 'Running Boards', made up of our AeroTread™ and RidgeStep™ running boards. With this new product category, it is important to understand the differences between side bars and running boards to better serve your customers.

/ Side bars

Side bars are referred to by many names, including nerf bars, step bars and side steps, to name a few. A side bar's primary function is to provide a stepping surface into the vehicle. For this reason, they are generally used on vehicles that ride high off the ground, such as pickup trucks and SUVs. However, for aesthetic value, they are also found on smaller vehicles, such as compact SUVs and crossovers.

Side bars are typically designed to mount with a certain amount of space between the step and the body of the vehicle. This amount of space can vary, depending on the model, but in general, it is a few inches. They are also designed to mount low on the vehicle, allowing for less ground clearance, compared to running boards, but providing a more functional step for lifted vehicles. Side bars also usually have individual, custom step pads to correspond to each door on the vehicle, and they are generally narrower than running boards.

Side bars are different from running boards in that they:

- Leave extra space between the bar and the vehicle
- Offer reduced ground clearance for an easier step on lifted vehicles
- Feature individual, custom-placed step pads
- Typically have a narrower width than running boards

/ Running boards

Like a side bar, a running board provides a stepping surface into the vehicle. However, it generally mounts flush against the vehicle's rocker panel, instead of leaving a gap. Running boards are also typically wider than side bars and have an overall flat top surface. Instead of individually placed step pads, the flat stepping surface usually has a tread that spans the length of the board.

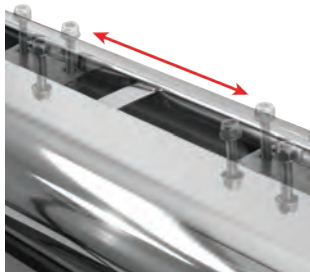

Running boards are found on everything from larger pickup trucks and SUVs to smaller crossovers, providing a convenient step and additional aesthetic value. Unlike side bars that mount down and away from the vehicle, running boards typically offer more ground clearance, making them an excellent choice for lower vehicles.

Running boards are different from side bars in that they:

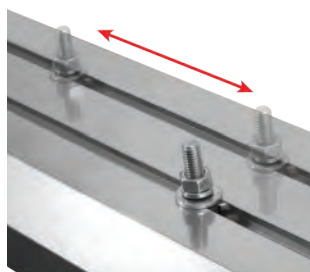

- Mount relatively flush against the rocker panel
- Offer more ground clearance for lower vehicles
- Feature a single, full-length tread
- Typically have a wider, flatter profile

ADVANTAGES OF THE TRACK MOUNTING SYSTEM

/ 6" ovals

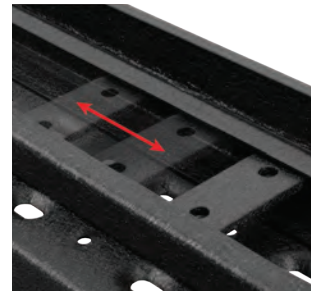

/ AdvantEDGE™

/ AeroTread™

/ RidgeStep™

The number of ARIES side accessories that use a track mounting system continues to grow. It is used on our 6" oval side bars, new AdvantEDGE™ side bars, new AeroTread™ running boards and new RidgeStep™ running boards.

A track mounting system uses two key components: a channel or pair of channels and sliding bolts or C-shaped brackets. The channel allows the bolts to slide along the accessory and typically spans much of its length to allow for flexible positioning. The side bars or running boards can then be bolted onto vehicle-specific mounting brackets already attached to the vehicle.

This mounting system provides a few key advantages. Unlike side bars with fixed mounting locations, the track mounting system allows one side bar or running board to be used on multiple vehicle. This reduces inventory requirements, allowing room for more product. The track mounting system also makes installation easier. Because the bolts can slide along the channel, they can be precisely positioned and can easily accept nuts for a secure attachment.

ROCKER MOUNT VS BUSHING MOUNT

/ Rocker mount

All ARIES side bars and running boards mount using vehicle-specific brackets. This allows for easier and more secure installation. In addition to a vehicle-specific fit, there are two types of side bar / running board installations: rocker mount and bushing mount.

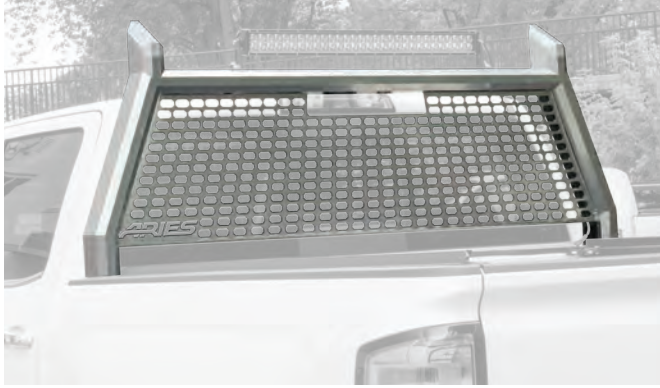

A rocker mount, also called a rocker panel mount, uses the vehicle's rocker panel to attach the mounting brackets. This may be done using pre-existing welded bolts on the vehicle, clip nuts or other fasteners. In general, side bars with 45° bent ends install using the rocker mount method.

/ Bushing mount

A bushing mount, on the other hand, attaches the mounting brackets to the vehicle using a set of pre-existing bolts on the vehicle, called bushing bolts. These bolts are installed on the vehicle by the manufacturer, and serve to anchor the body to the chassis. When installing side bars or running boards, these bushing bolts can be removed and reinstalled to hold the mounting brackets. A bushing mount is typically used for side bars with 90° bent ends.

HEADACHE RACKS

A headache rack is an accessory designed exclusively for pickup trucks. It consists of a main, outer frame that follows the outline of the truck cab, as well as some type of center section, such as a mesh grid or louvers.

The headache rack mounts at the front of the truck bed, just rearward of the cab, and is designed to provide some level of protection for the rear window, cab and passengers from loose cargo in the bed. Headache racks can also offer aesthetic value and protection from UV damage to the interior of the truck, making them a choice accessory for work trucks.

MUD FLAPS

A mud flap is an accessory typically found on trucks, SUVs or Jeeps® used for off-roading. It is essentially a thick rubber flap that mounts behind each rear tire and is intended to keep mud, stones and other debris from being projected into the wheel wells and behind the vehicle.

Because mud flaps may be illegal on main roads in some states, certain mud flaps, such as ARIES universal removable mud flaps, are designed for quick attachment and detachment as needed. To learn about the laws concerning mud flaps in your state, the State Patrol is a good resource.

A GUIDE TO JEEP® CUSTOMIZATION

Building (that is, customizing a vehicle with aftermarket accessories) has almost become an art form for today's Jeep® owner. The Jeep® Wrangler has particularly been a choice model for this hobby. The key to a great build is having the flexibility to add more and more accessories, and that is why the ARIES Jeep® line is diverse and innovative, giving your customers a wide selection to keep building and fueling their passion.

/ Customized look

For building a customized look, modular bumpers feature a six-piece, interchangeable design with up to 16 different configurations. Our modular bumpers, tube bumpers and roof light bar are also excellent choices for adding aftermarket lights. We also provide vehicle-specific grille guards and bull bars for various Jeep® models.

/ Ultimate off-roader

For building the ultimate off-roader, we carry tube doors, fender flares and our removable mud flaps with no drilling needed on the Jeep® JK. Our modular bumper accepts tow hooks and a winch for functionality on the trail. To keep your customers' items secure, our security cargo lid offers a fully lockable enclosure that integrates with the layout of the Jeep®.

/ Modular bumper design

Modular is simply a term used to describe accessories that have interchangeable pieces to allow for different combinations. For example, the ARIES Jeep® modular bumper is made up of a center section, two side extensions, a center brush guard and two side brush guards. Each piece individually attaches to the center section, meaning it can be added, left off or replaced with a different piece or finish to suit individual preference.

The modular design of the ARIES Jeep® bumper allows your customers to create different looks for their Jeep®, without needing to buy an entirely new accessory. They can start with one of 16 different base configurations, and then add, remove or swap out pieces as desired. See page 118 for a full listing of ARIES Jeep® modular bumpers.

/ Security cargo lid

The ARIES Jeep® security cargo lid is the perfect line of defense for your customer's items. This integrated security system turns the rear cargo area of the off-roading Jeep® Wrangler (4-door models only) into a fully lockable, key-operated storage enclosure. It not only allows your customers to keep items under lock and key while they're away, but it also helps protect them from the elements. The lid works with the layout of the Jeep® and with the rear door. It also features tie-down anchors and a 75-lb. weight capacity to accept additional cargo on top. The ARIES Jeep® security cargo lid is made from strong aluminum alloy and has a highly durable textured powder coat finish to easily resist the elements.

/ Rocker steps

New for 2016, ARIES Jeep® rocker steps offer extra side protection and a convenient step up. While many rocker panel protectors are simple steel panels or tubes, ARIES Jeep® rocker steps have a wide, flat profile that provides two key advantages. First, it offers a convenient, comfortable step up into the Jeep®. The double-tube layout and welded top plate create a sturdy, 3" wide stepping surface. Second, the flat design offers added ground clearance. Unlike some side bars that are mounted down and away from the vehicle, ARIES rocker steps are set high enough to clear brush, boulders and other off-road debris. They also feature a durable textured black powder coat finish to resist rust and hide scratches and grime. See page 126 for more.

/ Tube doors and fender flares

For stylizing the off-road machine, we offer tube doors and fender flares. ARIES tube doors feature an open design with an aggressive cutout pattern. They use the existing factory hinge brackets for easy mounting and are available for both the front and rear. The doors are made with hardened T6 aluminum construction and have a textured black powder coat finish to easily resist scratches and grime. Likewise, ARIES Jeep® fender flares add style and off-road readiness to your customer's Wrangler. They feature a 4" width and custom contours to show well with larger, off-road tires. With hardened T6 aluminum construction and a textured powder coat finish, these fender flares are made to go off road.

