"Lakeside Rods uses Billet Specialties products on every car we build. Precision quality and fit every time"

- ROGER BURMAN - LAKESIDE RODS & RIDES

- 2012 SEMA Mothers Shine Award
- 2012 Goodguys Muscle Machine of the Year
- 2007 America's Most Beautiful Roadster
- 2006 Ridler Award
- 2004 Goodguys Custom Rod of the Year

**AMERICAN MADE QUALITY** first and foremost. Billet Specialties has been on the forefront of manufacturing billet aluminum wheels and accessories since 1985. With the most diverse lineup of products in the industry, Billet Specialties has become the go-to manufacturer that top builders use and trust. This recognition comes from years of experience, enthusiasm and innovation conceived into each and every product, instruction sheet and product package.

*"Every time I come up here, I challenge these guys and every time I challenge them - it comes out better. Everything is done in house, from concept to reality. Their quality and design is irreplaceable and that is why I choose Billet Specialties"*

**- Troy Trepanier - RAD RIDES BY TROY**

- 2007 Ridler Award
- 1998 Goodguys Custom Rod of the Year
- 2002 Goodguys Street Machine of the Year
- 2008 Goodguys Muscle Machine of the Year
- 2004 Goodguys Street Rod of the Year
- 2002, 2004 & 2012 Mothers Shine Award

# CHEVROLET® TRU TRAC KITS

SMALL BLOCK, BIG BLOCK, 348/409

"Top notch hardware, Quality components, compact design and professional engineering. You cannot beat the Tru Trac"

- RAD RIDES BY TROY

## BILLET A/C MANIFOLD

Kits with AC include our billet aluminum AC manifold, engineered not only to provide an efficient attachment point for the AC hoses, but to look good as well. In fact, so good and efficient we patented it!

## BILLET TENSIONER

Our billet aluminum tensioner optimizes belt and accessory life with constant and correct tension; eliminating belt-slip while minimizing parasitic horsepower loss. Every modern car has a tensioner—so should your classic.

## DURABILITY

Pulleys that are in contact with the back of the belt are subject to high wear. Billet Specialties hard coat anodizes these areas to eliminate wear altogether. Hard coat anodized aluminum actually provides a harder surface than stock steel pulleys!

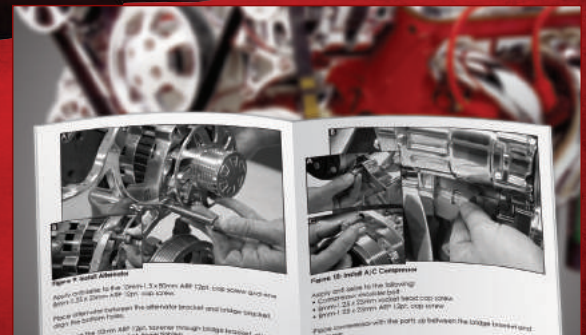

## STAINLESS STANDOFFS

Our stainless stand-offs provide the most rigid platform in the industry, while maintaining perfect alignment between the accessories. Machined from 303 stainless steel to provide corrosion resistance and double the surface area while adding ease of assembly.

## FASTENERS

Tru Trac kits are assembled with 18-8 stainless steel fasteners, offering not only corrosion resistance, but professional appearance and high tensile strength. ARP 12pt. fasteners also match many other Billet Specialties accessories.

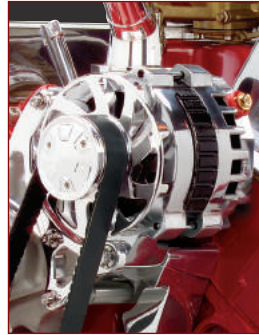

## EASE OF INSTALLATION

With our comprehensive instruction booklet and pre-installed alternator and power steering pulleys, installing a Tru Trac is easy.

## THE BEST BRANDS INCLUDED!

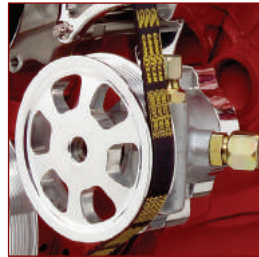

Designed and cast in the USA, Edelbrock water pumps provide maximum flow, maximum pressure and equal distribution to both sides of the block within 1%. Featuring Edelbrock's industry leading precision powdered metal impeller with modern vane design that is larger than other high-performance pumps along with the precision machined computer designed A-356 cast pump housing.

Billet Specialties supplies a new 140 amp Powermaster alternator in every Tru Trac kit. Each Powermaster alternator is 100% new. With a high amp output at idle, internally regulated architecture and internal fan with a gold plated battery post. Each 140 amp alternator is pre-tested and includes a proof of performance tag showing output at idle and at highway speeds. Best of all, Powermaster alternators are made right here in the USA.

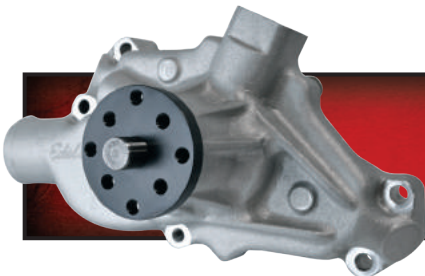

Sanden manufactures and supplies compressors for some of the largest automotive manufacturers in the world. The SD-7 is a high efficiency modern compact compressor ensuring better performance and aesthetics over early 508 compressors while keeping you cool and comfortable.

Kits with power steering feature modern TC style pumps, used by OEM manufacturers and various applications from NASCAR, Off Road and Road Racing. We supply the pumps with -10AN supply and -6AN pressure nipples installed. Featuring a sealed front bearing and precision internals, each high performance pump is calibrated to 1200 PSI and flows at 3.5 GPM.

## STANDARD POLISHED AND BLACK ANODIZED KITS INCLUDE:

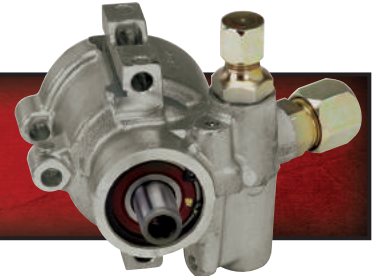

### Natural Finish Water Pump

The traditional look of performance for decades, the natural cast look easily matches your cast intake manifold and power steering pump.

### Polished 140 amp Alternator

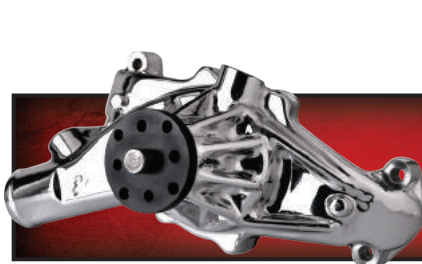

Powermaster USA made quality, precision cast and polished case with the best internal components in the industry.

### Natural Finish Power Steering Pump

Matches the natural finish Edelbrock water pump and we pre-install the pulley for ease of installation.

## PREMIUM KITS INCLUDE:

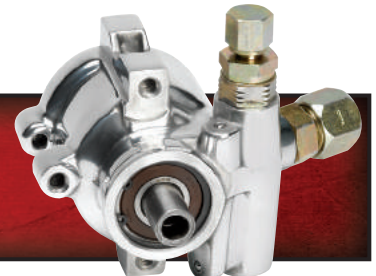

### EnduraShine™ Water Pump

EnduraShine is a bright chrome like vacuum metallized finish that matches our polished billet aluminum components.

### Optional Billet Aluminum 140 amp Alternator

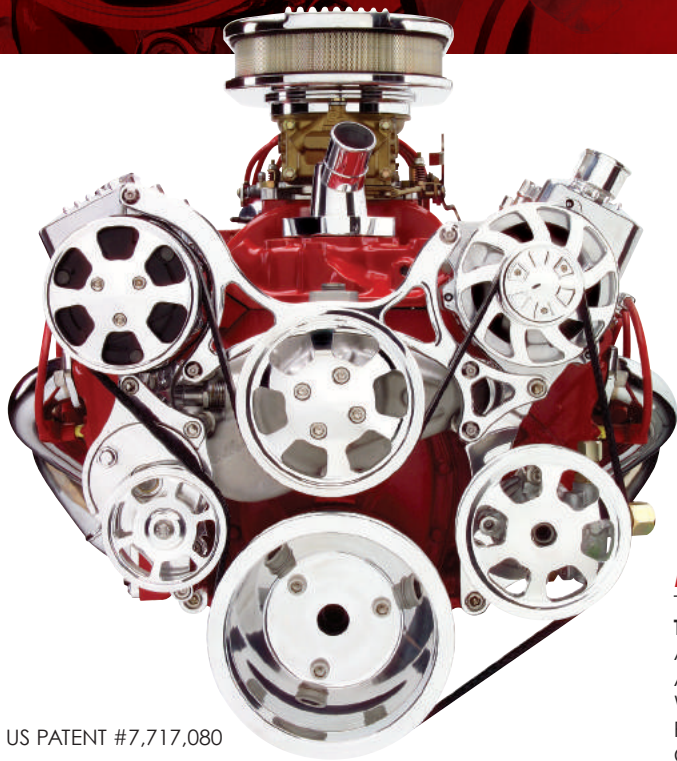

Truly the crown jewel of the Premium kit. The precision machined 6061-T6 billet case makes this the ultimate alternator.

### Polished Power Steering Pump

Show quality polish and pre-installed pulley for ease of installation.

# CHEVROLET® SMALL BLOCK

US PATENT #7,717,080

#### All Kits Feature:

- Exclusive billet aluminum tensioner
- Polished ARP 12-point stainless steel fasteners
- Hard-coat anodizing for durability in high-wear areas
- Continental Elite serpentine belt
- Comprehensive instruction manual

\*Tru Trac systems are not designed for use with hydroboost brake systems\*

## BIG STYLE FOR YOUR SMALL BLOCK

The Tru Trac for small block Chevrolet® patented design mounts between the water pump and the engine block via positive O-ring seal. It works with all cylinder head configurations. Early model, late model, or Vortec™ - Tru Trac fits them all.

Featuring the best brands in aftermarket performance:

## THE BEST YOUR BIG BLOCK HAS EVER LOOKED...

There is no substitute for big block horsepower and torque - the efficiency of a Tru Trac system ensures you get the most out of your motor. Engineered to fit any cylinder head and manifold configuration, the big block Tru Trac's exclusive billet aluminum tensioner keeps constant even tension allowing the 140 amp alternator and Edelbrock water pump to run at full potential without fear of belt slip. The compact design fits easily into the tightest engine compartments truly making it the ultimate serpentine system.

## A LEGEND GETS A FACELIFT

It was feared on the drag strips and boulevards across America. Its monster torque punished the asphalt. It was the first production big block. It was immortalized in a song, and in only seven years of production the 348/409 became a legend. Take your legend to the next level with a Tru Trac kit featuring modern true serpentine performance, compact profile and timeless style.

## BILLET A/C MANIFOLD

Kits with AC include our billet aluminum AC manifold, engineered not only to provide an efficient attachment point for the AC hoses, but to look good as well. In fact, so good and efficient we patented it!

