# AUDIOPIPE 2017

For nearly two decades **Audiopipe** has been the pioneer and leader in Midbass and with over 30 current models we have a solution for nearly every application. This year is another exciting year for our Midbass loudspeaker lineup. We have added by popular demand midbass loudspeakers with built-in compression drivers that can extend the distance and clarity that the music can be heard. We have added more models with Carbon Fiber cones which are lighter, more enduring to harsh environments and sharper on the midbass sound. For outdoor use we have created two new families which use the latest technology in metal plastic baskets, Conex Spiders and silicone-covered lead wires to extend the life and durability of our speakers. Check out the APSW-65CFF and APMB-623CHF.

To complement our **Midbass Loudspeaker** line up we have revamped our Crossover and EQ models. We have added more controls for Midbass frequencies so your sound is as sharp and clear as possible. We have boosted the RCA Audio Line out signals so that your amplifier is receiving the richest and cleanest signal to work as efficient as possible. Check out XV-10BXP. And you will Love our new Mini Motorcycle EQ with a customizable installation bezel that provides a clean finish. Check out the EQ-57MOTO.

For the UTV and Jeep enthusiast, of which we have seen considerable growth in the last few years, we have created compact, durable solutions in both speaker enclosures and water resistant amplifiers. Don't miss the **APMO-5400WR** and **APMO-5200WR**.

Our ever popular line of Mini Amplifiers received several upgrades. The 2017 line up boasts a larger heat sink for better heat dissipation, upgraded mosfets and enlarged heat extractors. We have upgraded the performance on our 5 channel **APMI-55105** and made a larger 4 channel **APMI-4095**.

And yes we have come out with our Car Radio line up. Yes, everyone says we are crazy but we feel there is a need for units with high voltage line out, strong tuners and sharp displays. See our model **RAD-1700BT**.

Our ever popular APCL amplifiers get a revamp in 2017. The new line, which will go by the series name **APCLE**, comes with a flashier heatsink and upgraded power mosfets for more stability in heavier workloads.

And let's not forget the heart of our lineup, woofers! We have built on the super success of our **TXX-BD** line and this year we decided to raise the bar up one notch with the **TXX-BD4** series featuring a quad stacked magnet, composite cone, air cushioned foam surround and Audiopipe's easy connect terminals which facilitate complex wiring configurations and accommodate a larger gauge wire.

Our designs come from the suggestions and requests of our customers. In our never ending quest to make better products we follow your suggestions in materials, design ideas and power handling needs. Audiopipe is here to deliver the products that can handle the Endurance of your Loud and Clear World.

## MIKE BURBA

### WHEN DID YOU FIRST HEAR ABOUT AUDIOPIPE?

I first heard about Audiopipe late in 2014 while i was searching for new brands of audio products for a new build after 15 years of not having a large build.

### WHY DO YOU CHOOSE AUDIOPIPE?

I keep choosing Audiopipe for two reasons: the amazing performance and the price. The performance is always reliable and durable and the price simply can't be beat.

### HOW LONG HAVE YOU BEEN WORKING ALONGSIDE AUDIOPIPE?

Approximately a year and a half.

### WHICH AUDIOPIPE PRODUCTS DO YOU USE AND WHICH HAVE YOU USED?

I am currently running 8 TXX-BD2-12 subwoofers on 4 APCL-15001D's and an APCL-2004 pushing all Audiopipe mids and highs. Also, complete Audiopipe wiring.

### CAN YOU EXPLAIN YOUR EXPERIENCE WITH AUDIOPIPE?

For having 20 years of car audio experience and a year and a half using **AUDIOPIPE**, I could not be more pleased with the performance and reliability of their products.

# HEAD BANGERS

WHEN DID YOU FIRST HEAR OF AUDIOPIPE?

**Steve:** I heard about Audiopipe when I was about sixteen years old; A friend of mine had a 12 inch subwoofer. From then on, my goal was for my first car to be louder than his and Audiopipe helped me chase that dream.

**Reuel:** I came across the brand on a website about two years ago.

WHY DO YOU CONTINUALLY CHOOSE AUDIOPIPE?

**Steve:** The bass and sound quality is just amazing and the product is durable.

**Reuel:** Through my experience with many brands, Audiopipe is the only one that doesn't break.

HOW LONG HAVE YOU BEEN USING AUDIOPIPE PRODUCTS?

**Steve:** I have been using Audiopipe for about three years.

**Reuel:** I have been using the product for about a year and a half.

WHICH AUDIOPIPE PRODUCTS DO YOU USE AND WHICH HAVE YOU USED IN THE PAST?

**Steve:** Since I personally began using Audiopipe I started out with a TXX-BD3-15 subwoofer and an Audiopipe 2000 watt Amplifier. Then I upgraded my setup to two 15 inch subwoofers, two monoblock 2000 watt Amplifiers, and 8 inch component speakers measuring at 143.7 dB.