AUTO ACCESSORIES GLOSSARY

A

Access Cab

see 'Extended Cab'

Aftermarket

a term used to refer to automotive parts and accessories that fit a particular vehicle but are made by a manufacturer different than the original equipment manufacturer or OEM

All-Wheel Drive (AWD)

a drivetrain system that powers all four wheels simultaneously, all of the time; provides more traction when needed but generally will not activate until the vehicle requires it, making some automatic all-wheel drive vehicles essentially smart 2WD systems; different from four-wheel drive in that 4WD can be switched off by the driver

Application Guide

a complete index of current part numbers and associated vehicle applications for all ARIES parts; available online or in the ARIES catalog

B

Bench Seat

a type of vehicle seat that spans the width of the vehicle and provides seating for three or more persons; can be in the first row, but is commonly found in the rear passenger rows

Body

the external structure of a vehicle that gives it its recognizable shape; may be bolted to the chassis or combined as a single molded piece

Brush Guard

see 'Grille Guard'; may refer to the tubular attachment or extension of other front end accessories, such as the ARIES Jeep® modular bumper

Bucket Seat

a type of vehicle seat designed to hold only one person; typically used for the first row and sometimes second row

Bull Bar

a type of front end accessory, usually with an A-shaped frame, that bolts directly onto the vehicle and covers a center portion of the vehicle's bumper and grille

Bushing Bolt

a heavy-duty fastener used to anchor a vehicle's body to its chassis; can sometimes be used as an attachment point for side bars, running boards or other side accessories

Bushing Mount

a mounting style of side bars and running boards that uses the vehicle's bushing bolts to attach the mounting brackets; typically used for side bars with 90° bends and commonly used on aftermarket side bars as opposed to OEM

C

Cab & Chassis

also known as a 'cab and chassis truck' or 'chassis cab'; a type of heavy-duty truck comprised only of a cab and chassis, without a truck bed; typically used for heavy towing and commercial purposes

Chassis

the main framework of a vehicle, consisting of the frame and essential parts needed for operation (excludes the body); can be a unibody design, with the chassis and bodywork as a single piece, or with a C-frame construction

Clip Nut

a type of nut with an attached spring clip that allows it to be clipped onto the edge of an opening and held in place while a bolt is threaded through; frequently used for mounting points that are difficult to reach

Club Cab

see 'Extended Cab'

Crew Cab

also known as a 'quad cab', 'double cab', 'dual cab' and others; a truck cab with four full-size, front-hinging doors and seating for five or six people; larger than a regular cab and extended cab; see the 'Truck Cab Guide' on page 10 for more information

Crossbar

the main center section of a front end accessory, such as a bull bar or grille guard, to which aftermarket lights and other accessories may be attached

Cross-Linked Polyethylene (XPE) Foam

a fine-celled material comprised of linked polymer chains that provide increased hardness and rigidity, and offer characteristics of thermal insulation, waterproofing, shock absorption and sound insulation

Crossover Utility Vehicle (CUV)

also known simply as a 'crossover'; a vehicle that is built on a car platform using features and styling common on sport utility vehicles (SUV)

CUV

see 'Crossover Utility Vehicle'

D

Denier

a measurement of fabric weight, based on the fineness or thickness of the threads

Drivetrain

the set of parts in an automobile that allows the engine to channel its power to the axles; typically includes the driveshaft, CV joints, differential, axle shafts and U-joints

Dual Cab

see 'Crew Cab'

Dual Post

a floor liner attachment method that uses two knobs or posts, usually positioned on the driver's side near the seat, to help keep the floor liner held in place; also see 'Single Post'

Dually

a pickup truck with four tires on its rear axle, two on each side; usually able to carry heavier loads compared to a regular pickup truck

E

Extended Cab

also known as a 'king cab', 'super cab' and others; a truck cab with extra seating behind the front seats, usually accessed by tilting and sliding the main seats forward or using suicide doors; may also be referred to as a 'quad cab' on some older Dodge / Ram models; see the Truck Cab Guide on page 10 for more information

F

Four-Wheel Drive (4WD)

a drivetrain system in which all four wheels of the vehicle are powered by the engine simultaneously; different from all-wheel drive in that it can be disengaged by the driver so that the vehicle operates on a two-wheel drive system only

Frame

the part of a vehicle that serves as the base to which all other parts attach

G

Grille Guard

also called a 'brush guard'; a type of front end accessory that bolts directly onto the vehicle and usually covers a large portion of the vehicle's profile, including the grille and headlights; typically has a center section, consisting of a crossbar and two risers, as well as two side brush guards to cover the headlights

H

Headache Rack

a type of pickup truck accessory that mounts at the front of the truck bed, just rearward of the cab, and protects the cab and rear window from loose cargo in the bed

K

King Cab

see 'Extended Cab'

L

LED (Light-Emitting Diode)

a semiconducting light source that requires less amperage for illumination than a traditional light bulb

Long Bed (LB)

also called a 'long box'; a truck bed that is typically one or two feet longer than a short bed (compact long beds are generally 7' long and full size are 8' long)

M

Modular

a term applied to accessories that are able to be constructed with various, interchangeable pieces to produce different combinations; applies to ARIES Jeep® modular bumpers, see page 118

N

Nerf Bar

see 'Side Bar'

O

Original Equipment Manufacturer (OEM)

a term used to designate parts that are made by the original manufacturer as opposed to an aftermarket manufacturer

Q

Quad Cab

see 'Crew Cab'

R

Regular Cab

also known as a 'standard cab'; a truck cab with two full-size, front-hinging doors and seating for two or three people; has no extra space or seating behind the main seats, unlike an extended cab or crew cab; see the Truck Cab Guide on page 10 for more information

Risers

also known as 'uprights'; the vertical members of a grille guard that make up the main frame, together with the crossbar, and which provide mounting points to attach the grille guard to the vehicle; typically protected with rubber stripping on the front edges

Rocker Mount

also called a 'rocker panel mount'; a mounting style of side bars and running boards that uses the vehicle's rocker panel to attach the mounting brackets; may use welded bolts on the vehicle, clip nuts or other fasteners; typically used for side bars with 45° bends and commonly used on OEM side bars as opposed to aftermarket options

Rocker Panel

the side body panel on a vehicle, below the doors, spanning from wheel to wheel; can sometimes be used as an attachment point for side bars, running boards or other side accessories

Rocker Panel Mount

see 'Rocker Mount'

Running Board

a type of vehicle side accessory that provides a stepping surface into the vehicle and is generally mounted flush against the body; typically wider than a side bar and equipped with a tread that spans almost the full length of the board

S

Short Bed (SB)

a pickup truck bed that is usually a foot or two shorter than a long bed; typically 5.5' to 6.5' long

Side Bar

sometimes referred to as a 'nerf bar', 'step bar' or 'side step'; a type of vehicle side accessory that provides a stepping surface into the vehicle and is mounted with a certain amount of space between the step and the body; typically has individual step pads to correspond to each vehicle door

Side Marker

a small light mounted on either side of a vehicle to make it more visible to other drivers on the road; required by law; typically wired to illuminate with the vehicle's taillights and parking lights

Side Step

see 'Side Bar'

Single Hook

a floor liner attachment method, similar to 'Single Post', but using a hook instead of a knob, to help keep the floor liner held in place

Single Post

a floor liner attachment method that uses one knob or post, usually positioned on the driver's side near the seat, to help keep the floor liner held in place; also see 'Dual Post'

Sport Utility Vehicle (SUV)

a type of automotive vehicle with a station-wagon-like body built on a light truck chassis; usually equipped with four-wheel drive for on- or off-road capability

Stake Pocket

a rectangular recessed socket, accessible from the top surface of a truck's bed rail, designed to accept a stake or other aftermarket accessories such as tiedown anchors, ladder racks or headache racks, etc. (see the new AdvantEDGE™ headache rack on page 10)

Standard Cab

see 'Regular Cab'

Step Bar

see 'Side Bar'

Sub Frame

the part of a vehicle that supports the engine and front suspension on a unibody frame

Suicide Door

a type of vehicle door that has rearward hinges and that opens toward the front, opposite a standard vehicle door; typically requires the forward door to be opened first; commonly used on extended cab pickup trucks

Super Cab

see 'Extended Cab'

SUV

see 'Sport Utility Vehicle'

T

Terylene

a highly durable fabric that is made of synthetic polyester and characterized by its light weight and resistance to creasing

Thermoplastic rubber (TPR)

a material consisting of a combination of plastic and rubber and having properties of both, being flexible, moldable, durable, waterproof and resilient to extreme temperatures

Torque

a measurement of the turning force on an object such as a bolt or a flywheel (e.g. pushing or pulling the handle of a wrench when tightening a bolt)

Torque Wrench

a type of wrench that indicates to the user how much torque is being applied when turning the ratchet; used when a specific amount of torque must be applied to a fastener

Tow Hook

a large metal hook designed to be mounted on the front or rear of a vehicle, usually on the bumper, for straight-line towing purposes; typically used in combination with a tow strap

Track Mounting System

a type of mounting system for side bars and running boards that uses a channel and sliding bolts or brackets to attach to vehicle-specific mounting brackets; the channel typically spans the length of the accessory to allow for flexible positioning; helps reduce inventory requirements by allowing one accessory to fit multiple vehicles; may also refer to a system for mounting lights or other attachments to an automotive accessory, such as the AdvantEDGE™ bull bar (page 28) or AdvantEDGE™ headache rack (page 110)

Truck Bed

also called a 'truck box' or simply a 'box'; the rear portion of a truck, designed for holding cargo; usually equipped with sides and a tailgate; also see 'Short Bed' and 'Long Bed'

Truck Cab

also known as a 'cabin' or simply a 'cab'; the enclosed compartment of a pickup truck where the driver and passengers sit; see the Truck Cab Guide on page 10 for more information

Two-Wheel Drive (2WD)

a drivetrain system in which the engine powers only two of the vehicle's wheels; common on most non-commercial vehicles without four-wheel drive

U

Unibody Frame

a type of vehicle frame in which the bodywork and chassis are made up of a single molded piece; usually has a sub-frame on the front end to hold the engine and suspension

Uprights

see 'Risers'

V

Vehicle Identification Number (VIN)

a unique serial number used by the automotive industry to identify individual motor vehicles

VIN Tag

a metal plate or sticker on a vehicle or trailer that provides vital information about the vehicle, including the make, model, year, weight ratings and the VIN

W

Weld Nut

a type of nut that is welded to a metal surface on a vehicle and allows a bolt to be fastened directly to the surface without an additional nut

Wheel-to-Wheel

a term applied to side bars that extend from the front wheel of the vehicle to the rear wheel, and typically provide an additional step pad for accessing the truck bed

Wheelbase (WB)

the horizontal distance between the center of the front wheel and the center of the rear wheel on a vehicle

X

XPE Foam

see 'Cross-Linked Polyethylene (XPE) Foam'

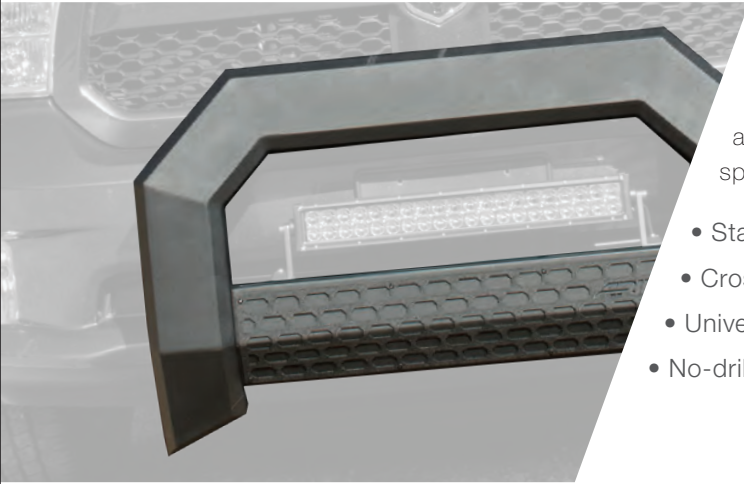

ADVANTEDGE SERIES™

LET YOUR TRUCK DO THE TALKING

There are a lot of trucks out there, and giving your customers what they need to stand out means going outside the lines, thinking outside the box and living life on the edge. The patent pending ARIES AdvantEDGE™ series offers a unique look to complement the modern truck,

featuring a 5 1/2" wide, angular, eight-sided tube profile and all-aluminum construction. AdvantEDGE™ products are available in two finish options, including black carbide powder coat and chrome powder coat, and all are backed by a five-year warranty.

