Air Door Actuators

Don't Get Left in the Cold!

- Redesigned housing lasts longer and prevents comebacks
- Controls the flow and temperature of air into the interior of the vehicle
- 9 SKUs cover over 25 million Ford, GM, and Jeep vehicles

Common Symptoms of Failed Actuators

- Heat or air conditioning will only work on one side of vehicle
- Defrost function may not work at all

Related Sales - Heater Blend Door Kit

The Heater Blend Door, located in the vehicle's heater case, allows airflow temperatures to be adjusted by varying the position of the blend door.

The 2004-97 Ford Taurus/Explorer, Mercury Sable, Mercury Mountaineer, 2004-00 Lincoln Aviator and Ford Ranger can develop problems with the Blend Door. The Blend Door pivot pins (located at the top and bottom of the door) have a tendency to break, causing the door to fall apart, hang up and jam. Up until now the only repair was to replace the entire heater case assembly.

The original heater case is glued together and difficult to separate for a repair.

The **Heater Blend Door Repair Kit, part number 76807**, provides a much more cost-efficient way to repair the heater door/case assembly. This kit has been engineered to replace just the broken door and avoids the costly replacement of the whole heater case assembly. The kit includes a template for cutting the case, retaining screws for the guide plate, 2 replacement doors (pick the one that matches the vehicle's defective one), and an upper plate with sealing gasket. Below is a copy of the instruction sheet that has been developed to aid the service dealer in a trouble free repair.

76807

2006-96 Ford Taurus/Sable; 2005-95 Explorer; 2006-95 Ranger; 2005-03 Aviator; 2005-97 Mountaineer

76809

2005-97 Ford E Series Van, 2001-97 E Super Duty

Read and Follow All Instructions Carefully!

- Remove the heater case assembly according to the procedure outlined in the shop manual.
- Locate the guide plate in the package and place on the top of the heater case above the broken blend door.

HINT: All 4 holes on the heater case will line up with the holes in the guide plate.

- Secure the guide plate to the heater case with 4 screws provided.
- Using the plate opening as a guide, position the cutting tool vertically against the guide plate outline and begin cutting the case straight down. Continue to follow the outline of the guide plate as you are cutting until the section on the heater case is loose.
- Remove the cutaway section from the heater case and discard.
- Remove and discard the broken blend door. Be sure to remove all broken parts from the case to prevent the replacement door from binding.
- Select the appropriate matching door and insert into the heater case (use only 1 door).
- Remove the protective backing from the new retaining plate.
- Press the retaining plate down firmly making sure the blend door pivot is in place.
- Reinstall the heater case per the procedure outlined in the shop manual.

Air Filter Boxes

NEW! to the Aftermarket!

- Direct OE Replacement

Air Intake Hoses

- Brings air from the Air Cleaner Box into the Throttle Body and then into the Engine Cylinders.
- Cracks or damage to the Air Intake Hose can cause improper air mixture, as well as allow debris and contaminants that damage the engine.
- Original Equipment Construction

Air Intake Hoses

2006 Quick Ship Program

Don't Lose the Sale...
 It's Quick...
 It's Easy...
 It's at Your Door Tomorrow.*

Listed below are the categories now available:

 Air Door Actuators	 Air Filter Boxes	 Air Intake Hoses	 Caliper Brackets	 Camshaft Synchronizers	 Clock Springs	 CV Boots	 Door Lock Actuators
 Electronic Fan Clutches	 Exhaust Manifold Kits	 Fan Pulley Brackets	 Fluid Lines	 Fluid Reservoirs	 Four Wheel Drive Actuators	 Fuel Sending Units	 Fuel Tanks
 Harmonic Balancers	 New Ignition Distributor Assemblies	 Intake Manifold Kits	 Latches	 Mirror Assemblies	 Oil Pans	 Power Steering Pulleys	 Quick Disconnect
 Radiator Fan Assemblies	 Rear Axle Shaft Kits	 Side View Mirrors	 Smog Pump Pulleys	 Timing Cover Kits	 Transfer Case Motors	 New Window Lift Motors	 New Window Regulators
 New Wiper Motors	 Wiper Transmissions Linkages						

Now you can have the parts your customers need, when they need them!

It's that easy...
 call your servicing distribution center!

Air Intake Hoses

**100%
NEW**

Brake Caliper Assemblies

100% NEW and Complete:

- All calipers, components and castings are 100% NEW
- Includes all hardware to install the caliper

Zinc Chromate Plating

- Resists rust and corrosion
- Provides visual confirmation of improved quality

Dorman Engineered:

- Engineered to Dorman Quality Standards
- Improvements made to OE Failure-Prone Applications

NO CORES!

**Dorman 100% NEW
Brake Calipers are now**

Dorman 100% NEW Brake Calipers have moved from the OE Solutions catalog and will

now be included in the new

brake catalog coming soon.