## DURABILITY

Pulleys that are in contact with the back of the belt are subject to high wear. Billet Specialties hard coat anodizes these areas to eliminate wear altogether. Hard coat anodized aluminum actually provides a harder surface than stock steel pulleys!

## BILLET TENSIONER

Our billet aluminum tensioner optimizes belt and accessory life with constant and correct tension; eliminating belt-slip while minimizing parasitic horsepower loss. Every modern car has a tensioner—so should your classic.

## STAINLESS STANDOFFS

Our stainless stand-offs provide the most rigid platform in the industry, while maintaining perfect alignment between the accessories. Machined from 303 stainless steel to provide corrosion resistance and double the surface area while adding ease of assembly.

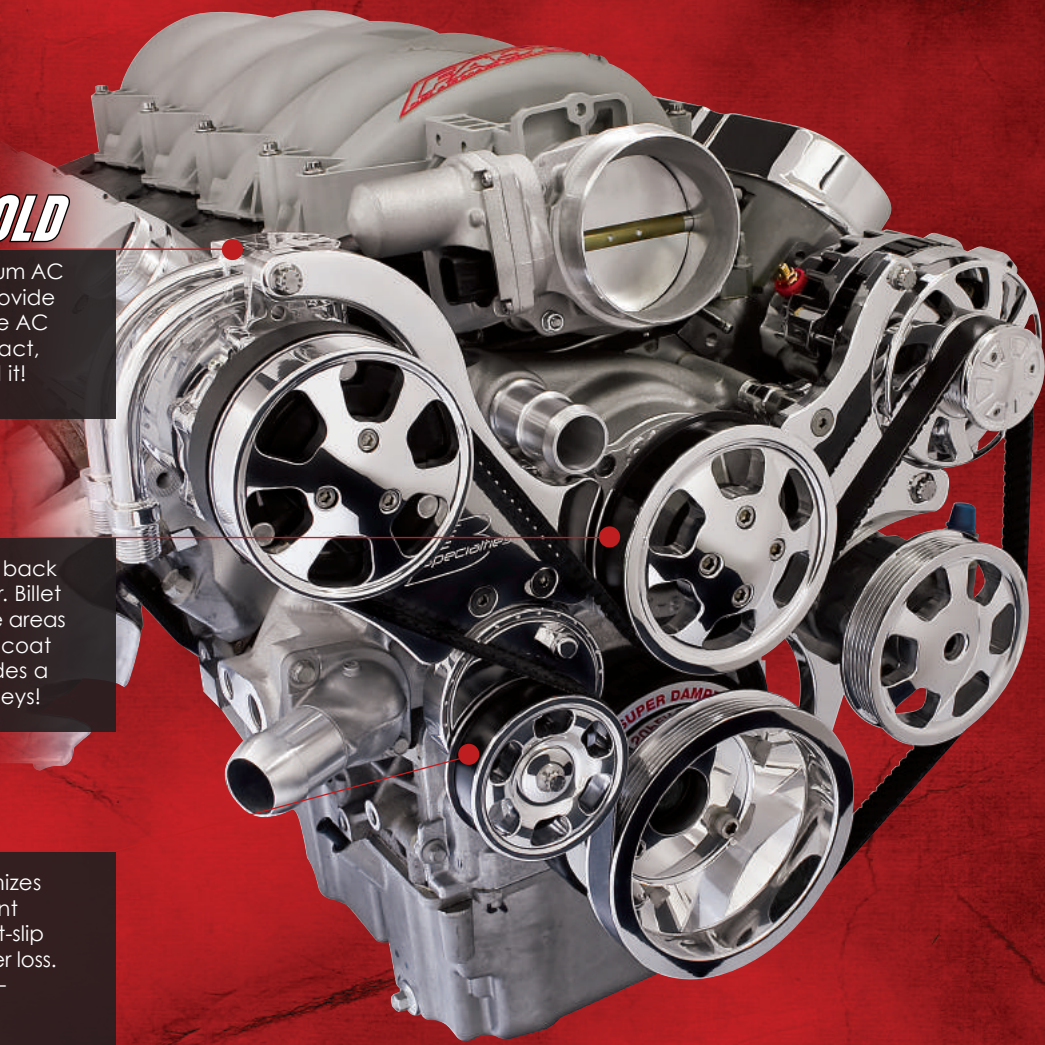

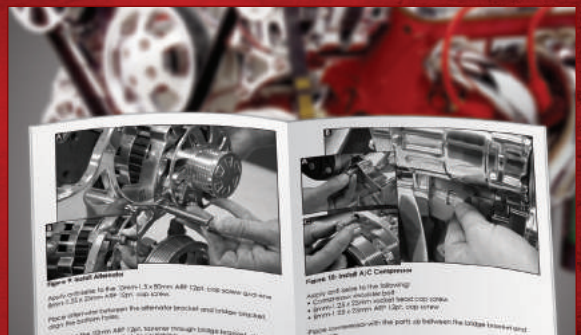

## FASTENERS

Tru Trac Kits are assembled with 18-8 stainless steel fasteners, offering not only corrosion resistance, but professional appearance and high tensile strength. ARP 12pt. fasteners also match many other Billet Specialties accessories.

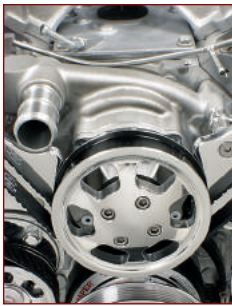

## EASE OF INSTALLATION

With our comprehensive instruction booklet and pre-installed alternator and power steering pulleys, installing a Tru Trac is easy.

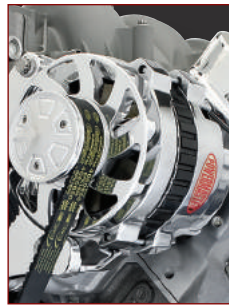

## THE BEST BRANDS INCLUDED!

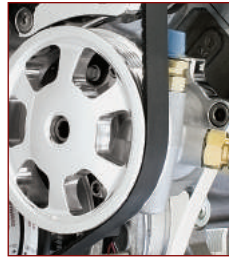

Designed and cast in the USA, Edelbrock water pumps provide maximum flow, maximum pressure and equal distribution to both sides of the block within 1%. Featuring Edelbrock's industry leading precision powered metal impeller with modern vane design that is larger than other high-performance pumps along with the precision machined computer designed A-356 Cast pump housing.

Billet Specialties supplies a new 140 amp Powermaster alternator in every Tru Trac kit. Each Powermaster alternator is 100% new. With a high amp output at idle, internally regulated architecture and internal fan with a gold plated battery post. Each 140 amp alternator is pre-tested and includes a proof of performance tag showing output at idle and at highway speeds. Best of all, Powermaster alternators are made right here in the USA.

Sanden manufactures and supplies compressors for some of the largest automotive manufacturers in the world. The SD-7 is a high efficiency modern compact compressor ensuring better performance and aesthetics over early 508 compressors while keeping you cool and comfortable.

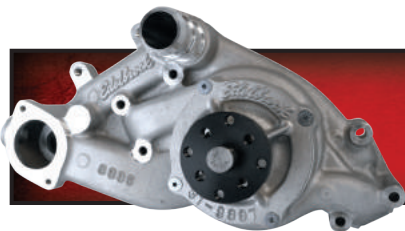

Kits with power steering feature modern TC style pumps, used by OEM manufacturers and various applications from NASCAR, Off Road and Road Racing. We supply the pumps with -10AN supply and -6AN pressure nipples installed. Featuring a sealed front bearing and precision internals, each high performance pump is calibrated to 1200 PSI and flows at 3.5 GPM.

Top mount LS kits include an ATI Super Damper. ATI has been manufacturing quality products for over 50 years and can be found on race winning vehicles worldwide and on GM performance crate motors. The ATI damper exceeds SFI 18.1 specs while eliminating torsional crankshaft vibrations.

## STANDARD POLISHED AND BLACK ANODIZED KITS INCLUDE:

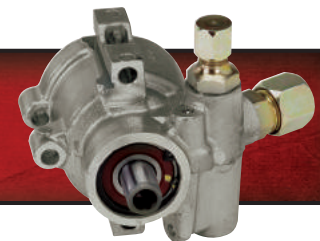

### Natural Finish Water Pump

The traditional look of performance for decades, the natural cast look easily matches your cast intake manifold and power steering pump.

### Polished 140 amp Alternator

Powermaster USA made quality, precision cast and polished case with the best internal components in the industry.

### Natural Finish Power Steering Pump

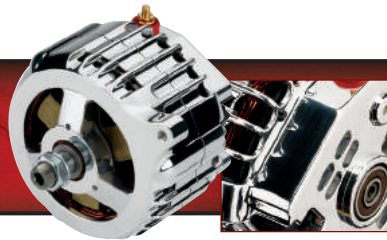

Matches the natural finish Edelbrock water pump and we pre-install the pulley for ease of installation.

## PREMIUM KITS INCLUDE:

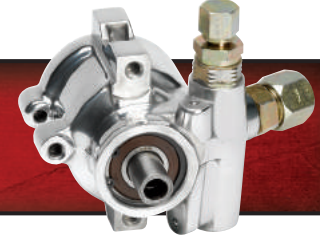

### Natural Finish Water Pump

The traditional look of performance for decades, the natural cast look easily matches your cast intake manifold and power steering pump.

### Optional Billet Aluminum 140 amp Alternator

Truly the crown jewel of the Premium kit. The precision machined 6061-T6 billet case makes this the ultimate alternator.

### Polished Power Steering Pump

Show quality polish and pre-installed pulley for ease of installation.

## TOP MOUNT CONFIGURATION

Patent-Pending

### All Kits Feature:

- Exclusive billet aluminum tensioner
- Polished ARP 12-point stainless steel fasteners
- Hard-coat anodizing for durability in high-wear areas
- Continental Elite serpentine belt
- Comprehensive instruction manual

\*Tru Trac systems are not designed for use with hydroboost brake systems\*

### BIG ON STYLE. BIG ON PERFORMANCE.

The LS platform is becoming the go-to engine for Chevy enthusiasts and keeping pace is Billet Specialties Top mount LS Tru Trac. Engineered to clear cross members and steering boxes of muscle cars all the while keeping a slim profile, the LS top mount kit includes all the essentials for a complete engine accessory drive. The Tru Trac's exclusive billet aluminum tensioner keeps constant even tension allowing the 140 amp alternator and Edelbrock water pump to run at full potential without fear of belt slip.

Featuring the best brands in aftermarket performance:

"We were truly impressed with the performance and reliability of the Tru Trac on the dyno. This is the only way to go for a front accessory drive system"  
-ROUSH

## **BILLET A/C MANIFOLD**

Kits with AC include our billet aluminum AC manifold, engineered not only to provide an efficient attachment point for the AC hoses, but to look good as well. In fact, so good and efficient we patented it!

## **DURABILITY**

Pulleys that are in contact with the back of the belt are subject to high wear. Billet Specialties hard coat anodizes these areas to eliminate wear altogether. Hard coat anodized aluminum actually provides a harder surface than stock steel pulleys!