AdvantEDGE™ bull bar

The ARIES AdvantEDGE™ bull bar is made with eight-sided, extruded aluminum tubing to be strong, lightweight and rust-free. It features an angular design to mimic the front ends of today's trucks and uses vehicle-specific brackets for each make and model. See page 28 for more.

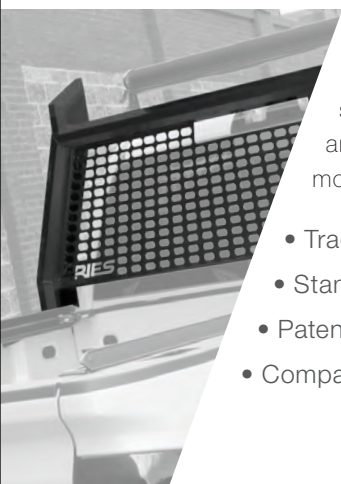

- Stamped aluminum, octagonal grid crossbar for a distinct look
- Crossbar can be flipped to mount auxiliary lights
- Universal track mounting system for easy, secure installation
- No-drill, vehicle-specific application for a custom fit

AdvantEDGE™ side bars

ARIES AdvantEDGE™ side bars are completely free of plastic parts, featuring die-cast aluminum end caps and a stamped aluminum tread that will never crack or fade. They come in four base lengths and install using a universal track mounting system. See page 64 for more.

- Stamped aluminum tread for a non-skid step that will never crack or fade
- Die-cast aluminum end caps for a durable accent
- Four base lengths use vehicle-specific brackets to fit all applications
- Universal 8mm track mounting system for easy, secure installation

AdvantEDGE™ headache rack

The ARIES AdvantEDGE™ headache rack is designed to protect and add style to the modern pickup truck. It offers excellent protection for the cab and uses a patent pending stake pocket anchoring system to securely mount on multiple makes and models. See page 110 for more.

- Track on the top edge accepts lights, tie-down anchors or other accessories
- Stamped aluminum, octagonal grid center section for a distinct look
- Patent pending stake pocket mounting system for simple, secure installation
- Compatible with a variety of pickup makes and models

PRO SERIES™

FIND OUT WHAT IT MEANS TO BE A PRO

The ARIES Pro Series™ represents a higher class of truck accessories, reserved for those who see their ride as more than just four wheels and a cab. It includes our patented Pro Series™ grille guard with a single-row LED light bar housing, as well as the Pro Series™ bull bar and Pro Series™

side bars to allow your customers to completely upgrade the look of their truck. All Pro Series™ products feature high-strength carbon steel construction, a tested, textured black powder coat finish and a three-year warranty.

Pro Series™ bull bar

The Pro Series™ bull bar adds class to the front end of any truck or SUV. This vehicle-specific bull bar installs using preexisting factory holes to quickly transform the vehicle from stock to stylish. See page 38 for more.

- 3" diameter, heavy-wall tube design
- Pre-drilled crossbar for mounting auxiliary lights
- Removable brushed stainless steel skid plate deflects small road debris
- Tow hooks available for 2010-2016 Ram 2500 / 3500 trucks

Pro Series™ grille guard

The ARIES Pro Series™ grille guard is unlike any other grille guard or brush guard on the road today because of its patented center crossbar. The unique crossbar is able to house a single-row LED light bar, allowing your customers to truly set their truck or SUV apart. See page 50 for more.

- Patented crossbar houses a single-row LED light bar (light bar not included)
- Interchangeable cover plates offer quick and easy customization
- Tested, textured black powder coat easily hides scratches and dirt
- One-piece, 1 1/2" diameter, heavy-wall tube design

Pro Series™ side bars

ARIES Pro Series™ side bars are a step above the rest, featuring 3" diameter, heavy-wall construction and custom, raised, non-skid step pads. Each set of side bars is designed with vehicle-specific contours and mounts with heavy-duty steel brackets. See page 86 for more.

- 3" diameter, heavy-wall tube design
- Raised, custom, non-skid step pads
- Brushed stainless steel ARIES insignia
- No-drill, vehicle-specific application for a custom fit

BULL BARS

ARIE

ARIE

KEEP THAT STIFF UPPER LIP

From the cattle rancher on the open range, to the industrial man of the asphalt jungle, to the jaw-clenching off-roader of the backwoods, ARIES bull bars are made for those who face the uncertain road without fear.

New to our lineup is the AdvantEDGE™ bull bar, featuring an angular, eight-sided tube profile and all-aluminum construction. It is available in a black carbide or chrome powder coat finish and comes with a five-year warranty.

We also offer 3" and 4" bull bars in a variety of finishes, including our cold-climate high-gloss black stainless, polished 304 stainless and textured black aluminum and carbon steel. All ARIES bull bars are made for no-drill, vehicle-specific installation and can accept aftermarket lights for easy customization.

NEW AdvantEDGE™ series

The new AdvantEDGE™ bull bar boasts an all-aluminum construction and a unique, eight-sided tube profile in two finish options to complement the style of today's trucks

Auxiliary light mounts

With a pre-drilled crossbar or crossbar track system, each ARIES bull bar can easily be customized with auxiliary lights, including round lights up to 5 1/2" in diameter and LED light bars

Multiple finishes available

ARIES bull bars come in an array of finishes, including textured black carbon and high-gloss black stainless. See page 11 to learn more about our available finishes

ADVANTEDGE™ BULL BARS

NEW

with a unique, octagonal tube and all-aluminum construction

/ Unique design

The 5 1/2" angular, eight-sided tube profile and octagonal grid crossbar offer a fresh look to complement the style of today's vehicles

/ All-aluminum build

The aluminum construction is strong, lightweight, rust-free and has no plastic parts, meaning it will never crack or fade

/ Reversible crossbar

The crossbar can be flipped to expose a 28" track mounting system for LED light bars, off-road lights or other auxiliary light options

Features and benefits

- Unique, eight-sided tube profile to complement the style of modern trucks
- Extruded, all-aluminum construction to be strong, lightweight and rust-free
- Stamped aluminum, octagonal grid crossbar for a distinct look
- Crossbar can be flipped to mount auxiliary lights
- Universal track mounting system for easy, secure installation
- No-drill, vehicle-specific application for a custom fit
- Complements other ARIES AdvantEDGE™ accessories
- Patent pending
- Five-year warranty

4"

BIG HORN™ BULL BARS

for even more attitude on that oversized truck

/ Bold design

The 4" diameter and 1/8" thick walls are made to accent larger, lifted trucks and are best complemented with Big Step™ side bars

/ Lightweight aluminum build

Aluminum construction is strong, rust-free and 40% lighter than carbon steel, making it ideal for both off-roading and hard work

/ Pre-drilled crossbar

The crossbar has two pre-drilled holes to securely mount auxiliary lights, including round lights up to 5 1/2" in diameter and LED light bars

Features and benefits

- Bold, 4" diameter is designed to show well on larger trucks
- Hardened aluminum construction to be lightweight and rust-free (also available in polished 304 stainless)
- Textured black powder coat easily hides scratches and dirt
- Pre-drilled crossbar for mounting auxiliary lights
- Removable, brushed stainless steel deflects small road debris
- Complements ARIES Big Step™ side bars, see page 82
- Tow hooks available for 2010-2016 Ram 2500 / 3500 trucks. See page 31 for details
- No-drill, vehicle-specific application for a custom fit
- See page 32 for application information
- Three-year warranty on black finish and limited lifetime warranty on polished stainless

3"

STEALTH™ BULL BARS

a black finish made specifically for cold-weather climates

/ Cold-weather-resistant

201 stainless steel construction gives the Stealth™ bull bar strength and rust resistance to withstand extreme temperatures, moisture and salt

/ Rigorously tested

To prove the Stealth™ bull bar can face whatever the frozen tundra has in store, it is put through the most rigorous salt spray test in the industry

/ Black finish alternative

A high resilience to salt and cold temperatures provides a reliable black finish option for those who don't want the polished stainless steel look

Features and benefits

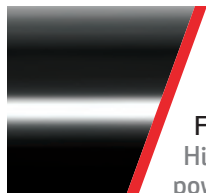

- Stainless steel construction to withstand rust and moisture
- Rigorously tested powder coat finish to easily outlast road salt
- Durable finish offers a high-gloss black alternative to polished stainless
- 3" diameter, heavy-wall tube design
- Pre-drilled crossbar for mounting auxiliary lights
- Removable, brushed stainless steel skid plate deflects small road debris
- Tow hooks available for 2010-2016 Ram 2500 / 3500 trucks. See page 35 for details
- No-drill, vehicle-specific application for a custom fit
- See page 36 for application information
- Three-year warranty

3"

PRO SERIES™ BULL BARS

with a durable finish that was born to go off-road

/ Tested finish

The textured powder coat easily hides scratches and is put through an extensive salt spray test to ensure durability in any season

/ Pre-drilled crossbar

The crossbar has two pre-drilled holes to securely mount auxiliary lights, including round lights up to 5 1/2" in diameter and LED light bars

/ Vehicle-specific fit

Each application uses unique mounting brackets and pre-existing factory holes to eliminate drilling and reduce installation time

Features and benefits

- Tested, textured black powder coat easily hides scratches and dirt
- 3" diameter, heavy-wall tube design
- High-strength carbon steel construction
- Pre-drilled crossbar for mounting auxiliary lights
- Removable, brushed stainless steel skid plate deflects small road debris
- Tow hooks available for 2010-2016 Ram 2500 / 3500 trucks. See page 39 for details
- Complements other ARIES Pro Series™ accessories
- No-drill, vehicle-specific application for a custom fit
- See page 40 for application information
- Three-year warranty

P35-4006

Material and finish

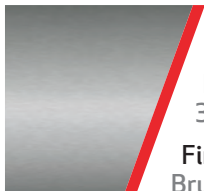

Bull bar

Material:
Carbon steel

Finish:
Textured black powder coat

Skid plate

Material:
304 stainless steel

Finish:
Brushed stainless

3" BULL BAR ACCESSORIES

License plate bracket

35-0000

- Easily bolts onto 3" crossbar, using existing skid plate hardware
- Provides a solid mounting location to keep license plate visible
- Steel construction with black powder coat finish
- Includes two license plate mounting bolts

Bull bar tow hooks for Ram trucks

35-5TOW

- Perfect for recovery towing applications
- Up to 10,000 lbs. load capacity
- Durable semi-gloss black powder coat finish
- Includes hardware for a solid installation
- Fits bull bars #35-5006, #B35-5006, #B35-5006-3, #P35-5006 for 2010-2016 Ram 2500 / 3500 trucks

3"

BULL BARS

with a vehicle-specific fit for hundreds of applications

/ Pre-drilled crossbar

The crossbar has two pre-drilled holes to securely mount auxiliary lights, including round lights up to 5 1/2" in diameter and LED light bars

/ Removable skid plate

The brushed stainless steel skid plate protects the front and underside of the vehicle and can be removed for a custom look

/ Vehicle-specific fit

Each application uses unique mounting brackets and pre-existing factory holes to eliminate drilling and reduce installation time

Features and benefits

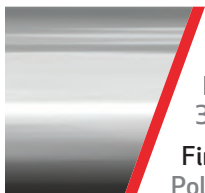

- 3" diameter, heavy-wall tube design
- Pre-drilled crossbar for mounting auxiliary lights
- Removable, brushed stainless steel skid plate deflects small road debris
- Tow hooks available for 2010-2016 Ram 2500 / 3500 trucks. See page 42 for details
- No-drill, vehicle-specific application for a custom fit
- See page 44 for application information
- Three-year warranty on black finish and limited lifetime warranty on polished stainless

GRILLE GUARDS

DARE TO CONQUER NEW TERRAIN

It wasn't the easy road that made your customers choose their truck. They chose it because there was new territory to be explored, wilderness to be tamed and terrain to be conquered.