100% NEW BRAKE CALIPERS

Brake Caliper Assemblies

Dorman® Engineered Casting to Exacting Dimensions and Tolerances

Save bay time,
all necessary
hardware included

Dorman® Engineered Seal and Groove for Consistent Seal Compression and Function

- OE and Remanufactured GM “W-Body” Calipers Use Steel Guide Sleeves, Which Cause Corrosion and Seizing
- Dorman® Units Prevent Corrosion and Seizing by Utilizing an Anodized Aluminum Guide Sleeve
- All Dorman® Calipers are Fully Assembled and Friction Ready
- Zinc Chromate Plating Extends Part Life and Reduces Corrosion

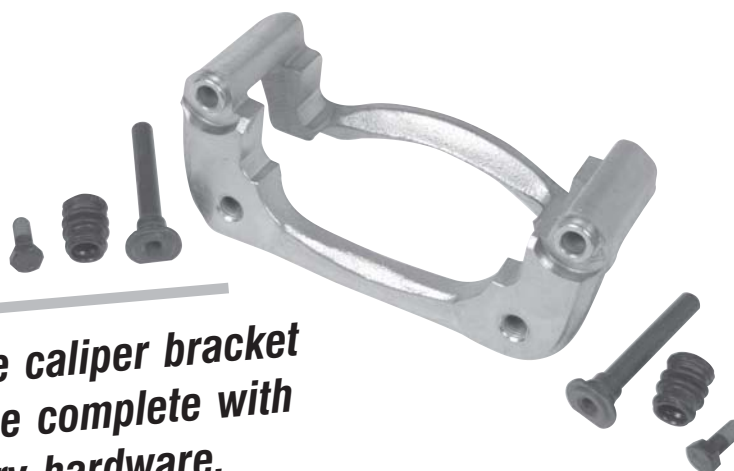

Application-specific instruction sheets included

Brake Caliper Bracket Assemblies

New Brake Caliper Bracket Assemblies deliver smoother stops, promote even pad wear and reduce steering wheel pull and brake pedal pulsation.

All Dorman brake caliper bracket assemblies come complete with all necessary hardware.

Typical Failures

- Loose slide pins caused by excessive wear to the bracket
- Slide pins seize in the bracket due to corrosion

Dorman® OE Solutions™ Brake Caliper Bracket Assemblies offer you:

- Direct OE Replacement
- The ability to replace just the bracket
- Fewer comebacks due to corrosion and wear in the old bracket.
- Ensures you have everything needed to complete the repair.

32 Available SKUs...

cover the most failure-prone applications

Camshaft Synchronizers

Air Bag Clock Springs

It's not IF it goes bad . . . it's WHEN it goes bad

- Clock Springs transfer the current from the steering column to the steering wheel.
- Clock springs fail when wire breaks or separates from connector
- Clock spring failure renders steering wheel mounted accessories inoperable

525-601
Honda Accord,
Prelude
2001-98

525-213
Ford F-Series,
Expedition, Excursion
2004-99

When wire controlling air bag fails, warning light illuminates.

Now Available In the Aftermarket

- Simple and safe installation
- System performs self check every time vehicle is started
- One on every car since 1994
- 21 SKUs fit the most failure-prone applications
- Coverage for 28 million registered vehicles

Control Arms

The Most Comprehensive, All-Inclusive Control Arm Program in the Aftermarket

- Coverage for the most failure-prone applications
- Late-model coverage not offered elsewhere in the aftermarket
- Best OE stocking SKUs
- Coverage includes: Asian, Domestic and European Makes, Popular Light Trucks and SUVs

520-301
Chrysler Cirrus,
Dodge Stratus
2000-96

520-767
Volkswagen Passat
2005-98

520-202
Ford Contour, Cougar
Mercury Mystique
2000-99

Features and Benefits

- Direct OE Replacement
- Complete assemblies including ball joint, bushings, and new hardware

Kit Contents

*New Dorman Hardware included
(where applicable)*

Typical Failures

- Cracked or torn ball joint boots allow grease to escape, causing corrosion, wear and failure.
- Loose ball joints and bushings create noise, vibration, drivability and safety issues.
- Control arms bend due to curb impact.

CONTROL ARMS

First True Control Arm Program to the Aftermarket!

- Direct OE Replacement
- Over 300 SKUs
- Control Arms Fail and Are Stocked at OE Dealerships

FAILURE MODES:

Wear

- Worn Ball Joint Deforms Control Arm Seat
- Damaged When Pressing Out / In Ball Joint
- Worn Bushings Can Damage the Arm

Crash / Road Hazard

- Control Arms Bend / Deform Due to Minor Impacts
- Control Arms Can Bend from Pot Holes, Curbs, and Speed Bumps

Component Wear on Integrated Assemblies

- Ball Joint or Bushings Cannot Be Replaced Separately on Some Units

Control Arm Bumpers

31052 (1) For Better Value, Order 31054

Lower

Chrysler 1994-66.

31053 (1) For Better Value, Order 31054

Upper

Chrysler 1994-66.

31054 (2)

Upper & Lower

Chrysler 1994-66. Kit contains upper and lower bumpers. **Kit contains 31052 and 31053.**

31061 (1)

Lower

GM 2003-1953.

Worn shocks can cause Control Arm Bumpers to wear or crack. Inspect when replacing shocks.