## **BILLET TENSIONER**

Our billet aluminum tensioner optimizes belt and accessory life with constant and correct tension; eliminating belt-slip while minimizing parasitic horsepower loss. Every modern car has a tensioner—so should your classic.

## **STAINLESS STANDOFFS**

Our stainless stand-offs provide the most rigid platform in the industry, while maintaining perfect alignment between the accessories. Machined from 303 stainless steel to provide corrosion resistance and double the surface area while adding ease of assembly.

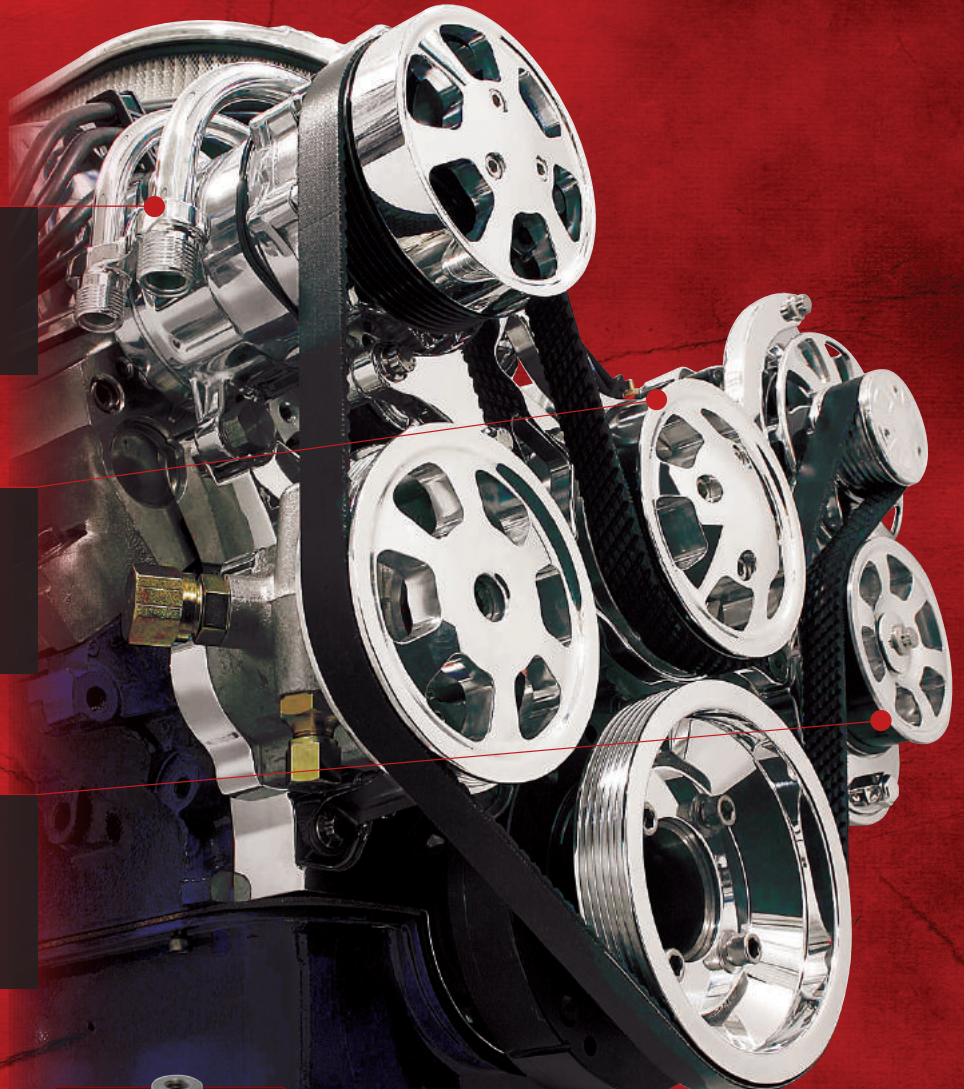

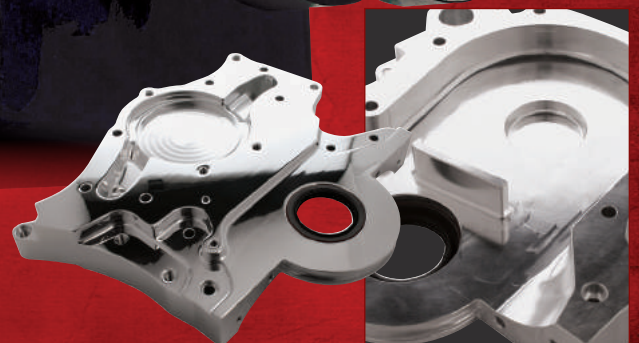

## **FASTENERS**

Tru Trac kits are assembled with 18-8 stainless steel fasteners, offering not only corrosion resistance, but professional appearance and high tensile strength. ARP 12pt. fasteners also match many other Billet Specialties accessories.

## **BILLET TIMING COVER**

True innovation. Our Small Block and Big Block kits feature our exclusive 100% billet aluminum timing cover. This machining marvel supports the components for rock-solid stability while bringing them closer to the block for overall engine clearance.

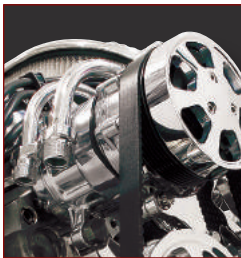

## THE BEST BRANDS INCLUDED!

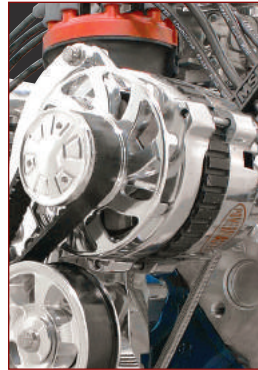

With over 110 years of racing experience, Ford Racing knows their parts. The Ford Racing water pump included in the small block kits provides superior cooling so your car's operating temperature stays constant.

Edelbrock water pumps provide maximum cooling, utilizing state of the art racing technology. Edelbrock water pumps ensure greater cooling efficiency and reliability for your Big Block 429/460 or FE Tru Trac kit.

Sanden manufactures and supplies compressors for some of the largest automotive manufacturers in the world. The SD-7 is a high efficiency modern compact compressor ensuring better performance and aesthetics over early 508 compressors while keeping you cool and comfortable.

Billet Specialties supplies a new 140 amp Powermaster alternator in every Tru Trac kit. Each Powermaster alternator is 100% new. With a high amp output at idle, internally regulated architecture and internal fan with a gold plated battery post. Each 140 amp alternator is pre-tested and includes a proof of performance tag showing output at idle and at highway speeds. Best of all, Powermaster alternators are made right here in the USA.

Kits with power steering feature modern TC style pumps, used by OEM manufacturers and various applications from NASCAR, Off Road and Road Racing. We supply the pumps with -10AN supply and -6AN pressure nipples installed. Featuring a sealed front bearing and precision internals, each high performance pump is calibrated to 1200 PSI and flows at 3.5 GPM.

## STANDARD POLISHED AND BLACK ANODIZED KITS INCLUDE:

### Natural Finish Water Pump

The traditional look of performance for decades, the natural cast look easily matches your cast intake manifold and power steering pump.

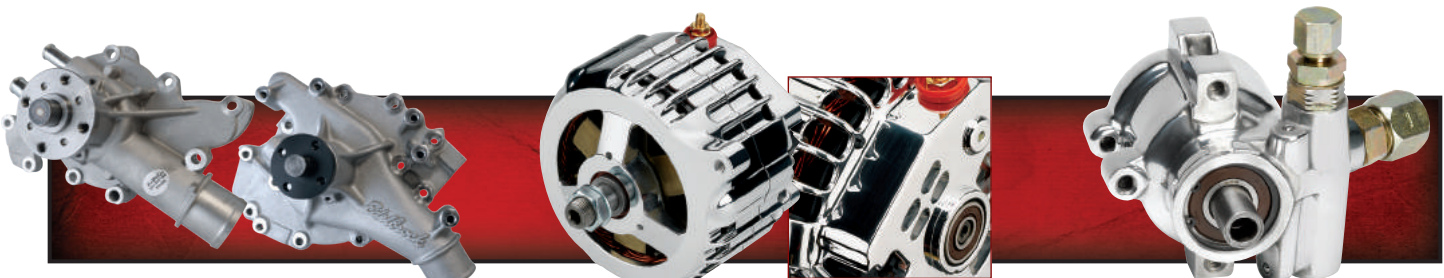

### Polished 140 amp Alternator

Powermaster USA made quality, precision cast and polished case with the best internal components in the industry.

### Natural Finish Power Steering Pump

Matches the natural finish Edelbrock water pump and we pre-install the pulley for ease of installation.

## PREMIUM KITS INCLUDE:

### Natural Finish Water Pump

The traditional look of performance for decades, the natural cast look easily matches your cast intake manifold and power steering pump.

### Optional Billet Aluminum 140 amp Alternator

Truly the crown jewel of the Premium kit. The precision machined 6061-T6 billet case makes this the ultimate alternator.

### Polished Power Steering Pump

Show quality polish and pre-installed pulley for ease of installation.

-BOBBY ALLOWAY

## BILLET A/C MANIFOLD

Kits with AC include our billet aluminum AC manifold, engineered not only to provide an efficient attachment point for the AC hoses, but to look good as well. In fact, so good and efficient we patented it!

## BILLET TENSIONER

Our billet aluminum tensioner optimizes belt and accessory life with constant and correct tension; eliminating belt-slip while minimizing parasitic horsepower loss. Every modern car has a tensioner—so should your classic.

## DURABILITY

Pulleys that are in contact with the back of the belt are subject to high wear. Billet Specialties hard coat anodizes these areas to eliminate wear altogether. Hard coat anodized aluminum actually provides a harder surface than stock steel pulleys!

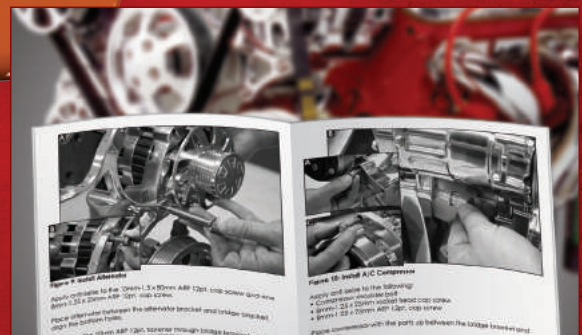

## STAINLESS STANDOFFS

Our stainless stand-offs provide the most rigid platform in the industry, while maintaining perfect alignment between the accessories. Machined from 303 stainless steel to provide corrosion resistance and double the surface area while adding ease of assembly.

## FASTENERS

Tru Trac kits are assembled with 18-8 stainless steel fasteners, offering not only corrosion resistance, but professional appearance and high tensile strength. ARP 12pt. fasteners also match many other Billet Specialties accessories.

## EASE OF INSTALLATION

With our comprehensive instruction booklet and pre-installed alternator and power steering pulleys, installing a Tru Trac is easy.