For the conqueror in every truck owner, ARIES grille guards are available for a wide variety of applications. Each one is built vehicle-specific, not just to eliminate drilling and speed up installation, but because your customers expect a custom fit.

For those who dare to go even further, the Pro Series™ grille guard is unlike any other. Its patented crossbar is able to house an LED light bar and features an interchangeable cover plate to protect and add a custom look.

Don't make them settle. Give your customers confidence by giving them ARIES.

Pro Series™ grille guard

The Pro Series™ grille guard can accept one or more single-row LED light bars up to 20 or 30" long, using the patented crossbar housing and channel-style bracket

Patented light mounts

With a patented LED light bar housing on our Pro Series™ grille guards and a pre-drilled crossbar on our standard models, these grille guards make customization easy

Vehicle-specific fit

All ARIES grille guards use pre-existing holes on the vehicle to cut down on installation time, and many use a four-point mounting system for increased rigidity

CATEGORY INDEX

50 | **Pro Series™ Grille Guards**

52 | **Pro Series™ Cover Plates**

54 | **Grille Guards**

PRO SERIES™ GRILLE GUARDS

with a patented, customizable LED light bar housing

/ Patented crossbar

One or more single-row LED light bars, up to 20 or 30" in total length, can be mounted using the articulating, channel-style bracket

/ Customizable cover plate

The included black mesh cover plate keeps the light bar protected from theft and damage and can be swapped out for a custom look

/ Vehicle-specific fit

The 1/4" thick risers and 1 1/2" mandrel-bent steel tubing contour to the profile of each specific vehicle for seamless integration

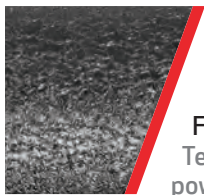

Features and benefits

- Patented crossbar houses a single-row LED light bar (light bar not included)
- Interchangeable cover plate protects the light bar and offers easy customization
- Channel-style bracket accepts one or multiple light bars
- Articulating bracket allows light to be mounted at a custom angle
- Tested, textured black powder coat easily hides scratches and dirt
- One-piece, 1 1/2" diameter, heavy-wall tube design
- High-strength carbon steel construction
- Protective rubber stripping along the risers
- Complements other ARIES Pro Series™ accessories
- No-drill, vehicle-specific application for a custom fit
- Pro Series™ grille guard patent# US9108581B2
- All Pro Series™ grille guards come standard with the black mesh cover plate #PC30MB (#PJ20MB for Jeep)
- See application guide on page 53
- Three-year warranty

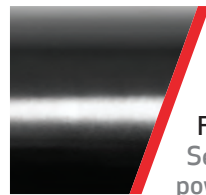

Material and finish

Grille guard

Material:
Carbon steel
Finish:
Textured black powder coat

Cover plate (included)

Material:
Carbon steel
Finish:
Semi-gloss black powder coat

PRO SERIES™ GRILLE GUARD ACCESSORIES

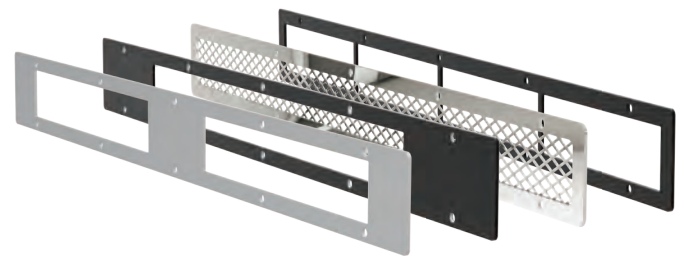

License plate bracket

85-0000

- Easily bolts onto the crossbar, using included hardware
- Provides a solid mounting location to keep license plate visible
- Steel construction with black powder coat finish
- Includes license plate mounting bolts

Interchangeable cover plates

See page 52 for options

- Easily swapped out for instant customization
- Available in multiple styles and finishes
- Protects light bars from theft and the elements
- Securely bolts onto the patented center crossbar
- All cover plate part numbers listed on page 52

PRO SERIES™ GRILLE GUARD COVER PLATES

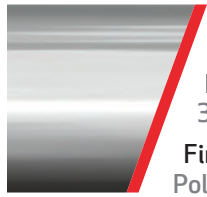

with an interchangeable design for easy customization

A key feature of the patented Pro Series™ grille guard is its unique light bar housing and mounting bracket. The channel-style bracket accepts one or more single-row light bars, up to 30" in total length (20" for Jeep®). This means multiple combinations can be used, such as one 30", two 10" or three 7". The crossbar housing keeps the light bars well protected from theft and damage.

To take customization even further, the Pro Series™ grille guard can also accept different crossbar cover plates. While each Pro Series™ grille guard comes standard with a black mesh cover plate, we offer replacements in three finishes and multiple styles to let your customers choose the look that best suits their vehicle.

Material and finish options

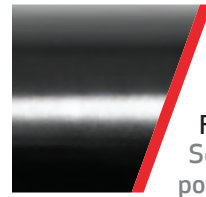

Cover plate

REPLACEMENT LIGHT BAR MOUNTING BRACKETS

- Accepts most single-row LED light bars up to 20" or 30" long
- Channel-style mounting system for flexible installation options
- Articulating design allows light to be mounted at a custom angle
- Included with all Pro Series™ grille guards
- Light bar not included

Available parts:
PR20 - 20" / PR30 - 30"

GRILLE GUARDS

with a vehicle-specific fit for hundreds of applications

/ Customizable design

The crossbar has two pre-drilled holes to accept auxiliary lights, and the headlight cages can be removed for a custom look

/ Vehicle-specific fit

The 1/4" thick risers and 1 1/2" mandrel-bent steel tubing contour to the profile of each specific vehicle for seamless integration

/ Simple, secure mounting

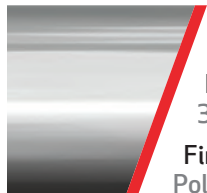

The risers bolt onto pre-existing factory holes in the vehicle's frame to eliminate the need for drilling and ensure a solid mount

Features and benefits

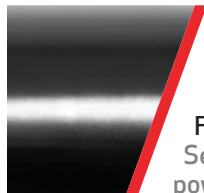

- One-piece, 1 1/2" diameter, heavy-wall tube design
- Pre-drilled crossbar for mounting auxiliary lights
- Removable headlight cages for a custom look
- Protective rubber stripping along the risers
- No-drill, vehicle-specific application for a custom fit
- See application guide on page 56
- Three-year warranty on black finish and limited lifetime warranty on polished stainless

SIDE BARS

STEP UP AND STAND OUT

When your customers start and end their day turning the ignition of their truck, unreliable footing isn't an option. For the serious truck owner, side bars aren't there just to look pretty. They're there to take a boot to the face every single day, and look pretty doing it.

New for 2016, AdvantEDGE™ side bars give your customers a fresh look, with an angular, eight-sided tube profile and all-aluminum construction. They feature a stamped aluminum tread, die-cast aluminum end caps and a track mounting system to fit multiple makes and models.

ARIES side bars are also available in three different diameters, two tube profiles and multiple finishes, including lightweight aluminum options.

Don't pull the footing out from under your customers. Give them a solid step up with ARIES.

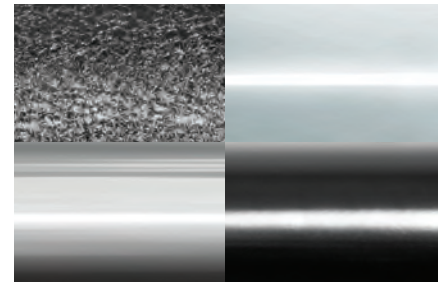

NEW AdvantEDGE™ series

The new AdvantEDGE™ side bars have an all-aluminum construction and a unique, eight-sided tube profile in two finish options to complement the style of today's trucks

More applications

ARIES side bars are available for hundreds of applications, and each is designed for vehicle-specific installation to give your customers the right fit for their ride

Variety of finishes

ARIES side bars come in an array of finishes, including textured black carbon and semi-gloss black aluminum. See page 11 to learn more about our finishes

ADVANTEDGE™ SIDE BARS

NEW

with a unique, octagonal tube and all-aluminum construction

/ Unique design

The 5 1/2" angular, eight-sided tube profile and octagonal grid tread offer a fresh look to complement the style of today's vehicles

/ All-aluminum build

The aluminum construction is strong, lightweight, rust-free and has no plastic parts, meaning it will never crack or fade

/ Easier inventory

Four base lengths fit all applications to allow additional space for inventory, while vehicle-specific brackets provide a custom fit

Features and benefits

- Unique, eight-sided tube profile to complement the style of modern trucks
- Extruded, all-aluminum construction to be strong, lightweight and rust-free
- Stamped aluminum tread for a non-skid step that will never crack or fade
- Die-cast aluminum end caps for a durable accent
- Complements other ARIES AdvantEDGE™ accessories
- Universal 8mm track mounting system for easy, secure installation
- Four base lengths for easier inventory (53", 75", 85" and 91")
- USA-made, vehicle-specific mounting brackets for a precise fit
- Sold in pairs with mounting brackets sold separately. See page 66 for application information
- Patent pending
- Five-year warranty

UNIVERSAL TRACK MOUNTING SYSTEM

AdvantEDGE™ side bars come in four base lengths, including 53", 75", 85" and 91", to take up less inventory space and allow for easier ordering. To ensure a custom fit for every application, the side bars install using a track

mounting system and vehicle-specific mounting brackets. Using the application guide, determine the side bar length and bracket part number that will fit your customer's specific vehicle. All brackets will accommodate both finish options.