CV Joint Boot Kits

UNI-FIT™

Guaranteed to always have the right boot on hand.

- Two Uni-Fit™ CV Boot Kits can be installed with one tool on 95% of all vehicles
- Uni-Fit™ CV Boot Kits include grease, clamps and boots - all which are needed to do the job right the first time
- Air powered “On-the-Car” Installation Tool **saves up to 40 minutes** over conventional CV Boot installation
- No need to remove the half-shaft or disassemble the joint to replace the CV Boot

Prevent a Breakdown: Failed CV Boots can lead to a failed axle.

Tech Tip

- Inspect all suspension components including CV Boots every time the vehicle is in for service.
- Grease on the suspension, spindle and caliper indicates a ruptured boot.
- Replace the torn CV Boot as soon as possible to prevent contaminants from entering the joint and ruining it.
- Do not leave a kink in the boot bellows after installation. The boot will fail prematurely.
- Always use the proper tools when removing and installing CV Boots.
- DO NOT use an impact gun to install the retaining nut on the axle. Damage to the joint and/or bearing may occur.

UNI-FIT™ CV Joint Boot Installation Tools

- Stretch our Uni-Fit CV Joint Boots to a diameter of up to 4.5" to slide the boot over the CV joint
- No need to remove the half-shaft or disassemble the joint to replace the CV Boot
- Boost profits by reducing labor time—Saves up to 40 minutes over conventional CV Boot installation

614-030 Uni-Fit™ CV Boot Air Tool

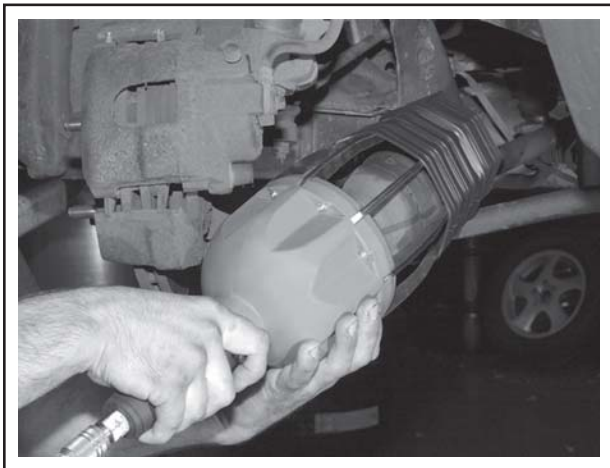

- Air powered “On-the-Car” Installation Tool works exclusively with **Neoprene** Uni-Fit CV Boots for installation on 90% of all applications.
- Simple single-button operation expands the CV boot in seconds to fit over the CV joint.
- Air compressor required; tool fits a 1/4" NPT air hose nipple.
- Each tool supplied with an Industrial Milton 1/4" body 1/4" NPT air hose nipple and an instruction sheet.
- Dorman Two Year Limited Warranty

614-050 Uni-Fit™ “On-The-Car” Installation Tool Kit

- Economical “On-the-Car” Installation Tool works exclusively with Neoprene and Silicone Uni-Fit CV Boots.
- No air compressor needed.
- Each Kit includes: Installation Tool, 4" & 5" Mounting Cones, Deluxe Banding Tool, Cutting Knife, Lubrication Spray and Instructions. Packaged in a durable utility box.
- Dorman Limited Lifetime Warranty

CV Joint Boot Kits

UNI-FIT™ CV Joint Boot Kits

- Each Kit Includes: CV Boot, 3 oz. Pack of Grease, 2 Clamps and Instructions.
- Reduce stocking inventory - Four SKUs replace over 350 OEM style replacement boots - 95% of all front, rear, or all wheel drive applications for both outer and inner CV joints.
- Eliminate missed applications - Coverage where no Aftermarket boot is available.
- Correct boot always on hand - No waiting for parts delivery or being sent the wrong boot kits.
- Stretch to fit most applications - Only CV Boot that can be installed over the CV joint and retain its original durometer and shape. Can also be installed in the traditional method with joint disassembly or shaft removal.
- Proprietary rubber blend and patented design offer maximum durability and life. Boots stay flexible in winter and are resistant to cuts and abrasions.

Neoprene Rubber CV Joint Boot Kits

- For installation using the traditional method, the Dorman Uni-Fit “On-the-Car” Installation Tool Kit, or the Dorman Uni-Fit CV Boot Air Tool.

614-001

Uni-Fit™ CV Boot Kit

This Neoprene Boot provides coverage for outer joints up to 3.58" in diameter.

614-003

Uni-Fit™ CV Boot Kit

This Neoprene Boot provides coverage for outer joints larger than 3.58" in diameter commonly found on pickups, SUVs, luxury, and sport vehicles.

614-012

Uni-Fit™ CV Boot Kit Bulk Pack

Box of supplies to complete 12 CV Boot installations. Contains 12 **614-001** Neoprene Boots that fit outer joints up to 3.58", 12 (3 oz.) Packs of Grease, 24 Clamps, and Instruction Sheet.

Silicone Rubber CV Joint Boot Kits

- For installation using the traditional method.
- Designed specifically for inner joints where the CV Boot is exposed to high temperatures.