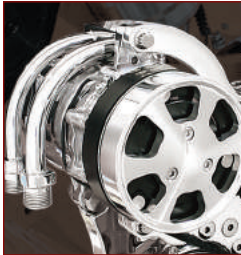

## THE BEST BRANDS INCLUDED!

Big block and HEMI Tru Tracs include a new natural cast finish aluminum water pump housing and Mopar Performance water pump. The eight-blade impeller will keep your engine temp in check on those hot summer days.

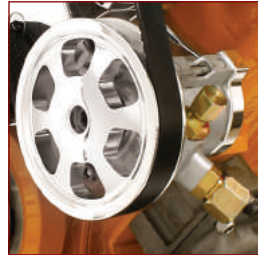

Edelbrock water pumps provide maximum cooling, utilizing state of the art racing technology. Edelbrock water pumps ensure greater cooling efficiency and reliability for your small block Chrysler Tru Trac kit.

Sanden manufactures and supplies compressors for some of the largest automotive manufacturers in the world. The SD-7 is a high efficiency modern compact compressor ensuring better performance and aesthetics over early 508 compressors while keeping you cool and comfortable.

Billet Specialties supplies a new 140 amp Powermaster alternator in every Tru Trac kit. Each Powermaster alternator is 100% new. With a high amp output at idle, internally regulated architecture and internal fan with a gold plated battery post. Each 140 amp alternator is pre-tested and includes a proof of performance tag showing output at idle and at highway speeds. Best of all, Powermaster alternators are made right here in the USA.

Kits with power steering feature modern TC style pumps, used by OEM manufacturers and various applications from NASCAR, Off Road and Road Racing. We supply the pumps with -10AN supply and -6AN pressure nipples installed. Featuring a sealed front bearing and precision internals, each high performance pump is calibrated to 1200 PSI and flows at 3.5 GPM.

## STANDARD POLISHED AND BLACK ANODIZED KITS INCLUDE:

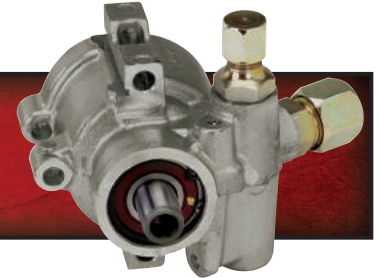

### Natural Finish Water Pump

The traditional look of performance for decades, the natural cast look easily matches your cast intake manifold and power steering pump.

### Polished 140 amp Alternator

Powermaster USA made quality, precision cast and polished case with the best internal components in the industry.

### Natural Finish Power Steering

Matches the natural finish Edelbrock water pump and we pre-install the pulley for ease of installation.

## PREMIUM KITS INCLUDE:

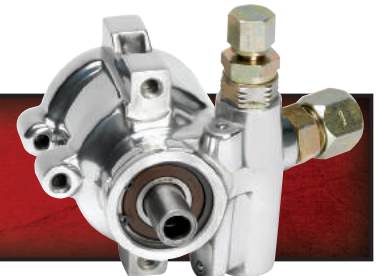

### Natural Finish Water Pump

The traditional look of performance for decades, the natural cast look easily matches your cast intake manifold and power steering pump.

### Optional Billet Aluminum 140 amp Alternator

Truly the crown jewel of the Premium kit. The precision machined 6061-T6 billet case makes this the ultimate alternator.

### Polished Power Steering Pump

Show quality polish and pre-installed pulley for ease of installation.

# PONTIAC TRU TRAC KITS

326/455

## BILLET A/C MANIFOLD

Kits with AC include our billet aluminum AC manifold, engineered not only to provide an efficient attachment point for the AC hoses, but to look good as well. In fact, so good and efficient we patented it!

## BILLET TENSIONER

Our billet aluminum tensioner optimizes belt and accessory life with constant and correct tension; eliminating belt-slip while minimizing parasitic horsepower loss. Every modern car has a tensioner—so should your classic.

## DURABILITY

Pulleys that are in contact with the back of the belt are subject to high wear. Billet Specialties hard coat anodizes these areas to eliminate wear altogether. Hard coat anodized aluminum actually provides a harder surface than stock steel pulleys!

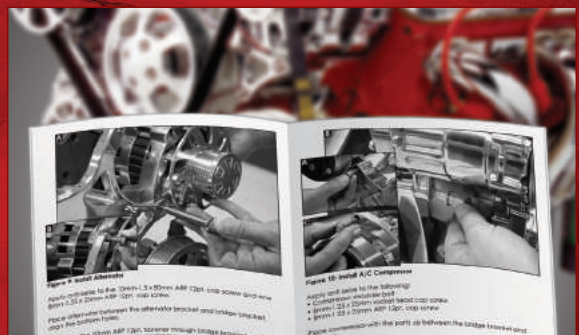

## STAINLESS STANDOFFS

Our stainless stand-offs provide the most rigid platform in the industry, while maintaining perfect alignment between the accessories. Machined from 303 stainless steel to provide corrosion resistance and double the surface area while adding ease of assembly.

## FASTENERS

Tru Trac kits are assembled with 18-8 stainless steel fasteners, offering not only corrosion resistance, but professional appearance and high tensile strength. ARP 12pt. fasteners also match many other Billet Specialties accessories.

## EASE OF INSTALLATION

With our comprehensive instruction booklet and pre-installed alternator and power steering pulleys, installing a Tru Trac is easy.

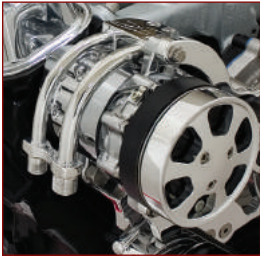

## THE BEST BRANDS INCLUDED!

Designed and cast in the USA, Edelbrock water pumps provide maximum flow, maximum pressure and equal distribution to both sides of the block within 1%. Featuring Edelbrock's industry leading precision powered metal impeller with modern vane design that is larger than other high-performance pumps along with the precision machined computer designed A-356 Cast pump housing.

Billet Specialties supplies a new 140 amp Powermaster alternator in every Tru Trac kit. Each Powermaster alternator is 100% new. With a high amp output at idle, internally regulated architecture and internal fan with a gold plated battery post. Each 140 amp alternator is pre-tested and includes a proof of performance tag showing output at idle and at highway speeds. Best of all, Powermaster alternators are made right here in the USA.

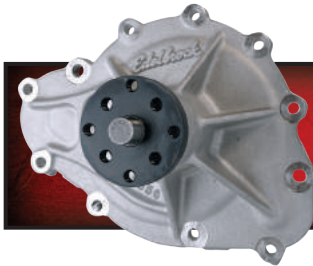

Sanden manufactures and supplies compressors for some of the largest automotive manufacturers in the world. The SD-7 is a high efficiency modern compact compressor ensuring better performance and aesthetics over early 508 compressors while keeping you cool and comfortable.

Kits with power steering feature modern TC style pumps, used by OEM manufacturers and various applications from NASCAR, Off Road and Road Racing. We supply the pumps with -10AN supply and -6AN pressure nipples installed. Featuring a sealed front bearing and precision internals, each high performance pump is calibrated to 1200 PSI and flows at 3.5 GPM.

## STANDARD POLISHED AND BLACK ANODIZED KITS INCLUDE:

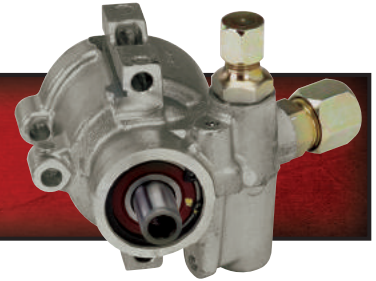

### Natural Finish Water Pump

The traditional look of performance for decades, the natural cast look easily matches your cast intake manifold and power steering pump.

### Polished 140 amp Alternator

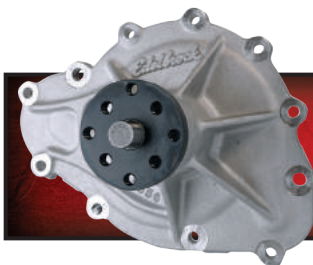

Powermaster USA made quality, precision cast and polished case with the best internal components in the industry.

### Natural Finish Power Steering Pump

Matches the natural finish Edelbrock water pump and we pre-install the pulley for ease of installation.

## PREMIUM KITS INCLUDE:

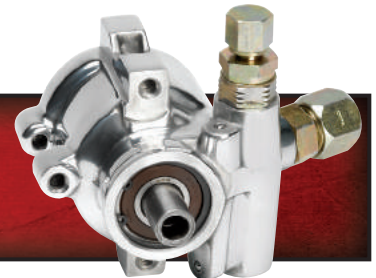

### Natural Finish Water Pump

The traditional look of performance for decades, the natural cast look easily matches your cast intake manifold and power steering pump.

### Optional Billet Aluminum 140 amp Alternator

Truly the crown jewel of the Premium kit. The precision machined 6061-T6 billet case makes this the ultimate alternator.

### Polished Power Steering Pump

Show quality polish and pre-installed pulley for ease of installation.

### SMALL BLOCK CHEVROLET® A/C add-on Kit For Top or Mid-Mount - Alternator, AC & Power Steering Kit

In an effort to simplify things while providing the ability to add A/C to an existing kit purchased without A/C Bracket. Billet specialties now offers the A/C add-on kit separately.

Includes: Alternator Bracket, Turn Buckle, Idler Pulley and Compressor Clutch cover

#FM1320PC Serpentine Conversion Kit - SBC A/C Add-On Polished  
#BLKFM1320 Serpentine Conversion Kit - SBC A/C Add-On Black

#### Fits the following part numbers:

FM2111PC & FM2112PC Top Mount-Alternator & Power Steering Kit  
FM2121PC & FM2122PC Mid Mount-Alternator & Power Steering Kit

**Important: This kit only works with above listed kits**

### KNOW THE DIFFERENCE...

Our Serpentine Conversion Kits give you much more for less money. All with genuine Billet Specialties quality!

#### Billet Specialties Serpentine Conversion Kits:

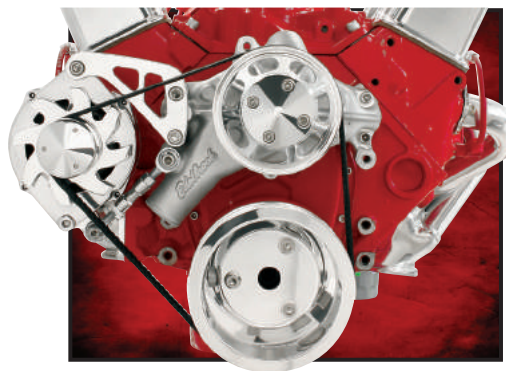

- Mirror Polished Finish
- Stainless Steel Hardware Included
- Polished Stainless Steel Turnbuckles
- Nose Cones included on Alternator, Water Pump, & Idler Pulleys
- Comprehensive Installation Instructions
- CNC machined billet stylized pulley design - At No Extra Charge
- Exclusive dual idler pulley system for A/C kits to keep belt tension

#### Their Bracket Kits:

- Machine Finish
- Zinc Plated Steel Hardware
- Raw Stainless Finish Turnbuckles
- Nose Cones Sold Separately
- Single Diagram
- Blank, plain-faced pulleys
- Single idler pulley allows belt slacking

### TECH TIP: STAINLESS VS. ZINC PLATED

Billet Specialties knows why you replace the factory accessories on your car. We'll help you improve your style and performance with the highest quality components available. We never skimp on the details and that's why you get stainless steel hardware with every Billet Specialties pulley and bracket kit.