6"

OVAL SIDE BARS

for an OE look in a lightweight aluminum option

/ OE styling

The 6" oval tube profile, large step pads and hard black plastic end caps are designed to mimic popular original-equipment side bars

/ Reliable footing

The tough polypropylene step pads provide a comfortable, 5" wide, non-skid surface and are UV-stable to outlast sun damage

/ Lightweight aluminum build

Aluminum construction is strong, rust-free and 40% lighter than carbon steel, making it ideal for both off-roading and hard work (also available in stainless)

Features and benefits

- 6" wide, OE-style tube with hard ABS plastic end caps
- Available in semi-gloss black aluminum for a lightweight, rust-free option
- Extra-wide, non-skid step pads for a safe, comfortable step
- Universal track mounting system for easy, secure installation
- Four base lengths for easy inventory (53", 75", 85" and 91")
- Vehicle-specific, heavy-duty steel mounting brackets for a custom fit
- Sold in pairs with mounting brackets sold separately. See page 70 for application information
- Five-year warranty on black finish and limited lifetime warranty on polished stainless

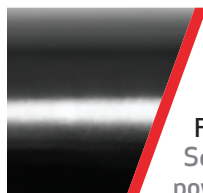

Material and finish options

Side bars

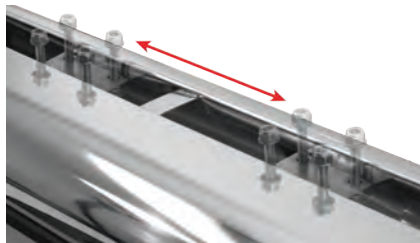

Material:
304 stainless steel
Finish:
Polished stainless

Material:
Aluminum alloy
Finish:
Semi-gloss black powder coat

UNIVERSAL TRACK MOUNTING SYSTEM

6" oval side bars come in four base lengths, including 53", 75", 85" and 91", to take up less inventory space and allow for easier ordering. To ensure a custom fit for every application, the side bars install using a track mounting

system and vehicle-specific mounting brackets. Using the application guide, determine the side bar length and bracket part number that will fit your customer's specific vehicle. All brackets will accommodate both finish options.

4"

OVAL SIDE BARS

with seamlessly blended ends for a unique, finished look

/ Unique finished look

The 30° bends and seamlessly blended end caps offer a superior, finished look to competitive straight tubes and plastic end caps

/ Raised step pads

The tough polypropylene step pads provide an extra-wide, non-skid surface and are custom-positioned to match the vehicle layout

/ Vehicle-specific fit

Each side bar has vehicle-specific bends and mounting brackets to contour to the vehicle and install quickly with no drilling required

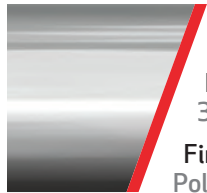

Features and benefits

- 30° bends to contour to the body of the vehicle
- Seamless, welded end caps for a superior, finished look
- Wheel-to-wheel on select models for regular cab and others. See page 78 for more information
- Raised, custom, non-skid step pads
- Brushed stainless steel ARIES insignia on each step
- Elliptical, 4" wide, heavy-wall tube design
- No-drill, vehicle-specific application for a custom fit
- Sold in pairs with installation hardware included
- Heavy-duty steel mounting brackets
- See page 76 for application information
- Three-year warranty on black finish and limited lifetime warranty on polished stainless

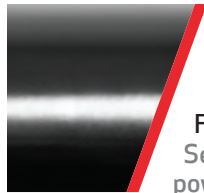

Material and finish options

Side bars

Material:
304 stainless steel
Finish:
Polished stainless

Material:
Carbon steel
Finish:
Semi-gloss black powder coat

WHEEL-TO-WHEEL

To give your customers a unique option for their ride, the ARIES 4" oval lineup includes wheel-to-wheel side bars. Wheel-to-wheel 4" ovals add utility and an enhanced appearance, featuring 30° bent ends and extra step pads in the rear for convenient truck bed access.

We offer wheel-to-wheel 4" oval side bars on select models for regular cab pickup trucks and others. They are available in both finishes of polished stainless and semi-gloss black powder coat (regular cab only available in black). See page 78 for more information.

4"

WHEEL-TO-WHEEL OVAL SIDE BARS

for a finished look from wheel to wheel

/ Regular cab options

We offer wheel-to-wheel 4" oval side bars on select models for regular cab pickup trucks and others (regular cab available in black finish only)

/ Extra step pads

Each wheel-to-wheel side bar features an extra step pad in the rear to allow for easy access to the truck bed or truck bed tool box

/ Unique finished look

The 30° bends and seamlessly blended end caps offer a superior, finished look to competitive straight tubes and plastic end caps

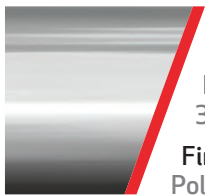

Features and benefits

- Extra rear step pad for convenient truck bed access
- Available for certain regular cab pickups. See page 80 for application information
- 30° bends to contour to the body of the vehicle
- Seamless, welded end caps for a superior, finished look
- Raised, custom, non-skid step pads
- Brushed stainless steel ARIES insignia on each step
- Elliptical, 4" wide, heavy-wall tube design
- No-drill, vehicle-specific application for a custom fit
- Sold in pairs with installation hardware included
- Heavy-duty steel mounting brackets
- Three-year warranty on black finish and limited lifetime warranty on polished stainless

1. May leave extra space between the end of the side bar and the rear wheel

4"

BIG STEP™ ROUND SIDE BARS

to give that oversized truck a real riding partner

/ Bold design

The 4" diameter and 1/8" thick walls are made to accent larger, lifted trucks and are best complemented with a Big Horn™ bull bar

/ Lightweight aluminum build

Aluminum construction is strong, rust-free and 40% lighter than carbon steel, making it ideal for both off-roading and hard work

/ Raised step pads

The tough polypropylene step pads provide an extra-wide, non-skid surface and are custom-positioned to match the vehicle layout

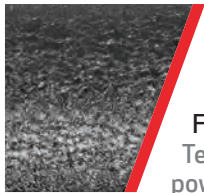

Features and benefits

- Bold, 4" diameter is designed to show well on larger trucks
- Hardened T6 aluminum construction to be lightweight and rust-free
- Textured black powder coat easily hides scratches and dirt
- Raised, custom, non-skid step pads
- Brushed stainless steel ARIES insignia on each step
- Unique bends to contour to the body of the vehicle
- Made to complement ARIES Big Horn™ bull bars
- No-drill, vehicle-specific application for a custom fit
- Sold in pairs with installation hardware included
- Heavy-duty steel mounting brackets
- Five-year warranty

3"

PRO SERIES™ ROUND SIDE BARS

with a textured black finish that won't back down

/ Tested finish

The textured powder coat easily hides scratches and is put through an extensive salt spray test to ensure durability in any season

/ Raised step pads

The tough polypropylene step pads provide an extra-wide, non-skid surface and are custom-positioned to match the vehicle layout

/ Vehicle-specific fit

Each side bar has vehicle-specific bends and mounting brackets to contour to the vehicle and install quickly with no drilling required

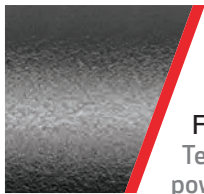

Features and benefits

- Tested, textured black powder coat easily hides scratches and dirt
- Raised, custom, non-skid step pads
- 3" diameter, heavy-wall tube design
- High-strength carbon steel construction
- Brushed stainless steel ARIES insignia on each step
- Unique bends to contour to the body of the vehicle
- Complements other ARIES Pro Series™ accessories
- No-drill, vehicle-specific application for a custom fit
- Heavy-duty steel mounting brackets
- Sold in pairs with installation hardware included
- See page 88 for application information
- Three-year warranty

3"

ROUND SIDE BARS

with a vehicle-specific fit for hundreds of applications

/ E-coat finish

In addition to a durable powder coat, our carbon steel side bars get an E-coat finish for added chip, scratch and peel resistance

/ Custom step pads

The tough polypropylene step pads provide a textured, non-skid surface and are custom-positioned to match the vehicle layout

/ Vehicle-specific fit

Each side bar has vehicle-specific bends and mounting brackets to contour to the vehicle and install quickly with no drilling required

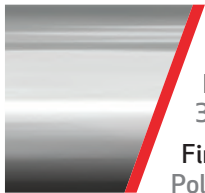

Features and benefits

- No-drill, vehicle-specific application for a custom fit
- Unique bends to contour to the body of the vehicle
- Custom, non-skid step pads
- 3" diameter, heavy-wall tube design
- Heavy-duty steel mounting brackets
- Sold in pairs with installation hardware included
- See page 92 for application information
- Three-year warranty on black finish and limited lifetime warranty on polished stainless

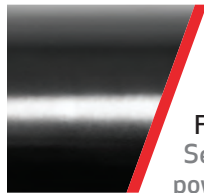

Material and finish options

Side bars

Material:
304 stainless steel
Finish:

RUNNING BOARDS

RISE TO THE CHALLENGE

For some, it's more than just a drive – more than a simple matter of A to B. It's about rising to the challenge. For 2016, ARIES introduces a new line of running boards, including fast, lightweight AeroTread™ and tough, ready-to-work RidgeStep™.

AeroTread™ running boards are sleek and lightweight, providing an aerodynamic accent for the modern CUV or SUV. They feature full-length treads, an aluminum base and two finish options. RidgeStep™ commercial running boards boast an all-steel construction. They perfectly complement the hard-working truck and are equipped with non-skid, stamped steel treads and a tough powder coat finish.

When the challenges arise, give your customers what they need to meet them head-on with ARIES.

NEW RidgeStep™

New RidgeStep™ commercial running boards are made to get the job done, featuring textured black, all-steel construction with a stamped tread that will not crack, fade or wear

NEW AeroTread™

Made with an aluminum base, new AeroTread™ running boards feature a front trim piece in two finish options: polished stainless steel or black carbide powder coat

Track mounting system

Using vehicle-specific mounting brackets and a track-type mounting system, ARIES running boards are made for easy, no-drill installation and a custom fit

CATEGORY INDEX

100 | 6 ½" RidgeStep™

104 | 5" AeroTread™

6 1/2"

RIDGESTEP™ COMMERCIAL BOARDS

NEW

with no plastic parts and no nonsense

/ Heavy-duty build

With all-steel construction and a durable textured black powder coat finish, the boards are designed to face tough jobs, day after day

/ Reliable footing

High-strength steel mounting brackets provide a solid step, while the non-skid, stamped steel tread will never crack or fade

/ Easier inventory

Four base lengths fit all applications to allow additional space for inventory, while vehicle-specific brackets provide a custom fit

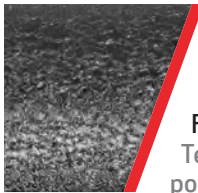

Features and benefits

- High-strength, all-steel construction with no plastic parts
- Angular design for a tough, no-nonsense look
- Non-skid, all-steel tread will not wear or crack
- Flat profile and 6 1/2" width provide a comfortable step
- Textured black powder coat easily hides scratches and dirt
- Welded end caps complement the contours of the truck
- Universal track mounting system for easy, secure installation
- Four base lengths for easier inventory (53", 75", 85" and 91")
- USA-made, vehicle-specific mounting brackets for a precise fit
- Sold separately in pairs with mounting brackets
- See page 102 for application information
- Three-year warranty

5"

AEROTREAD™ RUNNING BOARDS

NEW

for a sleek, fast, lightweight accent on the modern crossover or SUV

/ Sleek design

The vehicle-specific fit, curved edges, tapered ends and aero-dynamic tread pattern add a sleek accent to modern crossovers and SUVs

/ Lightweight build

The aluminum base provides a solid, lightweight, rust-free step and is covered in a front trim piece, available in two finishes

/ Full-length tread

The hard plastic step pad runs the entire length of the board, providing a non-skid surface no matter where you place your foot

Features and benefits

- Sleek design with rounded ends to complement the look of modern CUVs and SUVs
- Extruded aluminum base to be lightweight and rust-free
- Flat profile and 5" width provide a comfortable step
- Full-length, tough plastic tread offers a reliable, non-skid surface
- Universal track mounting system for easy, secure installation
- Four base lengths for easier inventory (67", 70", 73" and 76")
- Vehicle-specific mounting brackets for a precise fit
- Sold in pairs with mounting brackets sold separately
- See page 106 for application information
- Three-year warranty

REARWARD PROTECTION

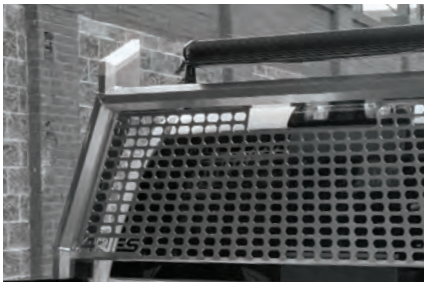

COVER YOUR SIX

At ARIES, we have your back, and that means giving you tough accessories to have your customer's back. Our new AdvantEDGE™ headache rack features a unique, octagonal tube profile and grid center section. It offers easy customization with a track-style light mounting system. We also continue to offer our universal headache racks with 1" x 2" steel tube construction and a fully louvered center section.