614-002

Uni-Fit™ CV Boot Kit

This Silicone Boot provides coverage for inner joints up to 3.58" in diameter where the CV boot is exposed to high temperatures.

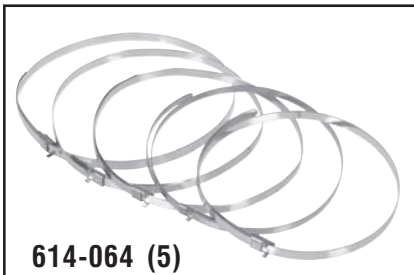

614-004

Uni-Fit™ CV Boot Kit

This Silicone Boot provides coverage for inner joints larger than 3.58" in diameter where the CV boot is exposed to high temperatures.

UNI-FIT™ CV Joint Accessories & Hardware

614-064 (5)

Heavy-Duty Stainless Steel Clamps

- OE quality, "free-end" style
- Ideal for clamping Uni-Fit™ CV Joint Boots
- Rounded edges and smooth surfaces
- 450 pound loop tensile strength
- HD 1/4" x 19"
- Same clamp that is used in Uni-Fit CV Joint Boot Kits. Carded, 5 per.

614-072

Uni-Fit™ Deluxe Banding Tool

- High strength construction
- Convenient tensioning ratchet with integrated band cutter
- Ideal professional quality tool for tightening Heavy Duty clamps used for Uni-Fit CV Joint Boots.

03618

CV Joint Grease

- Fortified with anti-wear agent molybdenum disulfide.
- One joint supply (3 oz) in a squeezable tube.
- Can be used for wheel bearings, ball joints, U-joints, hinged parts, cables, chassis parts, and general automotive applications.
- Excellent mechanical stability, heat resistance, and high compatibility with other grease.

Tech Tip

- Inspect all suspension components including CV Boots every time the vehicle is in for service.
- Grease on the suspension, spindle and caliper indicates a ruptured boot.
- Replace the torn CV Boot as soon as possible to prevent contaminants from entering the joint and ruining it.
- Do not leave a kink the boot bellows after installation. The boot will fail prematurely.
- Always use the proper tools when removing and installing CV Boots.
- DO NOT use an impact gun to install the retaining nut on the axle. Damage to the joint and/or bearing may occur.

Increase Customer Satisfaction and Loyalty!

CV Joint Boot Kits

Maintenance Checklist

- Change Oil
- Inspect CV Boot
- Check Belts
- Check Hoses
- Grease Chassis

Sales Tip

Ask the customer about the condition of the axle/spindle nuts whenever selling CV Joint Boot Kits. This is an ideal time to inspect and replace these parts. Refer to Dorman® AutoGrade™ Hardware Catalog, DAG2006.

Save Your Customers Money on Repairs...
REPLACE THE CV BOOT ONLY!

Exhaust Manifold Kits

Dorman warrants that its catalytic converters are free from defect in materials and workmanship. This catalytic converter has been designed and manufactured to meet State (except California unless otherwise designated) and Federal emission reduction requirements; and, when the vehicle is properly maintained, the catalytic converter is warranted to meet such requirements for 25,000 miles from the time of the installation and it will not constitute a safety hazard. This catalytic converter has been designed and manufactured to meet these warranty requirements.

The manufacturer's warranty is void if the catalytic converter is not properly installed on the vehicle for which it is designed and cataloged; if the catalytic converter has been altered or repaired or damaged by negligence, accident or mishandling. Dorman assumes no liability for catalytic converter failures related to engines not operating within original equipment specification, to vehicles with modified exhaust emission control systems or to the use of leaded fuel.

As Dorman's sole obligation, and as customer's sole and exclusive remedy, Dorman will replace any such defective converter provided that it be returned to an authorized dealer along with proof of purchase and properly completed warranty certificate. If a warranty claim is related to emission performance, proof of failure of an emission test must be provided. Documentation showing the vehicle's current state of tune is also required. Dorman reserves the right to determine what constitutes vehicle's proper operating condition. No other warranty expressed or implied, including merchantability, applies to the catalytic converter, nor is any person or company authorized to assume any other warranty. Dorman does not assume any responsibility for any consequential damages occasioned by the catalytic converter, or inconvenience or interruption in any operation.

Failure-Prone GM Fan Clutch Now Available in the Aftermarket

It is here! Dorman OE Solutions Electronic Fan Clutch is a “must-have” for Parts Distributors. At a near 100% failure rate, this part is on popular 2006-02 GM Light Trucks/SUVs. The fan clutch is computer controlled and regulates the fan speed. This function is performed through the use of a viscous clutch. The fan assembly fails for a variety of reasons including fluid leaks, improper fan speed and inoperative electrical sensors.