**Reuel:** I started out with a 12 inch 1000 watt subwoofer but I wanted more so I upgraded to a 15 inch eye candy subwoofer that measures about 139.4 dB.

PLEASE EXPLAIN YOUR EXPERIENCE WITH AUDIOPIPE:

**Steve:** since I had my setups I never ending up blowing up nothing neither changing any parts It just works , I've even changed group members minds with my setup to become an Audiopipe user with the sound quality

**Reuel:** it has never let me down once.

**When did you first hear about Audiopipe?**  
Back in the 90's I heard great things about this company, but it wasn't until two years ago that Lesco introduced me to Audiopipe and I was instantly hooked. The quality and prices can't compare to anyone else.

**Why did you choose Audiopipe?**  
They offer reputable products at a good price, more bang for your buck!

**How long have you been working alongside Audiopipe?**  
Many years and we will be for many more.

**What is your target customer? ... age range? What kind of application is the product used in (personal, professional, competitive)?**  
Our objective is to reach all ages and types of people. We have no boundaries for anyone who wants to have a good and loud sound system.

**Can you tell us about your general experience with Audiopipe?**  
So far, it's an amazing brand that has made a great impact on the audio market. Customers love the products and don't come back to complain.

**CB-150A**

- MANUALLY RESETTABLE CIRCUIT BREAKER
- 150 Amp
  - Platinum plated Terminals
  - Water Resistant
  - High Heat/High Temp Resistant
  - 12V

**CB-200A**

- MANUALLY RESETTABLE CIRCUIT BREAKER
- 200 Amp
  - Platinum plated Terminals
  - Water Resistant
  - High Heat/High Temp Resistant
  - 12V

**AP-V-3**

- 3' 75 OHM RCA VIDEO CABLE
- Gold plated corrosion resistant connectors
  - Flexible and Durable PVC outer jacket
  - Actual 75 Ohm coaxial cable
  - Micro-Line strands of braided Oxygen free copper
  - Large color-coded textured rubber grip

**AP-V-6**

- 6' 75 OHM RCA VIDEO CABLE
- Gold plated corrosion resistant connectors
  - Flexible and Durable PVC outer jacket
  - Actual 75 Ohm coaxial cable
  - Micro-Line strands of braided Oxygen free copper
  - Large color-coded textured rubber grip

**AP-V-12**

- 12' 75 OHM RCA VIDEO CABLE
- Gold plated corrosion resistant connectors
  - Flexible and Durable PVC outer jacket
  - Actual 75 Ohm coaxial cable
  - Micro-Line strands of braided Oxygen free copper
  - Large color-coded textured rubber grip

**AP-V-15**

- 15' 75 OHM RCA VIDEO CABLE
- Gold plated corrosion resistant connectors
  - Flexible and Durable PVC outer jacket
  - Actual 75 Ohm coaxial cable
  - Micro-Line strands of braided Oxygen free copper
  - Large color-coded textured rubber grip

**AP-V-20**

- 20' 75 OHM RCA VIDEO CABLE
- Gold plated corrosion resistant connectors
  - Flexible and Durable PVC outer jacket
  - Actual 75 Ohm coaxial cable
  - Micro-Line strands of braided Oxygen free copper
  - Large color-coded textured rubber grip

**APNR-3002**

- HI/LOW IMPEDANCE ADAPTOR
- Full DC Isolation
  - Converts from 25-55 Watts per Channel Pre-Amp Output
  - Adjustable Line Output Converter
  - Adjustable from 0 to 1,000 Mv

**APNR-2002**

- HI/LOW IMPEDANCE ADAPTOR
- Full DC Isolation
  - Converts from 15-35 Watts per Channel Pre-Amp Output
  - Adjustable Line Output Converter
  - Adjustable from 0 to 1,000 Mv

**APNR-MLRN**

**MULTI AMPLIFIER REMOTE TURN-ON**

- Remote Expander
- Max Output Current: 30A
- Control the 12V Output of Remote
- Full DC Isolation
- Adjustable Line Output Converter
- Adjustable from 0 to 1,000 Millivolts
- Converts from 45-65 Watts per Channel Pre-Amp Output

**APNR-RM**

**LINE OUTPUT CONVERTER WITH REMOTE TURN ON**

- Gold Female RCA Output
- Adjustable Line Output Converter
- Converts from 10 to 25 Watts per Channel to Pre-Amp Output
- Remote Turn On Circuit

**APNR-NR100**

**HI/LOW IMPEDANCE ADAPTER**

- Full DC Isolation
- Adjustable Attenuation
- Dual Channel

**APNR-160**

- Ground Loop Isolator
- Noise Elimination Between Car Stereo, EQ, CB or Car Amp
- RCA Signal Isolator

**APNR-RM4**

**HI/LOW IMPEDANCE ADAPTOR**

- Full DC Isolation
- Converts from 45-65 Watts per Channel
- Pre-Amp Output
- Adjustable Line Output Converter
- Adjustable from 0 to 1,000 Mv