Our removable mud flaps are a must-have off-road accessory, featuring a quick-release removal system to easily be attached or detached whenever needed. They are available in two flap sizes and can be trimmed to fit virtually any tire offset. Whether hauling heavy loads to the job site or braving uncharted trails, prepare your customers for whatever lies ahead with ARIES.

NEW AdvantEDGE™ series

The new AdvantEDGE™ headache rack features a unique look and lightweight design. It allows for easy customization with a top track for mounting lights or other accessories

Prepared to work

ARIES headache racks offer tough cab protection no matter what the job. Our universal racks come with full louvers, while AdvantEDGE™ features a stamped aluminum grid

Off-road ready

Our removable mud flaps are made for fast, easy, pull-pin removal for as-needed use. They quickly convert any truck, Jeep® or SUV into the ultimate off-roading machine

ADVANTEDGE™ HEADACHE RACKS

NEW

for a unique look and easy customization

/ Unique design

The angular, eight-sided tube profile and octagonal grid center section offer a fresh look to complement the style of today's pickups

/ Top track system

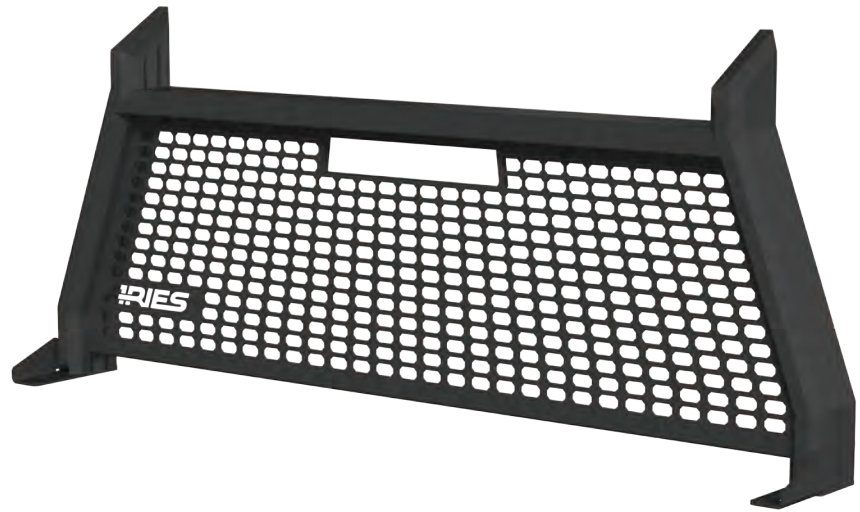

The top edge features a versatile track system to accept LED light bars, off-road lights, tie-down anchors or other accessories

/ All-aluminum build

The aluminum construction is strong, lightweight, rust-free and has no plastic parts, meaning it will never crack or fade

Features and benefits

- Unique, eight-sided tube profile to complement the style of modern trucks
- Track on the top edge accepts lights, tie-down anchors or other accessories
- Extruded, all-aluminum construction to be strong, lightweight and rust-free
- Stamped aluminum, octagonal grid center section for a distinct look
- Stake pocket mounting system for simple, secure installation
- Complements other ARIES AdvantEDGE™ accessories
- Patent pending
- Five-year warranty

CUSTOMIZABLE TOP TRACK

In addition to an all-aluminum construction, a stake pocket anchor system and a unique, eight-sided tube profile, the AdvantEDGE™ headache rack also has a unique top track system. The tube running along the top edge of the rack

features an 8mm channel to accept mounting brackets for an LED light bar, round lights, tie-down anchors or other accessories. The channel design allows for a flexible number of accessories and flexible positioning.

HEADACHE RACKS

with a universal design to fit most full-size pickups

/ Universal design

The versatile mounting system allows for a solid fit on most full-size pickup trucks and is compatible with cross-bed tool boxes

/ Heavy-duty construction

High-strength steel tubing and a fully louvered center section provide a strong frame to keep the truck cab well protected

/ Tough finish

The durable, semi-gloss black powder coat finish easily resists scratches, rust, UV damage and other threats on the jobsite

Features and benefits

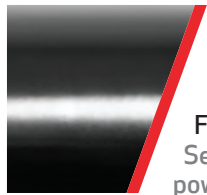

- Two universal sizes fit most full-size pickup trucks (see table below)
- Heavy-duty 1" x 2" steel tube construction
- Fully louvered to protect cab and passengers
- Compatible with cross-bed tool boxes
- Durable semi-gloss black powder coat finish
- Three-year warranty

REMOVABLE UNIVERSAL MUD FLAPS

easily attached or detached with the pull of a pin

/ Use as needed

The mounting bracket features a quick-release pull-pin to allow the mud flaps to be attached or detached whenever necessary

/ Universal design

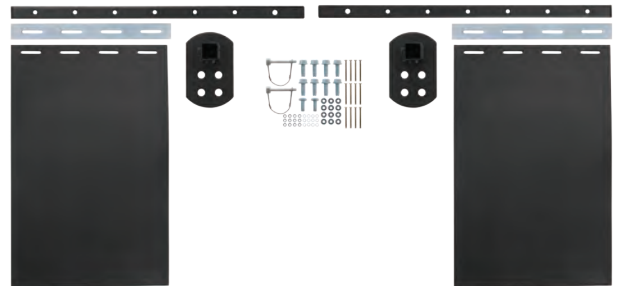

The 22" hanger can be cut to virtually any length needed to perfectly match the unique tire offset of each truck, Jeep® or SUV

/ Solid construction

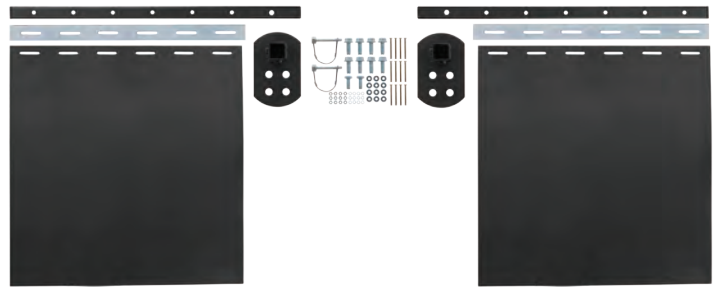

The hangers and mounting brackets are made from high-strength steel and have a durable powder coat finish to withstand corrosion

Features and benefits

- Quick-release, pull-pin removal system for a use-as-needed design
- No drilling required on Jeep® Wrangler JK
- Universal brackets with multiple mounting holes fit a variety of vehicles
- 22" hanger can be cut to match different tire offsets
- Thick rubber flaps withstand heavy abrasions and shed water with ease
- High-strength steel brackets with durable powder coat finish
- Sold in pairs with installation hardware included
- One-year warranty

Applications

Removable Universal Mud Flaps

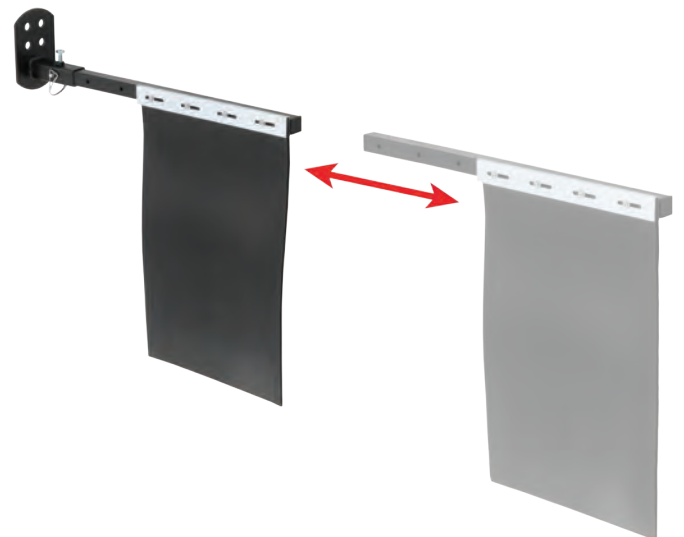

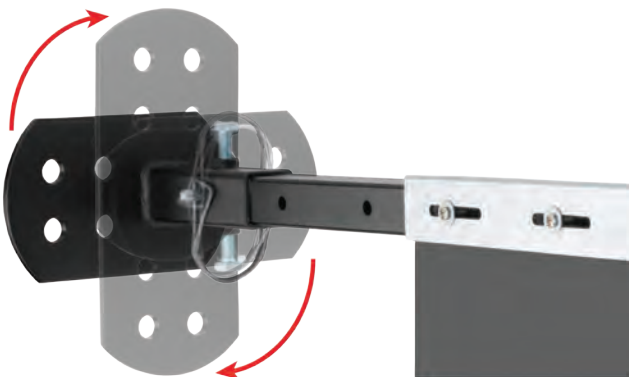

Size	Part#
12" x 18"	AR111900
18" x 18"	AR111950

MADE FOR VERSATILITY

The two key advantages of ARIES mud flaps are that they're removable and universal. The adjustable brackets mount on the vehicle, using four bolts. They can be positioned horizontally or vertically.

The quick-release pull-pin then allows the flaps to be attached to the brackets in mere seconds, and detached whenever necessary.

JEEP® PRODUCTS

TAKE THINGS OFF THE BEATEN PATH

At ARIES, we know what it means to be a Jeep® owner. From our modular bumpers and tube doors to our security cargo lid and fender flares, our complete line of Jeep® products reflects the same passion your customers have for going off the beaten path.

New for 2016, ARIES Jeep® rocker steps offer more than extra side protection. With their wide, flat profile and heavy-duty design, they offer a solid step up, plenty of ground clearance and protection from scratches and dents.

Never let your customers settle for Jeep® accessories that are unworthy to bear the name. Give them freedom on the trail with Jeep® products from ARIES.