The market potential for this one SKU is huge. And while other Temperature Control Suppliers may offer a similar fan clutch, **no one is as competitively priced as Dorman.** Think about it – how are you supposed to compete with your local OE dealer, who is stocking and selling 30-40 of these fan clutches a year, when you are priced at a huge percentage over what they sell to their installers? The answer is that you can’t compete with that situation. And that is what will happen if you are selling this electronic fan clutch from another aftermarket supplier. This is because other Aftermarket suppliers are simply re-packaging OE product and passing the added costs on to you and your customers. **While these suppliers provide a Fan Clutch that lists over what OE sells to their installers, Dorman list is still below that OE installer price.** This competitive price advantage will allow you to still make a good margin on a well priced SKU while ensuring that you do not lose the sale to the OE dealer.

The new Dorman Electronic Fan Clutch is manufactured to meet or exceed OE quality. In addition, it is covered by the Dorman Limited Lifetime Warranty.

Fan Pulley Brackets

Replace the Piece, NOT the Assembly

Bracket is not available separately from the OE dealer, forcing you to buy unneeded components.

Fluid Reservoirs

NEW TO THE AFTERMARKET!

- 9 specific and 1 universal fluid reservoirs covering the most failure-prone applications.
- Over 17 million registered vehicles covered by the Dorman Fluid Reservoir program.
- Exact OE replacement.

CAPS INCLUDED!

603-201
Coolant Reservoir
Ford Taurus and Mercury Sable
2003-96

Includes sensor where applicable

Common Reasons for Fluid Reservoir failures:

- Temperature fluctuations can cause plastic to expand and crack.
- Over time, coolant can corrode the plastic reservoir.
- Due to location in the engine compartment, they are very susceptible to crash damage.

What indicates failure?

- Fluid puddles under the vehicle.
- Loss of washer fluid will trigger low wiper fluid light on dashboard.
- Loss of coolant will cause engine to run hot and possibly overheat/seize.

Check Your Cool Quotient With a Cooling System Quiz

A fairly common household disaster is flooding of the laundry area due to a split hose on a washing machine. Also vulnerable to a similar disaster is your car. A bulging radiator hose, carrying hot water (coolant) under pressure, can rupture.

Cooling system neglect is cited as a principal reason for mechanical failure of a vehicle. In addition to the danger and inconvenience of a breakdown, the damage to the engine and transmission can add up to thousands of dollars. Discovering a leaking radiator, hose connection, a sticking thermostat or other cooling system component that's on "borrowed time" can save the life of one's engine.

To underscore the importance of proper care of the cooling system, the Car Care Council offers this multiple choice quiz: See how much you know about this vital engine system.

Cooling System Quiz

- For maximum freeze protection antifreeze mixture should be:
 - half anti-freeze and half water;
 - pure antifreeze;
 - 70% anti-freeze, 30% water.
- In the cooling system the thermostat:
 - controls engine temperature;
 - works the air conditioner;
 - modulates the diodes.
- A radiator cap is designed to:
 - keep water from sloshing out of the radiator;
 - keep the cooling system operating at a specified pressure;
 - last indefinitely.
- A broken drive belt can cause:
 - overheating;
 - loss of power steering;
 - dead battery.
- Cooling systems on many cars today:
 - have no water pump;
 - never need to be flushed;
 - are equipped with an electric fan on the radiator.

Compare your answers against the ones on the next page to see how you did!

Coolant Fluid

DIY Cautions:

When servicing your cooling system yourself, use extreme caution.

Warning:

Opening a hot radiator or coolant reservoir/overflow tank can cause severe burns. Be sure that both the engine and cooling system are cool before you begin any heating/cooling system maintenance or repairs.

Because of lower hood profiles and cramped engine quarters, it's also possible that your car may be equipped with an air bleed for the cooling system. Unless the cooling system is bled properly, air may stay trapped in the system and cause erratic temperatures, or in extreme cases, engine or cooling system damage. If you're unsure about any aspect of cooling system service, have your car looked at by a professional service technician.

Windshield Washer Fluid

Fluid Description

Windshield washer fluid, or solvent as it's sometimes called, usually has a methanol base that gives the fluid its anti-freezing properties. Some fluids use isopropyl alcohol as the anti-freeze agent.

Purpose & Usage

Windshield washer fluid is used for on-road, on-demand cleaning of the windshield through the electrically operated washers. Some vehicles also use a washer system for the rear window as well as the headlights.

Maintenance Tips/Suggestions

- It's wise to keep the windshield washer reservoir full at all times with washer fluid. Running the system out of fluid can damage the windshield washer pump.
- Stay away from water, as it does not provide anti-freeze properties and does not clean as well as washer fluid.
- Some vehicles have multiple washer fluid reservoirs for different parts of the vehicle. During the winter months, where there is a lot of road salt, it's a good idea to keep a bottle of washer fluid in your car.
- If your washers stop working and the reservoir has plenty of fluid, have the washer system checked out at once by a professional service technician. Washers are a critical safety system of your car and should not be left neglected.

Answers to Cooling System Quiz from the preceding page:

1. **(C)** is correct, although a 50/50 solution is adequate for most climates, protecting to -34° F. Never use pure antifreeze.
2. **(A)** is correct. As stated above, a faulty thermostat, causing an engine to run too hot or too cold, can damage the engine.
3. **(B)** is correct. And when replacing the cap, be sure to install the right one for your vehicle. Pressure recommendations vary.
4. Because all three functions are dependent upon the drive belt (or belts) **all three answers are correct.**
5. **(C)** is correct.

