ADVANTEDGE™ SERIES

ALL ALUMINUM. ALL ANGLES.

Today's pickup trucks require accessories that complement their modern features, match their durability in the field and help maintain their high fuel efficiency. The patent pending ARIES AdvantEDGE™ series offers a unique look to complement the modern truck, featuring a 5 1/2" wide, angular, eight-sided tube profile and all-aluminum construction. The AdvantEDGE™ bull bar (page 10), side bars (page 54) and headache rack (page 94) are available in two finishes, and all are backed by a five-year warranty.

VERSATRAC™ MOUNTING SYSTEM

SAVE TIME AND INVENTORY SPACE

VersaTrac™ uses a single set of vehicle-specific brackets to accommodate different side steps. With the brackets installed, any side bar or running board equipped with the VersaTrac™ mounting system can be attached or swapped out whenever desired. This saves you time, money and inventory space. VersaTrac™ is currently available for AdvantEDGE™ side bars (page 54) and RidgeStep™ running boards (page 42). Use the application guide to determine which part numbers will fit your customer's vehicle.

MADE FOR VERSATILITY

ARIES mud flaps have two key advantages: they are universal and removable. The adjustable brackets attach to virtually any vehicle's frame using four bolts. The brackets can be positioned horizontally or vertically to provide a universal fit for almost any application. The brackets provide a vehicle-specific fit on the Jeep Wrangler JK, utilizing the bumper hardware and eliminating the need for drilling.

ARIES mud flaps are also removable, meaning they can be used as needed and removed whenever necessary. They feature a quick-release pull-pin that allows them to be attached to the mounting brackets and detached again in mere seconds. Because mud flaps are illegal on normal roads in some regions, this is especially useful for those who want to enjoy the trail from time to time.