Even new vehicles are equipped with stainless hardware. The fact is - zinc-plated steel doesn't stand up to vehicle manufacturer's tests for strength and durability. Stainless steel beats zinc hands down in looks, performance and quality. Billet Specialties supplies the best because you demand it!

## DO IT RIGHT!

All Billet Specialties Tru Trac, V-Trac and Serpentine Conversion kits are designed for the most rigid final assembly in the industry. Here is why:

### STRENGTH

By using solid stainless stand-offs and threaded block mounting studs - rather than long bolts through a saw-cut tubing spacer - flex, fatigue and failure are non-existent.

### PRECISION

Our stand-offs are designed for precise positioning and alignment of components, not just "spacing". Each stand-off is CNC machined within .002" - a tolerance that cannot be met with saw-cut tubing.

### DOUBLE THE SURFACE AREA

Stand-offs have over twice the contact surface area compared to a cut piece of tubing. With two times more thread engagement, stand-offs ensure greater clamping force.

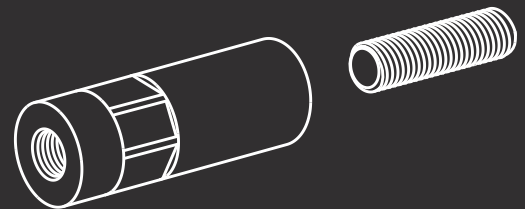

### CORROSION RESISTANCE

Stainless steel stand-offs and hardware resist corrosion compared to mild steel and zinc plated fasteners.

### EASE OF ASSEMBLY

Stand-offs enable straight forward assembly allowing you to install the water pump before the accessory bracket. Each piece goes together in a logical order. No component / bracket / fastener juggling or balancing acts required.

**BILLET SPECIALTIES**  
STAINLESS STAND-OFF

VS.

**COMPETITORS**  
CUT TUBING SPACER

**ABSOLUTELY THE STRONGEST, MOST RIGID METHOD. PERIOD.**

# INDEPENDENT MOUNT BRACKETS

## SMALL BLOCK CHEVROLET® - (SHORT WATER PUMP)

### SMALL BLOCK CHEVROLET® Original Top Mount Air/Alternator Bracket

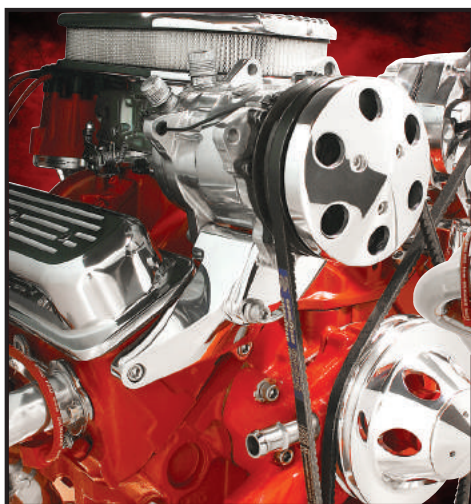

#### Designed for use with:

- Short water pump
- GM 10SI / 12SI alternator
- Sanden 508 AC compressor

This bracket is ideal for small block Chevrolet® motors that do not have mounting holes in the cylinder heads. The bracket mounts to the water pump and intake manifold.

Not for use with a GM compressor, superchargers, TPI, 3-deuce set-ups, or Air Gap Manifolds.

#10120

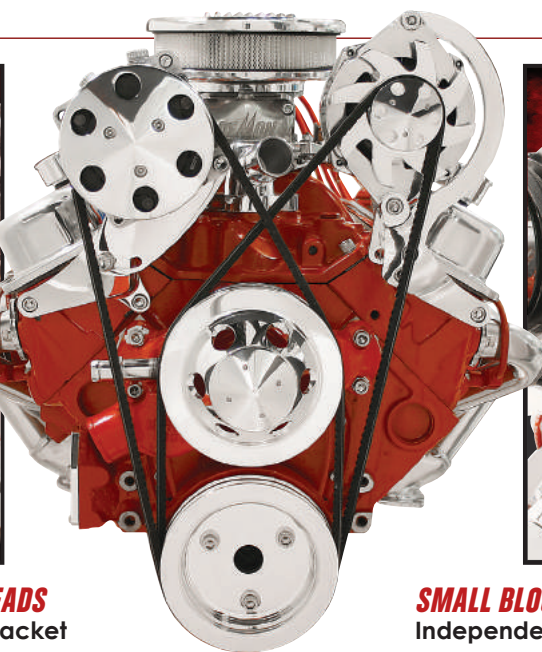

### SMALL BLOCK CHEVROLET® - VORTEC™ HEADS Independent Top Mount- Compressor Bracket

#### Designed for use with:

- Short water pump
- Sanden 508 AC compressor
- V-groove pulleys (Pages 53-54)

Mounts to the passenger side of the motor and positions the compressor to the inside of the passenger side valve cover. Independently adjustable.

#10721

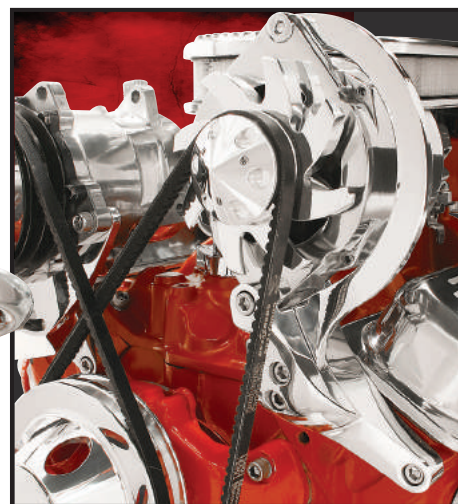

### SMALL BLOCK CHEVROLET® - VORTEC™ HEADS Independent Top Mount- Alternator Bracket

#### Designed for use with:

- Short water pump
- GM 10SI / 12SI alternators
- V-groove pulleys (Pages 53-54)

Mounts to the driver side of the motor and positions the alternator to the inside of the driver side valve cover. Independently adjustable.

#10720

## NEED AN ALTERNATOR?

### 105 AMP GM 10SI/12SI ALTERNATOR

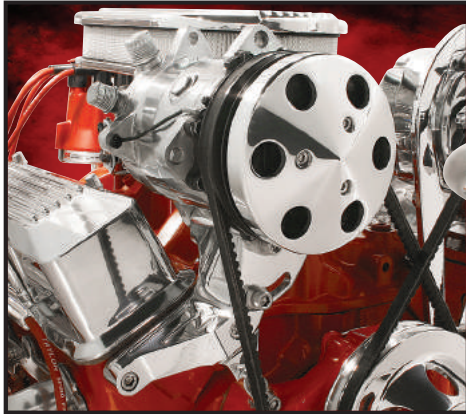

10SI/12SI Alternator For Independent Brackets

#### Product Features:

- 105 amp 1-wire hook-up
- Gold plated terminal
- GM 10SI/12SI Case
- New - not rebuilt case and internals

#V0105

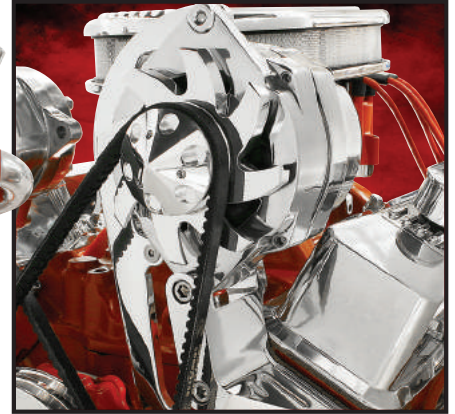

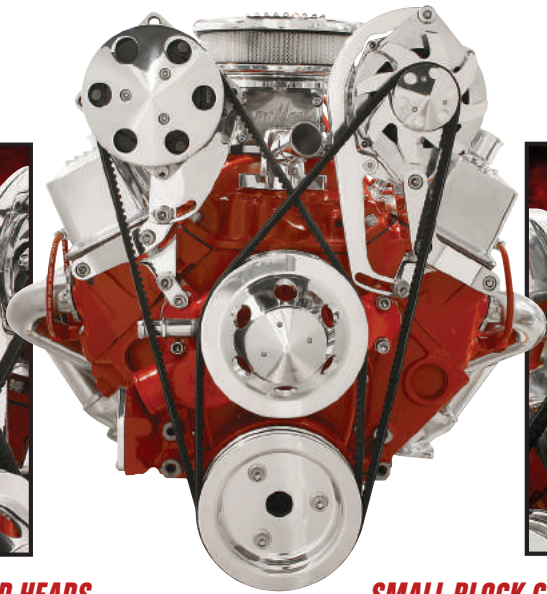

**SMALL BLOCK CHEVROLET® - STANDARD HEADS**  
Independent Top Mount- Compressor Bracket

**Designed for use with:**

- Short water pump
- Sanden 508 AC compressor
- V-groove pulleys (Pages 53-54)

Mounts to the passenger side of the motor and positions the compressor to the inside of the passenger side valve cover. Independently adjustable.

#10221

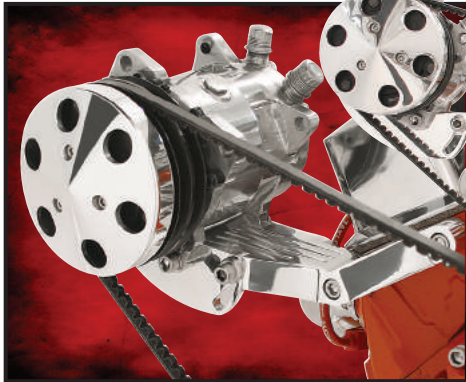

**SMALL BLOCK CHEVROLET® - STANDARD HEADS**  
Independent Top Mount- Alternator Bracket

**Designed for use with:**

- Short water pump
- GM 10SI / 12SI alternators
- V-groove pulleys (Pages 53-54)

Mounts to the driver side of the motor and positions the alternator to the inside of the driver side valve cover. Independently adjustable.

#10220

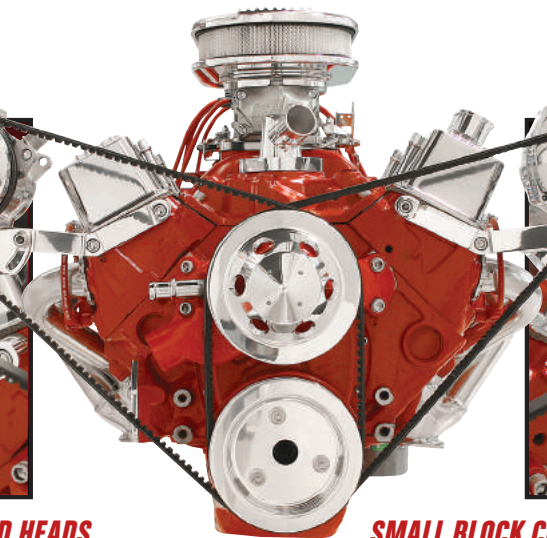

**SMALL BLOCK CHEVROLET® - STANDARD HEADS**  
Independent Side Mount- Compressor Bracket

**Designed for use with:**

- Short water pump
- Sanden 508 AC compressor

- GM 10SI / 12SI alternators
- V-groove pulleys (Pages 53-54)

Dual-point mounting to the driver side of the motor positioning the alternator to the inside of the driver side valve cover. Independently adjustable.