4WD Quick Tips

- Never engage 4W-Low range while moving. Doing so could cause internal damage to transfer case. Refer to owners manual for proper operation.
- It is not recommended to engage 4WD, especially 4W-Low range on dry pavement. Doing so could cause internal damage to transfer case.
- Most applications require vehicles to be in neutral before shifting into 4W-Low range. Refer to your owners manual for proper operation.
- Both transfer case and 4WD operation are sensitive to variations in tire size and pressure. Tires should be within 1/4 inch circumference of manufacturer's specifications.
- When installing new transfer case motor, be sure to pay attention to the location of speed sensor wires. They must be reinstalled in the same position on the new motor. See application specific shop manual for proper service procedure.
- When removing speed sensor wires from the old transfer case motor, be sure not to damage plastic clip that holds wires in place. This clip must be reused during installation of new motor. See application-specific shop manual for proper service procedure.
- Always disconnect the battery before working on any part in the 4WD system.

Fuel Lines

21 lines provide coverage for failure-prone applications

- High quality OE line construction prevents comebacks.
- Steel supply lines corrode and break when loosening a connection.
- Saves time and money.

New Expanded Coverage: Fuel Line Hose

800-881
GM Sedans

800-882
GM Sedans

Don't Forget:

Add-on Sales: Complete the job by suggesting a new fuel filter.

Typical Failures: Ends crack during filter removal. Lines leak at crimped ends.

Typical Failures

- Fuel gauge not reading properly
- Sending Unit corrodes and breaks during removal from tank when replacing fuel pump

55160 HELP!®
Fuel Pump Pulsator GM

Prevent comebacks. Replace with every GM in-tank fuel pump. Eliminates fuel pump vibration and noise. Mounts directly on fuel pump. Fits various GM vehicles with in-tank mounted fuel pumps, 1999-84. Great add-on sale for pump or sender sales. Always replace the pulsator to eliminate potential comebacks.

Activant Path Fuel Pump, Tank & Turbo System **Activant Code** DFM

Fuel tanks, lock rings and straps, also available.

Applications begin on page 172.

GM Fuel Pump Pulsator

55160 (1)

Prevent comebacks.
 Replace with every GM in-tank fuel pump.
 Eliminates fuel pump vibration and noise. Mounts
 directly on fuel pump. Fits various GM vehicles
 with in-tank mounted fuel pumps, 1999-84. Great
 add-on sale for pump or sender sales. Always
 replace the pulsator to eliminate potential
 comebacks.

Fuel Tanks and Accessories

NEW Fuel Tanks, Straps, Filler Necks and Lock Rings

Direct OE Replacement

Fuel tanks include:

NEW

Lock Ring and Seal

Features and Benefits

- Tanks are constructed from galvanized steel and painted for an extra layer of corrosion protection.
- Dorman Fuel Tank program complements your existing sending unit sales.

Also Available Separately

2006 Quick Ship Program

Order just the Fuel Tanks you need as part of your regular Dorman® order to reduce your freight expense and avoid overstock situations.

Activant Path

Fuel Pump, Tank & Turbo System

55160 (1) GM Fuel Pump Pulsator

Prevent comebacks.
Replace with every GM in-tank
fuel pump. Eliminates fuel pump vibration
and noise. Mounts directly on fuel pump.
Fits various GM vehicles with in-tank
mounted fuel pumps, 1999-84. Great add-on
sale for pump or sender sales. Always
replace the pulsator to eliminate potential
comebacks.

Harmonic Balancers

Industry Leading Coverage

NEW! for 2006

594-181

Solid

2006-96 V-6-262; 4.3L, Chevrolet/GM Blazer, Bravada, Chevrolet 1500 Pickups; GMC Van, Envoy, S10, S15

594-189

Serpentine Belt

2006-97 8 Cyl.-280, 4.6L, Ford Truck Expedition, F150, F250, E150, E250

Woodruff Key Included
(where required)

Helpful Tips From Your Harmonic Balancer Experts:

- Inspect Original Balancer for signs of Rubber Deterioration that causes Timing Marks to Slip.
- Check Belt Wear, Front Crank Seal Leakage and Worn Belt Tensioners.
- ALWAYS Compare Timing Marks of Replacement Balancer with the Original Balancer.

Use Harmonic Balancer Puller (**594-999**) for proper installation.

Harmonic Balancers

594-001

Serpentine Belt

1990-88 3.8L (231) Buick, Oldsmobile, Pontiac.

Diameter 7-1/8"

Width 3-3/4"

Weight (lbs.) 8.35

594-002

Solid Back

1996-69 5.7L (350) Chevrolet, GMC Truck; 1982-77 Motorhome

Diameter 8"

Width 2-3/8"

Weight (lbs.) 10.75

594-003

Serpentine Belt

1988-86 3.8L (231) Buick, Oldsmobile, Pontiac.

Diameter 7"

Width 3-3/4"

Weight (lbs.) 7.7

594-004

Serpentine Belt

2005-93 3.8L (231) Buick, Chevrolet, Oldsmobile, Pontiac.