NEW Jeep® rocker steps

Unlike side bars, new ARIES Jeep® rocker steps are designed to offer more ground clearance to be off-road ready. They not only offer extra protection but also a solid step up

Easy customization

ARIES Jeep® products make it easy for your customers to achieve that customized look, whether they want the entire package right away or prefer to build one piece at a time

Solid construction

Most of our Jeep® products are made from hardened T6 aluminum with a textured black finish to be strong, rust-free and keep your customer's Jeep® light on its feet

JEEP[®] MODULAR BUMPERS

with a mix-and-match design for ultimate customization

/ Customizable configuration

The modular design allows pieces to be added to the center section as desired, making it easy to find the right look and change it any time

/ Lightweight build

Constructed with 3/16" T6 aluminum and 100% TIG welds, the aluminum option is strong, lightweight and rust-free for ready off-roading

/ Multiple accessory options

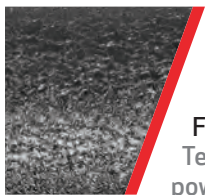

With light mounting tabs and cutouts, tow hook attachment points and a 22 1/2" x 7 3/4" winch housing, adding accessories is easy

Features and benefits

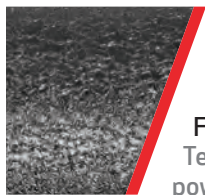

- Six-piece customizable design with 16 different configurations (see page 120 for more information)
- Modular pieces can be added or removed as desired
- Hardened T6 aluminum construction to be lightweight and rust-free (also available in carbon steel)
- Cutouts and light mounting tabs for OE bumper lights and auxiliary lighting
- Accepts tow hooks and a winch (aluminum requires winch bracket #15600WRB)
- Mid configuration with side caps available for larger tires or wheel wells
- Fits 2007 - 2016 Jeep[®] Wrangler JK
- Uses pre-existing factory mounting points for easy installation
- Front and rear bumpers available
- Five-year warranty on aluminum bumpers and three-year warranty on steel

JEEP® MODULAR BUMPER ACCESSORIES

NEW Winch fairlead mount

15600FB

- Easily and securely mounts on ARIES modular bumper winch housing
- Two holes, spaced 10" center-to-center, accept most types of fairleads
- See page 137 for more information

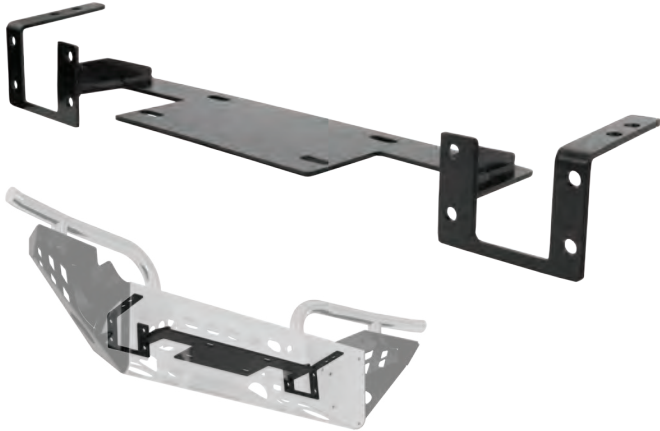

Tow hook

15600TW

- Perfect for recovery towing applications
- Up to 9,000 lbs. capacity
- Fits both steel and aluminum modular bumpers (aluminum requires winch receiver plate bracket)
- See page 137 for more information

Winch receiver plate bracket

15600WRB

- Required to reinforce an aluminum front modular bumper when using a winch or tow hooks
- See page 137 for more information

License plate bracket

55-0000

- Provides a solid mounting location to keep license plate visible
- See page 138 for more information

JEEP® ROCKER STEPS

NEW

for added protection and a solid foothold on any off-roader

/ Wide, flat profile

Unlike side bars that have low ground clearance, rocker steps are set high enough to clear brush, boulders and other off-road debris

/ Reliable footing

While most rocker bars only serve to protect, the welded top plate provides a convenient, comfortable, 3" wide step up into the Jeep®

/ Off-road ready

The all-steel construction, double-tube layout and tough, textured black powder coat finish offer the durability needed to conquer the trail

Features and benefits

- Double-tube layout and 3" wide top plate provide a solid step
- Heavy-duty design offers extra protection for the sides of the Jeep®
- Flat profile increases ground clearance for ready off-roading
- Textured black powder coat easily hides scratches and dirt
- All-steel construction for reliable strength
- Pre-welded mounting brackets increase rigidity and simplify installation
- No-drill, vehicle-specific application for a custom fit
- Sold in pairs with mounting hardware included
- Three-year warranty

Available finish

JEEP® TUBE DOORS

for a taste of freedom with every drive

/ Off-road ready

The open design, aggressive cutout pattern and lightweight aluminum construction are geared for the ultimate off-roading experience

/ Solid construction

Hardened T6 aluminum provides high structural integrity, while the tungsten insert gas (TIG) welds allow for clean weld lines and a precise fit

/ Strong finish

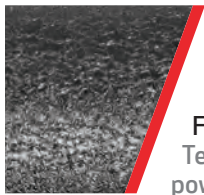

The textured black powder coat finish resists UV damage and easily hides scratches and dirt to stand up to the off-road elements

Features and benefits

- Open design and aggressive cutout for the ultimate off-roading experience
- Hardened T6 aluminum construction to be lightweight and rust-free
- Textured black powder coat easily hides scratches and dirt
- 100% TIG welds for a precise fit
- Simple installation using existing hinge points
- Accepts factory mirrors (not compatible with power mirrors)
- Sold in pairs with swing-out straps included
- Five-year warranty

Tube doors may be illegal in some states.
Check with the local and state laws before installing

KEY-OPERATED LOCKING LATCH

While ARIES tube doors are built to open up the Jeep® Wrangler for ultimate off-roading, they are also designed to be functional and maintain a certain level of vehicle security. The doors operate using the factory hinges and

existing striker plates, and they feature a locking latch mechanism to help deter unwelcomed access into the Jeep® while it is parked and left unattended.

JEEP® FENDER FLARES

give those off-road tires the recognition they deserve

/ Lightweight aluminum build

Aluminum construction allows the flares to be strong and lightweight, while the durable, textured black finish easily hides scratches and dirt

/ Custom fit

The 4" width and vehicle-specific contours offer a precise fit for the Jeep® Wrangler, adding style, utility and accommodating the off-road ride

/ Solid installation

The flares bolt directly onto the body, replacing the factory flares, and they can accept LED side markers for maximum safety on and off the road

Features and benefits

- Hardened T6 aluminum construction to be lightweight and rust-free
- Textured black powder coat easily hides scratches and dirt (also available in a raw, paintable finish)
- 4" wide design with vehicle-specific contours
- Solid, bolt-on installation
- Accepts LED fender flare side markers ARIES #1500240 (some drilling required)
- Available for front and rear wheels
- Sold in pairs, including passenger and driver side
- Mounting hardware included (some drilling may be required)
- Three-year warranty

- Splices into existing factory wiring harness
- Wires route through fender frame to keep them well protected
- DOT-approved for safety
- Includes all necessary installation hardware
- One-year warranty

JEEP® SECURITY CARGO LID

for ultimate off-road security and storage

/ Integrated security

The six-panel enclosure bolts directly into the bed of the Jeep® and creates a spacious, key-operated storage area that works with the rear door

/ Versatile design

Tie-down anchors and a weight capacity of 75 lbs. allow items to be stored on top, and the lid can be flipped and converted into a usable surface

/ Lightweight aluminum build

The hardened T6 aluminum construction is strong, rust-free and lightweight to keep valuables safe and protect them from the elements

Features and benefits

- Six-panel, bolt-on design integrates with the layout of the Jeep® (4-door models only)
- Key-operated, water-resistant enclosure provides a generous storage area
- Hardened T6 aluminum construction to be lightweight and rust-free
- Textured black powder coat easily hides scratches and dirt
- Works in conjunction with the rear door
- Convertible to a workbench or table area
- 1/2" diameter tie-down anchors on top for securing additional cargo
- Weight capacity up to 75 lbs.
- Compatible with hardtop on or off, soft top and subwoofer
- Complete kit part number ships in two boxes
- Three-year warranty

KEY-OPERATED LOCKING LATCH

The ARIES security cargo lid not only works with the rear door of the Jeep®, but it also functions independently, meaning it can be opened without requiring the rear door to be opened first. It features a key-operated, quarter-turn latch for quick, convenient access to the cargo area.

Simply insert the key, turn the latch and lift the lid. The locking latch mechanism is made with durable metal components and is covered in a chrome finish for lasting rust resistance.

JEEP® TUBE BUMPERS

for a classic look that never goes out of style

/ Solid construction

3" diameter tubing is welded together in a double-stacked design for increased strength and a classic appearance

/ Strong finish

Both the polished stainless and black powder coat finishes are highly resistant to rust, scratches and other damage

/ Simple installation

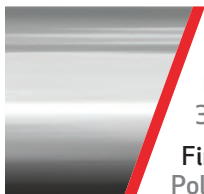

Bumper installs using the vehicle's original factory bumper mounting points for quick, secure, no-drill attachment

Features and benefits

- Double-stacked layout for a classic appearance
- 3" diameter, heavy-wall tube design
- Front bumper features protective welded brush guard
- Cutout on rear bumper allows for spare tire
- Uses pre-existing factory mounting points for easy installation
- Front and rear bumpers available
- Three-year warranty

ROOF LIGHT BAR

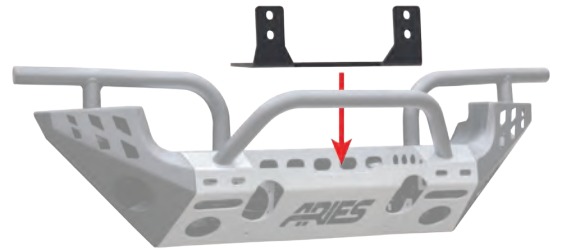

- Accommodates most LED light bar sizes and round lights up to 9" in diameter
- Designed to contour to the windshield
- Fits 2007 - 2016 Jeep® Wrangler JK
- Hardened T6 aluminum construction to be lightweight and rust-free
- Textured black powder coat easily hides scratches and dirt
- Will not whistle like competitive models
- Compatible with hardtops and soft tops
- Three-year warranty

NEW WINCH FAIRLEAD MOUNT

- Easily and securely mounts on ARIES modular bumper winch housing
- Two holes, spaced 10" center-to-center, accept most types of fairleads
- Solid, 1/4" thick steel construction
- Durable carbide black powder coat finish
- Fits both steel and aluminum modular bumpers (aluminum requires winch receiver plate bracket)
- Uses winch and fairlead mounting hardware