#10520

# BILLET PULLEYS & PULLEY KITS

## SERPENTINE

Precision machined & polished to a mirror finish, these pulleys are engineered to work with our accessory brackets. 6061-T6 construction means they are perfectly balanced and true unlike cast pulleys on the market. Stainless steel hardware is included.

### SERPENTINE PULLEY KIT FOR FM BRACKETS - LONG WATER PUMP

#### Designed for use with:

- Long water pump
- GM 10SI / 12SI alternator

#### Kit Includes:

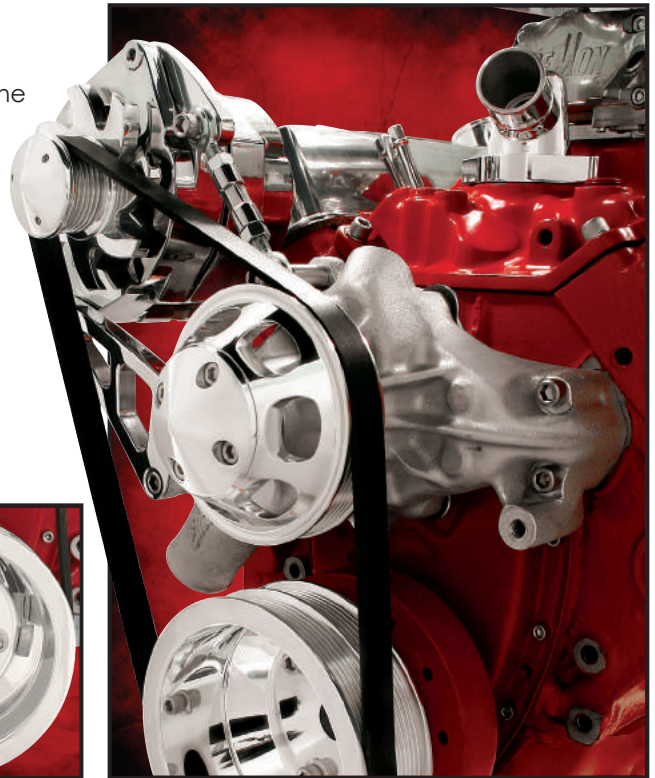

- Alternator pulley with Fan & Nose Cone
- Water Pump Pulley with Nose Cone
- Crank Pulley
- Stainless Hardware

#### Small Block Chevrolet®

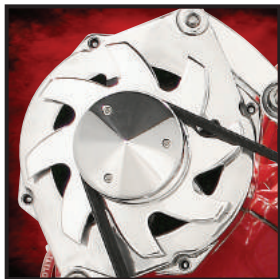

#FM3110PC Serpentine Pulley Kit

#### Big Block Chevrolet®

#FM3210PC Serpentine Pulley Kit

### KIT INCLUDES...

1PC. ALTERNATOR PULLEY  
W/ FAN & NOSE CONE

WATER PUMP PULLEY  
W/ NOSE CONE

CRANKSHAFT PULLEY

Brackets Available On Pages 46-47

### SERPENTINE POWER STEERING PULLEY FOR SAGINAW STYLE PUMP

#### Designed for use with:

- Long water pump
- 6-rib serpentine belt
- Billet Specialties power steering brackets (pages 46-47)

#FM1030PC 1/8" Keyway Pump Shaft (up to '75)  
#FM1035PC Press-on Pump Shaft ('75 & up)

**Pulley Diameter: 5.875"**

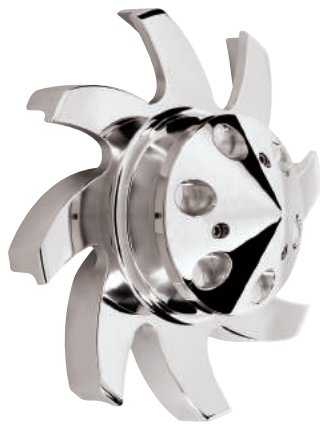

### WHY BUY A BILLET PULLEY?

The benefit of a billet aluminum pulley over a cast pulley is equal density. With a cast pulley, the aluminum is poured into a mold and then allowed to cool. This process can create variations in density throughout the pulley. Dense areas are heavier than the more porous areas causing the pulley to vibrate at high RPM. Our billet pulleys are equally dense throughout; equal weight translates to a true and balanced pulley drive system.

# BILLET PULLEYS

## V-GROOVE

### ALTERNATOR PULLEYS

### **1PC. ALTERNATOR PULLEY WITH FAN - 2.5" DIAMETER**

Billet Specialties manufactures the most balanced alternator pulley & fan combo in the industry by machining the unit out of one solid piece of aluminum. This 1-piece pulley and fan combo features a bolt on nose cone to hide the alternator nut and washer, stainless hardware included. Fits most GM, Delco, & Ford alternators.

#85220

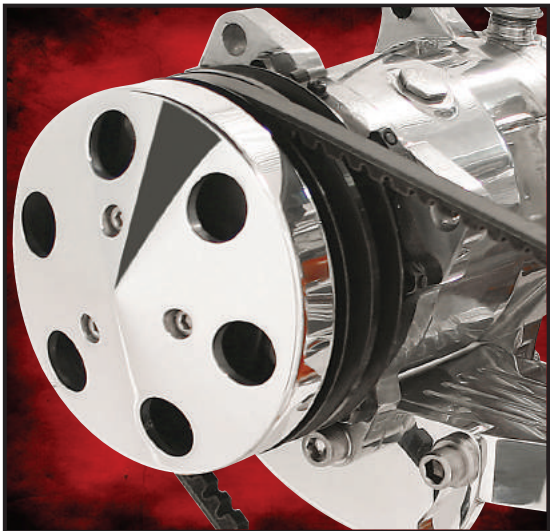

### **ALTERNATOR PULLEY - 2.5" DIAMETER**

Machined in the USA from 6061-T6 billet aluminum this Billet Specialties one piece alternator pulley features a bolt on nose cone to hide the alternator nut and washer. Fits most GM, Delco, and Ford alternators.

#85120

### A/C CLUTCH COVERS

### **SANDEN 508**

Machined from solid billet aluminum, this cover bolts directly to the Sanden 508 clutch with stainless hardware and is polished to a mirror finish.

#87120

### **KNOW THE DIFFERENCE**

Beware of the term "Billet Style". In most cases this is a sign of cast aluminum imitations that offer inferior quality and finish.

## POWER STEERING PUMPS

Product Features:

- Flow rate: 3.5GPM @ 1200PSI
- Cad plated AN fittings pre-installed
- New pump (not remanufactured)

#12020 Natural  
#12025 Polished

# POWER STEERING COMPONENTS

## REMOTE POWER STEERING RESERVOIR

In your choice of Smooth or Ribbed styles, our remote power steering reservoirs are much more than empty cans. The double O-ring sealed breathable cap relieves positive and negative pressure while keeping your engine compartment clean. Forget foaming and fluid turbulence with our innovative internal return tube. Includes male AN fittings on the bottom of the reservoir.

Our exclusive bracket design clamps to the reservoir with an internal lock. The mounting hardware is completely hidden!

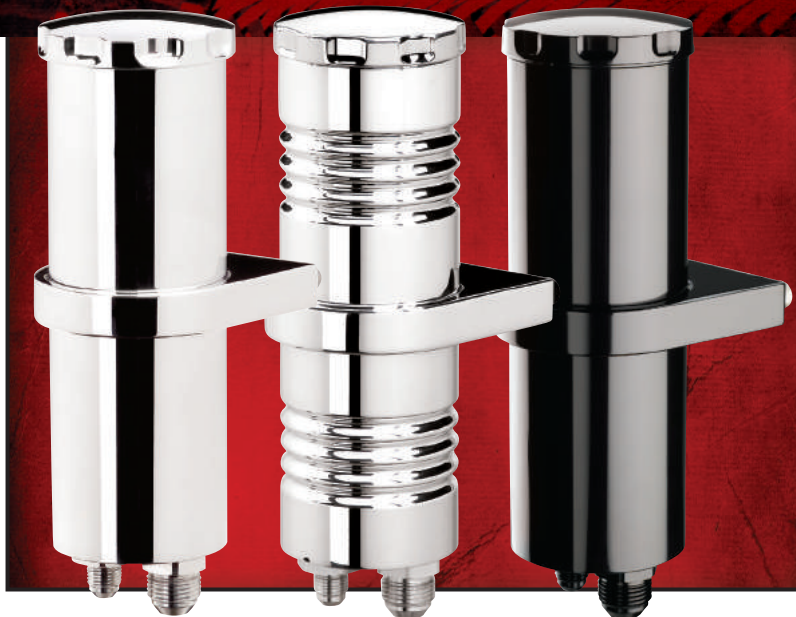

### Note:

- Bracket must be installed at center of reservoir as shown
- Not for use with Hydroboost systems

#77910	Smooth Reservoir w/ Bracket Polished
#77920	Ribbed Reservoir w/ Bracket Polished
#BLK77910	Smooth Reservoir w/ Bracket Black
#RP7701	-8AN Power Steering Supply Fitting

## TECH TIP

For optimal performance always mount the remote power steering reservoir higher than the power steering pump.

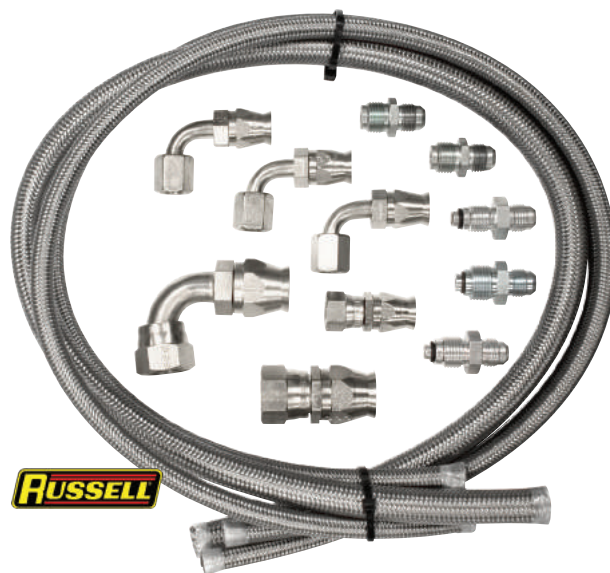

## POWER STEERING HOSE KIT FOR REMOTE RESERVOIR

We take the guesswork out of power steering hoses to save you time and money. Each kit is supplied with enough adapters to cover most popular GM boxes and Ford type racks. Quality fittings and hose from Russell Performance are used exclusively to ensure reliability. Included -6 & -10 fittings match our remote power steering reservoirs and the GM Type II pumps used in Tru Trac & V-Trac pulley systems.