Diameter 7"

Width 3-3/4"

Weight (lbs.) 8.45

594-005

Serpentine Belt

1992-91 3.8L (231) Buick, Chevrolet, Oldsmobile, Pontiac.

Diameter 7"

Width 2"

Weight (lbs.) 7.88

594-006

Hollow Back

1986-77 5.7L (350) and 5.0L (305) Chevrolet, GMC Truck.

Diameter 8"

Width 2-3/8"

Weight (lbs.) 10.85

594-007

Serpentine Belt

1994-92 2.3L (140) Ford Tempo, Mercury Topaz.

Diameter 5"

Width 2"

Weight (lbs.) 4

594-008

Serpentine Belt

1994-87 2.8L (173), 3.1L (189) Buick, Chevrolet, Oldsmobile, Pontiac.

Diameter 6-1/8"

Width 2"

Weight (lbs.) 5.15

594-009

Hollow Back

1993-77 5.0L (305), 5.7L (350) Buick, Cadillac, Chevrolet, Oldsmobile, Pontiac, GMC Truck.

Diameter 6-3/4"

Width 2-3/8"

Weight (lbs.) 8.65

594-010

Solid; Externally Balanced

1990-70 7.4L (454) Chevrolet, GMC Truck.

Diameter 8"

Width 2-3/4"

Weight (lbs.) 16.88

594-011

Solid; Externally Balanced

1997-82 5.8L (351) Ford, Mercury, Ford Truck.

Diameter 6-3/8"

Width 4-1/8"

Weight (lbs.) 7.25

594-012

Solid

1995-69 5.0L (305), 5.4L (327), 5.7L (350) Chevrolet, GMC Truck, Oldsmobile, Pontiac.

Diameter 6-3/4"

Width 2-3/8"

Weight (lbs.) 8.36

Harmonic Balancers

594-013

Solid; Externally Balanced
1987-82 2.8L (173) Chevrolet, Pontiac, GMC Truck.

Diameter 5-1/2"
Width 3-1/4"
Weight (lbs.) 5.6

594-014

Hollow Back, Double Groove
1974-66 4.1L (250) Buick, Chevrolet, Oldsmobile, Pontiac, GMC Truck.

Diameter 6-3/4"
Width 1-1/2"
Weight (lbs.) 7.5

594-015

Hollow Back, Double Groove
1984-77 4.1L (250) Chevrolet, GMC Truck.

Diameter 6-3/4"
Width 1-7/8"
Weight (lbs.) 8.5

594-016

Solid; Externally Balanced
1980-70 6.6L (400) Chevrolet, GMC Truck.

Diameter 8"
Width 2-3/8"
Weight (lbs.) 12.4

594-017

Serpentine Belt
1997-93 4.3L (265), 5.7L (350) Buick, Chevrolet, Pontiac, Cadillac.

Diameter 7-1/2"
Width 1-3/8"
Weight (lbs.) 8.4

594-018

Serpentine Belt
2000-84 4.0L (242) Jeep; 1986-84 2.8L(173) Cherokee, Comanche

Diameter 7-1/2"
Width 1-7/8"
Weight (lbs.) 8

594-019

Solid, 9/16" Step; Externally Balanced
1981 5.0L (302) Ford Truck Exc. Calif.

Diameter 6-2/5"
Width 4-1/8"
Weight (lbs.) 10

594-020

Solid, Hollow Back
1986-82 2.8L (173) Buick, Chevrolet, Oldsmobile, Pontiac, VIN X, Z Stamped 4874.

Diameter 6-3/8"
Width 2-5/16"
Weight (lbs.) 5.25

594-021

Solid
1993-72 3.9L (239), 5.2L (318), 5.6L (340) Dodge, Plymouth, Chrysler, Dodge Truck, Plymouth Truck, with Forged Steel Crankshaft

Diameter 7-1/4"
Width 2-1/2"
Weight (lbs.) 8

594-022

Single Groove
1986-75 3.8L (232), 4.2L (258) American Motors, Jeep.

Diameter 6-3/4"
Width 1-7/8"
Weight (lbs.) 6.25

594-023

Solid, Hollow Back; Externally Balanced
1980-69 5.0L (302) Ford, Lincoln, Mercury, Ford Truck.

Diameter 6-1/2"
Width 4-1/4"
Weight (lbs.) 11

594-024

Solid; Externally Balanced
1995-84 5.0L (302) Ford, Lincoln, Mercury, Ford Truck.

Diameter 6-1/2"
Width 4-1/4"
Weight (lbs.) 9.5

Harmonic Balancers

594-026

Solid; Externally Balanced

1993-91 7.4L (454) Chevrolet, GMC Truck.

Diameter 8"
Width 2-3/4"
Weight (lbs.) 16.54

594-027

Hollow Back, Serpentine Belt

1992-87 2.5L (151) Buick, Chevrolet, Oldsmobile, Pontiac.

Diameter 6"
Width 1-1/2"
Weight (lbs.) 4.3

594-028

Solid

1990-75 4.3L(260), 5.0L(307), 5.7L(350), 6.6L(403) Buick, Cadillac, Chevrolet, Oldsmobile, Pontiac.