15600FB

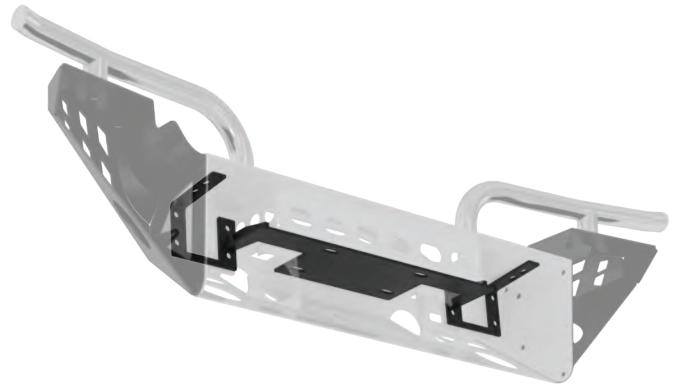

WINCH RECEIVER PLATE BRACKET

- Required to reinforce an aluminum front modular bumper when using a winch or tow hooks
- Solid, 1/4" thick carbon steel construction
- Durable black powder coat finish
- Includes mounting hardware

15600WRB

TOW HOOK

- Perfect for recovery towing applications
- Up to 9,000 lbs. capacity
- Fits both steel and aluminum modular bumpers (aluminum requires winch receiver plate bracket)
- Utilizes existing factory bolts on YJ and TJ models
- Steel construction with black powder coat finish
- Three-year warranty

15600TW

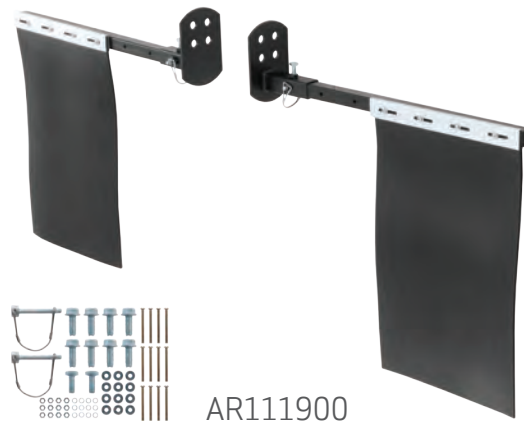

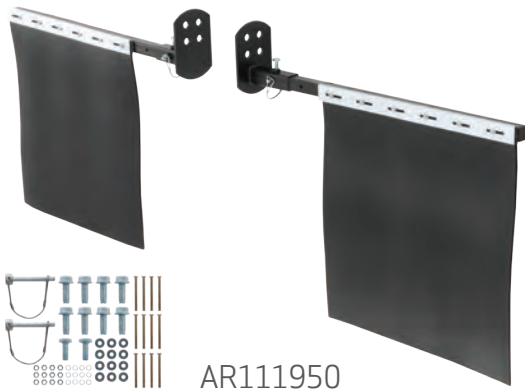

NEW FENDER FLARE SIDE MARKERS

- LED components for a bright, long-lasting light
- Splices into existing factory wiring harness
- Wires route through fender frame to keep them well protected
- DOT-approved for safety
- Includes all necessary installation hardware
- One-year warranty

REMOVABLE UNIVERSAL MUD FLAPS

- Quick-release, pull-pin removal system for a use-as-needed design
- No drilling required on Jeep® Wrangler JK
- Universal brackets with multiple mounting holes fit a variety of vehicles
- 22" hanger can be cut to match different tire offsets
- One-year warranty

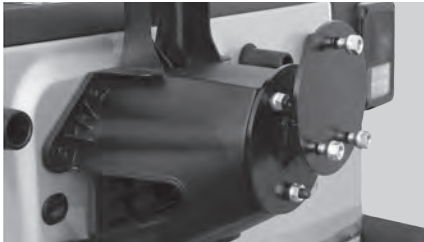

LICENSE PLATE RELOCATION BRACKETS

- Easily bolts onto any ARIES® tube bumper or modular bumper
- Provides a solid mounting location to keep license plate visible
- Steel construction with black powder coat finish
- Includes two license plate mounting bolts

TIRE RELOCATION CARRIER & REINFORCEMENT BRACKETS

- Allows for a larger spare tire up to 35" in diameter
- Fits 2007 - 2016 Jeep® Wrangler JK
- Securely bolts onto existing tire carrier
- Maintains easy access to the rear cargo area
- Steel construction with black powder coat finish
- Includes installation hardware

25630AB

WINDSHIELD LIGHT BRACKETS

- Accepts off-road lights, fog lights, driving lights and more
- Securely bolts on at the windshield hinge
- Easy, no-drill installation
- Durable black powder coat finish
- Includes driver-side and passenger-side brackets

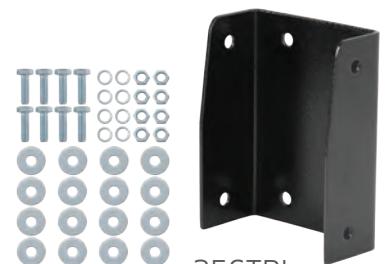

AR15800

THIRD BRAKE LIGHT EXTENSION BRACKET

- Allows brake light to be seen over a spare tire up to 35" in diameter
- Improves safety on and off the road
- Compatible with tire relocation carrier
- Steel construction with black powder coat finish
- Includes installation hardware (some cutting required)

INTERIOR PROTECTION

ARIES

WORK HARD TO PLAY EVEN HARDER

ARIES is aimed at complete protection of your customer's vehicle interior – not just for the floor but for every row and every seat. We offer Seat Defender™ and StyleGuard™ floor liners for interior protection unlike any other.

Seat Defender™ is an innovative, universal and use-as-needed seat protection system that stops damage before it happens, instead of just covering it up. It is easy to install, remove, clean and store.

StyleGuard™ floor liners feature a triple-layer defense, a custom-molded fit and a refined appearance. They break away from the industrial look and offer superior slip resistance using patented OmniGrip™ fibers.

Complete vehicle coverage

Instead of only protecting the vehicle's floor, StyleGuard™ and Seat Defender™ work together to offer a complete, waterproof protection system

Multiple applications

Seat Defender™ comes in two universal sizes, while StyleGuard™ liners are available for a variety of vehicles for individual rows or in complete kits

Durable construction

Seat Defender™ is made with a tough, dual-sided construction, and StyleGuard™ features a triple-layer design with industrial-strength materials

CATEGORY INDEX

SEAT DEFENDER™

with a universal, dual-sided design to protect any seat

/ As-needed protection

The fast, simple design allows it to be used as needed to stop damage instead of just covering it up. It then removes and cleans quickly to be ready for use again

/ Dual-action defense

The bottom layer of thermoplastic rubber grips the seat, while the top layer of 600-denier terylene fabric defends against spills, dirt, pet dander and more

/ Universal design

Seat Defender™ is available in two universal sizes and four different color options. It easily installs on front or rear seats and fits virtually any bucket or bench seat

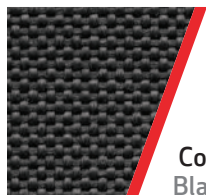

Features and benefits

- Use-as-needed, universal design with dual-layer, non-skid protection
- Fast and easy to remove, clean and store
- Thermoplastic rubber grips the seat, providing added comfort and safety
- Woven 600-denier terylene fabric blocks spills, dirt and more
- 100% waterproof and machine washable
- Allows for side airbag deployment
- Bucket and bench size options fit virtually all vehicles

STYLEGUARD™ FLOOR LINERS

with patented OmniGrip™ fibers

/ Thermoplastic rubber

The top layer of finely-textured thermoplastic rubber (TPR) is strong, durable, wear-resistant and waterproof to stand up to scuffs, dings, spills, drips and more

/ Layered XPE foam

The middle layers of semi-rigid cross-linked polyethylene foam are waterproof, shock-absorbent, sound-insulating and thermostatic for a more comfortable ride

/ OmniGrip™ fibers

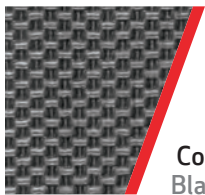

Instead of having two points of contact, the bottom layer of patented OmniGrip™ fibers has thousands. The fibers grip all carpet, preventing shift and providing safety

Features and benefits

- Durable, textured surface for a refined appearance and ultimate interior protection
- Triple-layer construction using industrial-strength materials
- Thousands of patented OmniGrip™ fibers resist slipping on all types of carpet
- Laser-measured for perfect, vehicle-specific contour
- Flexible, breathable rubber will not become brittle over time
- Raised edges contain all liquids and debris
- Resists moisture and reduces engine and road noise
- Simple, instantaneous installation; no extra grip discs required
- Offered in complete kits or individually for the first row, second row or cargo area
- Available for trucks, vans, SUVs, crossovers and passenger cars
- For application guide, see ariesautomotive.com
- Limited lifetime warranty

MARKETING MATERIALS

SHOW THEM THE ARIES DIFFERENCE

At ARIES, we believe that creating a successful business means more than designing and delivering an innovative product line. We believe that supporting our customers is just as important.

Our marketing materials include brochures, signage, displays, crops and more to give you the tools you need to successfully market and sell ARIES products. With our recent rebranding, these materials feature our new logo and style and offer a professional look for the aftermarket dealer.

For both in-store and online use, we also offer extensive image, video and written content resources to inform your customers and increase sales. These assets are available to all ARIES dealers, free of charge. More information is available in the Dealer Portal Media Kit at ariesautomotive.com.

Detailed literature

Our catalogs and brochures present our products with high-res, professional photography and offer detailed information about our products, highlighting our unique selling points

Informative signage

With everything from banners and display boards to header cards and countertop signs, our signage features full-color images and graphics to draw in and educate your customers

Attractive displays

We offer crops and minis for a variety of our products, as well as retail-friendly wall displays and display stands to show off ARIES products, in the best light, to your customers

JEOP® MODULAR BUMPERS

with a mix-and-match design for ultimate customization

- Customizable configuration**
With up to 16 different configurations for the front and three for the rear, the modular design allows pieces to be added as desired, making it easy to find the right look and change it any time.
- Available in aluminum or steel**
ARIES bumpers are available in aluminum or steel, with various finish options. Our aluminum bumpers are constructed with handcast T6 aluminum alloy to be strong, lightweight and rust-free.
- Multiple accessory options**
With mounting tabs and cutouts for LED lights, pre-drilled holes for mounting tow hooks, and a 22-1/2" x 2" DRP housing to accept most types of winches, wiring accessories is easy.

9900038

SIDE BARS

step up and stand out

- AdvantEDGE™ Series**
AdvantEDGE™ side bars have an all-aluminum construction to be lightweight and rust-free, and they feature a unique, eight-sided tube profile to complement the style of today's trucks.
- More applications**
ARIES side bars come in various tube diameters, from 2" up to 4". We offer hundreds of applications, and each of our side bars mounts using vehicle-specific brackets for a custom fit.
- Variety of finishes**
With material options like aluminum, stainless, and custom steel, and optional finishes like brushed black, and polished stainless, you can choose the side bar that best suits your ride.

9900039

STYLEGUARD™ FLOOR LINERS

- Triple-layer construction**
Three distinct materials provide enough material to absorb impact and prevent damage to the vehicle's floor.
- OmniGrip fibers**
These fibers provide superior traction and prevent slipping.
- Custom-modified fit**
Each liner is custom-molded to perfectly conform to its vehicle-specific application.
- Refined, textured surface**
The most durable and custom-molded design comes with a soft, yet textured surface.