### Applications:

- '65-'78 GM 800 steering gear box (Metric & SAE)
- '74-'77 Ford Mustang II rack & pinion
- CPP GM 500 steering gear box
- GM rack & pinion
- Flaming River rack & pinion
- Dodge Omni rack & pinion

#77900 Hose Kit for Remote Reservoir

## QUALITY INSIDE AND OUT!

- Internally baffled and O-ring sealed cap to prevent splash over
- Vented cap eliminates positive & negative pressure which leads to foaming
- Innovative internal return tube greatly reduces fluid turbulence & foaming
- Extra capacity of up to 15oz. of fluid in a compact design
- Sleek mounting bracket with internal key lock design hides all hardware
- -6 & -10 AN male AN fittings are included and pre-installed
- 100% billet aluminum construction - polished to a mirror finish
- Overall dimensions: 2-7/8" O.D. x 8-3/4"H (Cap: 3" O.D.)

Matching Overflow Tanks, see page 79 for details!

### **PUMP MOUNT RESERVOIR**

Billet Specialties pump mount billet reservoir is a machining marvel with innovative features such as threaded double O-ring reservoir and hose attachments providing secure leak free service. Precision machined internal baffling eliminates foaming and is topped off with a vented notch grip cap to match our other accessories.

#### **Product Features:**

- Precision 3D Machined
- 6061-T6 billet aluminum
- Vented fill cap with dipstick
- High fluid capacity

#77930 Polished  
#BLK77930 Black Anodized

\* Only works with SB-BBC Tru Trac, V-Trac & FM Serpentine Conversion Kits \*

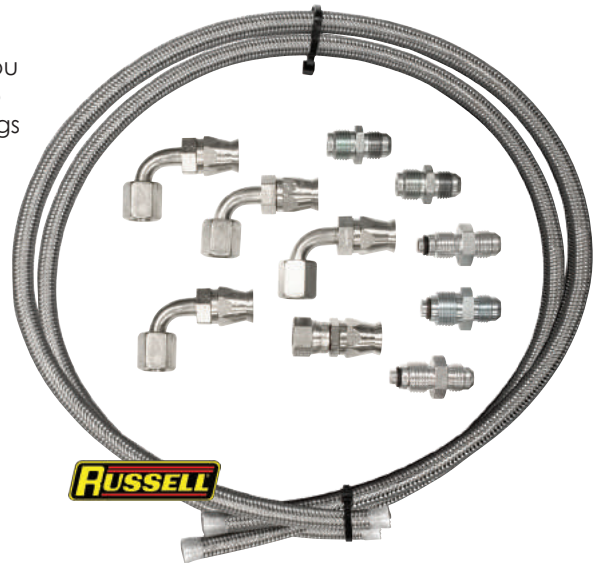

### **POWER STEERING HOSE KIT FOR PUMP MOUNT RESERVOIR**

We take the guesswork out of power steering hoses to save you time and money. Each kit is supplied with enough adapters to cover most popular GM boxes and Ford type racks. Quality fittings and hose from Russell Performance are used exclusively to ensure reliability. Included -6 fittings match our pump mount power steering reservoirs and the GM Type II pumps used in Tru Trac & V-Trac pulley systems.

#### **Features:**

- 2 - 3ft sections - 6 Powerflex High Pressure Hose
- 5 - 6 AN Endura Hose Ends
- Adapters to fit most Rack & Steering Boxes
- Comprehensive Instructions

#77905 Hose Kit for Pump Mount Reservoir

### **POWER STEERING ADAPTER KIT**

#### **Applications:**

- '77-'78 Mustang II rack & pinion
- Up to '88 T-Bird rack & pinion
- Maval Mfg. rack & pinion
- Saginaw 600 steering gear box

#77901

### **RESERVOIR TIGHT FIT KIT**

Kit includes -6 & -10 90° AN fittings for use with our billet remote reservoirs when available space does not allow for the use of straight fittings.

#77902

### **2GPM FLOW CONTROL VALVE**

Reduce the flow of GM type II power steering pumps from 3.5 GPM to 2 GPM which is recommended for Mustang II rack & pinion steering.

Round: 14" Overall Diameter / 3-3/4" Tall

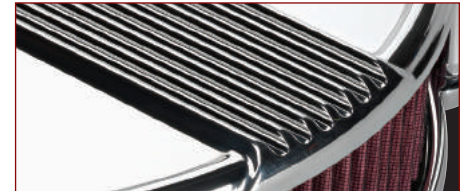

### DEMON CARB?

For proper installation of a Billet Specialties air cleaner you'll need a Demon Carb Stud Kit #RP1516

# RIBBED AIR CLEANERS

## ROUND 14" PROFILE

Billet Specialties Profile accessories are something special. Each product is a progression of styling and machining precision. Our Profile 14" air cleaner is no exception, featuring a 3D machined top with billet perimeter posts retaining a K&N filter for performance - all on top of a fully machined carb base and clamp. Polished to perfection the 14" Profile air cleaner will be the centerpiece of your engine compartment.

#P15840 14" Round

K&N Lifetime Filter  
Included!

## DUAL QUAD

By using adjustable mounting plates, dual quad air cleaners will fit carburetors with a minimum spacing of 6-3/8" to a maximum spacing of 8-13/16" measured from center to center of each carb. Some applications may require trimming of mounting plates.

#15650 Dual Quad

Dual Quad Adjustable Base. Fits carburetors with a minimum spacing of 6-3/8" to a maximum spacing of 8-13/16" measured from center to center of each carb.

K&N Lifetime Filter  
Included!

## OVAL RIBBED

Traditional Hot Rod Style is reflected in our Ribbed Air Cleaners. Machined raised ribs rise from the mirror polished surface via thousands of lines of programming code, each radius matches other ribbed accessories for consistency. Truly in a class by themselves, Billet Specialties air cleaners are the best quality air cleaner you can buy.

### Product Features:

- High quality, industry leading mirror finish polish
- Easily replaceable filter element
- Stainless steel mounting hardware
- Fits standard 4-barrel carburetors (Not for use with Dominator carburetors)

## SMALL BLOCK CHEVROLET®

Our CNC milled aluminum valve covers are guaranteed to draw attention to your engine compartment. Available in short and tall heights with a 1-1/4" diameter breather hole positioned between the rockers to reduce oil splash. Valve covers are produced from a high-grade aluminum that is polished to Billet Specialties standards and each design is CNC machined in the USA. Use tall style valve covers if using roller rockers and stud girdles. All Valve Covers sold in pairs.

### Product Features:

- Includes metal baffles
- Includes grommets
- Accepts 1-1/4" breathers (pgs 72-73)
- Short valve covers: 2-3/4"H
- Tall valve covers: 3-3/4"H

## BILLET OVERFLOW TANKS

Looking for the best overflow tank on the market? Look no further - they're right here! Billet Specialties overflow tanks are machined from 6061-T6 billet aluminum and include two adjustable billet mounting brackets to ensure proper positioning. Choose from either ribbed or smooth designs to match our engine accessories. Tanks are 2" in diameter and available in three lengths measured from bottom of cap to base of tube.

### Product Features:

- Knurled O-ring cap for a no-leak seal
- Stainless hardware included
- Aluminum push-on fittings included
- Industry leading mirror finish polish
- Internal return tube

## 8.75" BILLET OVERFLOW TANKS

- 100% billet aluminum construction
- Mirror polished finish or high-gloss black anodized finish
- Fluid capacity: 15oz.

**Dimensions:** 2-7/8" O.D. x 8-3/4"H (Cap: 3" O.D.)

Our exclusive bracket design clamps to the tank with an internal lock. The mounting hardware is completely hidden!

**Note:** Bracket must be installed at center of reservoir as shown.

# HOSE & LINE MANAGEMENT

## BILLET HEATER & A/C BULKHEADS

Billet Specialties heat and AC bulkheads are engineered to work with 5/8" heater hose and one #6 and one #10 AC line.

- Hose Fittings Not Included
- Push-on for heater side only
- Stainless heater hose applications require a male tube O-ring To AN adapter

### Product Features:

- Precision machined 6061-T6 aluminum
- Industry leading polish finish
- Offset design allows clear access to lines
- Uniform hose routing in a minimum space

## POLISHED BILLET HOSE ENDS

Billet Specialties has the answer for unsightly hose clamps and loud anodized colors - polished billet hose ends! Available in popular sizes for rubber and braided hoses from 5/16" to 1-3/4".

Billet Hose Ends – Fuel  
#67025 5/16" Braided  
#67225 3/8" Rubber  
#67325 3/8" Braided

Billet Hose Ends – Heater  
#67425 5/8" Rubber  
#67525 5/8" Braided  
#67625 3/4" Rubber  
#67725 3/4" Braided

Billet Hose Ends – Radiator\*  
#67825 1-1/2" Rubber  
O.D. - 2.00"  
#67925 1-3/4" Rubber  
O.D. - 2.25"

### Product Features:

- CNC machined aluminum
- Mirror polished finish
- Hose clamp included

\* Not for use on water pump outlets

## BILLET HOSE SEPARATORS

Billet Specialties hose separators are precision machined from 6061-T6 billet aluminum and are available in many popular combinations and sizes. Sold individually.

### Product Features:

- Industry leading mirror finish polish
- Stainless bolt

	Hose O.D.		Hose O.D.		Hose O.D.
#68020	.440 x .540	#68320	.625 x .625	#68625	.890 x .969
#68025	.440 x .630	#68325	.625 x .781	#68720	.906 x .906
#68120	.500 x .500	#68420	.734 x .890	#68725	.906 x 1.015
#68125	.540 x .630	#68425	.734 x .969	#68729	.906 x 1.125
#68220	.562 x .562	#68520	.781 x .781	#68820	1.015 x 1.015
#68225	.562 x .625	#68525	.781 x .906		

## TECH TIP

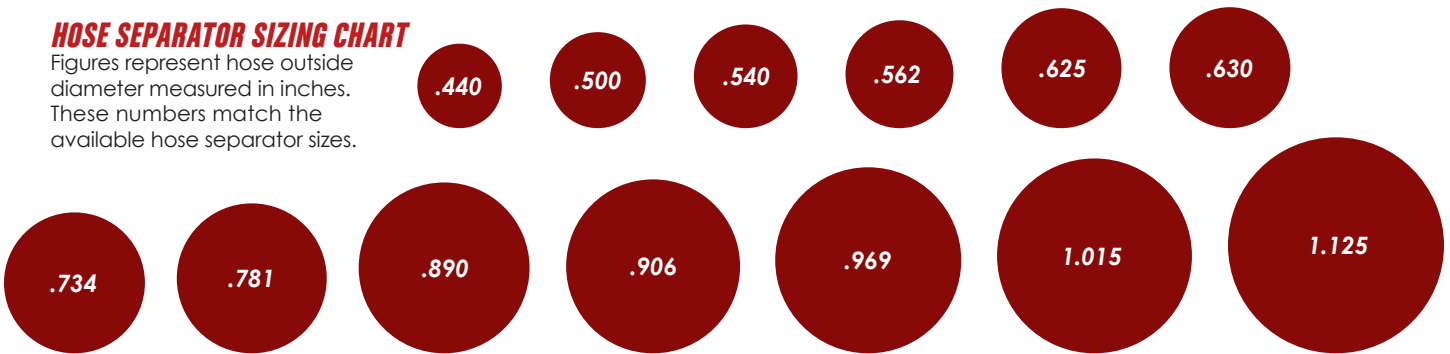

A hose's listed size is always in reference to the inside diameter of that hose. Example, a 5/8" heater hose has an inside diameter (I.D.) of 5/8" while the outside diameter (O.D.) is 29/32" or .906. The O.D. is the dimension needed when purchasing hose separators.

## HOSE SEPARATOR TECHNICAL DATA – Decimal/Fraction = Outside Diameter

BRAIDED AC HOSE DIAMETER			AC HOSE DIAMETER			BRAIDED AN LINE DIAMETER			HEATER HOSE DIAMETER		
Hose #	Decimal	Fraction	Hose #	Decimal	Fraction	Size	Decimal	Fraction	Size	Decimal	Fraction
#6	.440	7/16"	#6	.734	47/64"	-6	.562	9/16"	5/8	.906	29/32"
#8	.540	35/64"	#8	.890	57/64"	-8	.625	5/8"	3/4	1.015	1-1/64"
#10	.630	5/8"	#10	.969	31/32"	-10	.781	25/32"			
						-12	.906	29/32"			
						-16	1.125	1-1/8"			

## HOSE SEPARATOR SIZING CHART

Figures represent hose outside diameter measured in inches. These numbers match the available hose separator sizes.

## THRU-FRAME FITTINGS

Machined from 303-stainless steel. Available for 2" & 2-3/8" wide frame rails. Sold in pairs.

- #66210 -3AN x 1/8" NPT Short (2")
- #66310 -3AN x 1/8" NPT Long (2-3/8")

## BILLET LINE CLAMPS

- Stainless bolts included
- Machined step to prevent twisting
- 3/16" & 1/4" include 8-32 x 5/8" bolts
- 5/16", 3/8" & 1/2" include 10-32 x 3/4" bolts

- #65110 3/16" Clamp
- #65210 1/4" Clamp
- #65310 5/16" Clamp
- #65410 3/8" Clamp
- #65510 1/2" Clamp

# BATTERY ACCESSORIES

Billet Specialties battery mounts secure your high performance battery with style. Machined from 6061-T6 billet aluminum for strength our battery mounts hold the battery firmly in place and provide a rigid base to mount to the vehicle. Billet Specialties offers an Optima and XS Power design each with two finish options.

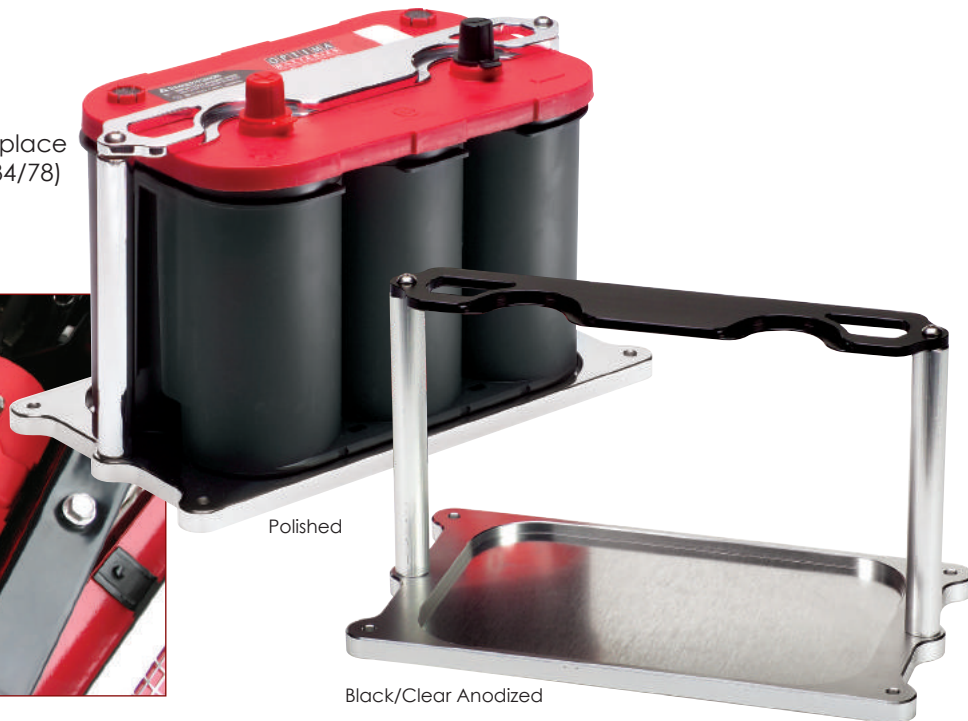

## OPTIMA STYLE BATTERY MOUNTS

### Product Features:

- Stainless hardware Included
- Recessed bottom tray locks battery in place
- Fits Red or Yellow top Optima (Group 34/78)

*\*Tri-Five Chevy™ door panel trim will not allow proper functioning of vent window crank.*

## KNOW THE DIFFERENCE

Billet Specialties' exclusive steel splined inserts are engineered to provide the most secure and durable attachment in the industry. Each steel insert offers precision machined splines to eliminate unnecessary play in the handle and is securely locked in position with two set screws. This is another great example of how far Billet Specialties goes to manufacture the best components for your car.

### Ours:

- High quality steel
- Precision machined
- Two set screws

### Theirs:

- Soft aluminum
- Stamped splines
- One set screw

# HALF-WRAP

## BILLET STEERING WHEELS

We are the worldwide leader in billet steering wheels for many reasons. We offer the widest selection of styles, top grain leather colors, outstanding quality and fast delivery. Our relentless attention to detail is apparent both front and back on these works of automotive art.

The face of each half-wrap steering wheel boasts a custom front steering ring that is available in your choice of a wide array of leather colors, simulated burl wood or carbon fiber finishes. The backside of each wheel features milled finger notches for an ultra-comfortable grip. Designs are available in 14" & 15.5" diameter and will fit in most any vehicle imaginable.

# 4 PARTS ARE REQUIRED FOR EVERY STEERING WHEEL PACKAGE...

# LEGENDS SERIES

## Find Your Hot Rod Mojo

Muscle cars, Street Rods & Classic Trucks — American machines that have become the canvas of hot rod artistry. The Legends Series takes the American Hot Rod seriously as one of the few cast wheel lines actually Made In America! We manufacture each cast center to precise detail in both strength and beauty and mate them to the same soft lip rims as our forged billet wheels. The result? Captivating designs with timeless features that are custom built to your specifications in 15" through 20" diameters.

**Replacement Dome Cap Removal Wrench**  
#999525

**Thin Wall Socket**  
#999910

## Wheel Spacers & Lug Nuts

Wheel spacers are precision machined from 6061-T6 aluminum to ensure trueness, quality & strength. To ensure proper fitment you will need to measure the overall diameter of the bolt pad area of your wheels before ordering.

• Billet Specialties recommends the use of E-T style lug nuts for proper thread engagement. E-T lug nuts allow for an extra 1/4" of thread engagement.

### ALL WHEEL SPACERS HAVE A 3.080" CENTER BORE

**Street Lite Wheel Spacers**  
Not for use with 5/8" race type studs

**Wheel Size**  
15x3.5 Thru 15x10  
15x3.5 Thru 15x10

**Bolt Pattern**  
5x4.5 & 5x4.75  
5x4.5 & 5x4.75

**Spacer Size (in.)**    **Part Number**  
1/4 (.25)                WS3085625  
1/2 (.50)                WS3085650

**Wheel Spacers for Billet Specialties Brand Only**  
Fits directly to bolt pad for seamless appearance

**Bolt Pad Diameter (in.)**  
6-3/8 (6.375)  
6-3/8 (6.375)  
6-3/4 (6.75)  
6-3/4 (6.75)

**Bolt Pattern**  
5x4.5 & 5x4.75  
5x4.5 & 5x4.75  
5x4.5 & 5x4.75  
5x4.5 & 5x4.75

**Spacer Size (in.)**    **Part Number**  
1/4 (.25)                WS3086325  
1/2 (.50)                WS3086350  
1/4 (.25)                WS3086725  
1/2 (.50)                WS3086750

**Universal Wheel Spacers**  
For Non-Billet Specialties brand wheels

**Bolt Pattern**

5x4.25, 5x4.50, 5x4.75, 5x5  
5x4.25, 5x4.50, 5x4.75, 5x5  
5x4.25, 5x4.50, 5x4.75, 5x5

**Spacer Size (in.)**    **Part Number**  
1/4 (.25)                WSG5L250  
3/8 (.375)              WSG5L375  
1/2 (.50)                WSG5L500  
3/4 (.75)                WSG5L750

The minimum thread engagement for each lug nut is equal to the diameter of the stud being used.

**Example:** 1/2" diameter stud - minimum thread engagement is 1/2" of stud length. E-T Lugs allow for an extra 1/4" thread engagement.

**E-T Conical Seat - OPEN END**  
Part #    Size  
999980    7/16-20    E-T

999992    7/16-20    3/4"  
999993    7/16-20    1/2"  
999996    1/2-20     3/4"  
999997    1/2-20     1/2"

\*1/2" long mag shank lug nuts for use with 15x3.5 & 15x4 wheels with 2.25" backspace only.

## WHEEL MEASURING INFORMATION

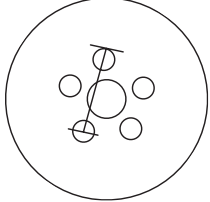

The following information can be used to gather measurements to ensure a proper fit for most applications.

### TORQUE SPECIFICATIONS

Stud Size	Torque Rating	Stud Size	Torque Rating
7/16"	70-80 ft.lbs.	10mm	45-55 ft.lbs.
1/2"	75-85 ft.lbs.	12mm	75-85 ft.lbs.
9/16"	100-115 ft.lbs.	14mm	85-95 ft.lbs.
5/8"	125-135 ft.lbs.	16mm	125-150 ft.lbs.

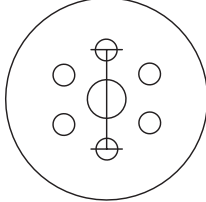

### MEASURING BOLT PATTERN

5 LUG

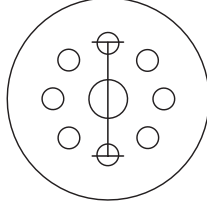

From back side of the top stud to the center of the top stud to the center of the second stud.

6 LUG

From center of the top stud to center of the second stud directly across.

8 LUG

**IMPORTANT:** Overall wheel width is 1" wider than the listed size. For example a 17x8 wheel actually measures 9" wide overall. You must consider this when fitting your vehicle.