Diameter 5-1/2"
Width 2-3/8"
Weight (lbs.) 5.8

594-029

Hollow Back, Double Groove

1976-75 4.1L (250) Buick, Pontiac, Chevrolet, Oldsmobile, GMC Truck

Diameter 6-3/4"
Width 1-7/8"
Weight (lbs.) 8.4

594-030

Solid

1975-66 6.5L (396), 6.6L (400, 402), 7.0L (427) Chevrolet, GMC Truck.

Diameter 7"
Width 2-3/4"
Weight (lbs.) 10.6

594-031

Double Groove w/1/4" Div.

1990-75 4.8L (292) Chevrolet, GMC Truck.

Diameter 6-3/4"
Width 2-1/2"
Weight (lbs.) 10.45

594-032

Triple Groove w/9/16" Step

1995-85 2.3L (2316) Volvo 240, 242, 244, 245, 740, 745, 760, 780, 940, 940.

Diameter 7"
Width 3-1/2"
Weight (lbs.) 6.9

594-033

Serpentine w/Sensor Ring

2001-91 1.9L (116); 2.0L(122), Mercury Tracer.

Diameter 5-3/4"
Width 1-1/4"
Weight (lbs.) 4.7

594-034

Serpentine Belt

1994-93 3.8L (231) Buick, Chevrolet, Oldsmobile, Pontiac.

Diameter 6-3/4"
Width 3-1/2"
Weight (lbs.) 11.4

594-037

Serpentine Belt Pulley

2002-94 6.5L (395); 1993-88 6.2L(379) Diesel Chevrolet, GMC Truck.

Diameter 7-3/4"
Width 1-1/2"
Weight (lbs.) 7.8

594-042

Serpentine Belt

1995-86 4.1L (250), 4.5L (273), 4.9L (300) Cadillac.

Diameter 7-3/8"
Width 1-3/4"
Weight (lbs.) 5.7

594-043

Serpentine Belt

2002-87 2.3L (138), 2.4L (146) Buick, Chevrolet, Oldsmobile, Pontiac.

Diameter 6-3/4"
Width 1-3/4"
Weight (lbs.) 4

Harmonic Balancers

Harmonic Balancers

594-044

Serpentine Belt

1992-89 3.3L (204) Buick Century, Somerset & Oldsmobile Ciera, Calais.

Diameter 7"
Width 3-1/2"
Weight (lbs.) 7.25

594-047

Solid

1995-85 4.3L (262) Chevrolet, Oldsmobile, GMC Truck.

Diameter 6-1/4"
Width 2-7/8"
Weight (lbs.) 5.35

594-050

Reverse Thread, Plastic Body w/Metal Shaft

2003-96 3.0L (DOHC) Ford Taurus, Mercury Sable

Diameter 6.5"
Width 4.375"
Weight (lbs.) 2.01

594-051

Solid w/ Sensor Ring

1997-94 3.8L (232) Ford Windstar, Thunderbird, Mustang II, Mercury Cougar.

Diameter 6"
Width 3-1/2"
Weight (lbs.) 4.9

594-052

Double Serpentine Belt

1999-94 Hyundai Scoupe, Accent (SOHC) 1.5L.

Diameter 6"
Width 2"
Weight (lbs.) 3.9

594-053

Double Serpentine Belt

1999-95 Hyundai Accent (DOHC) 1.5L & 1.6L

Diameter 5-1/2"
Width 2"
Weight (lbs.) 3.5

594-054

Serpentine Belt

1994-90 1.5L Hyundai Excel, Scoupe, Mitsubishi Precis

Diameter 5-3/4"
Width 1-3/8"
Weight (lbs.) 2.8

594-055

Double Serpentine Belt

1995-92 1.6L (1595cc) Hyundai Elantra, 1998-95 2.0L (1997cc) Hyundai Sonata.

Diameter 6-3/8"
Width 1-7/8"
Weight (lbs.) 4.6

594-056

Single Serpentine Belt

1996-95 3.0L (2972cc) Mitsubishi Montero Sport, 2000-94 3.5L (3497cc) Mitsubishi Montero, Montero Sport

Diameter 6-1/8"
Width 3-5/8"
Weight (lbs.) 9.4

594-057

Triple Groove

1994-85 2.0L (1985cc) Saab 900 w/Turbo.

Diameter 6"
Width 2-1/4"
Weight (lbs.) 5.9

594-058

Triple Groove

1984-79 2.0L (1985cc) Saab 900.

Diameter 6"
Width 2-3/4"
Weight (lbs.) 6.2

594-059

Triple Groove

1994-85 2.0L (1985cc) Saab 900 w/o Turbo.

Diameter 6"
Width 2-1/8"
Weight (lbs.) 5.4

Harmonic Balancers

594-060

Single Serpentine Belt

1990-86 2.0L (1985cc) Saab 9000 w/Turbo.

Diameter 6-1/4"
Width 2-3/8"
Weight (lbs.) 6.2

594-067

Double Serpentine Belt

1997-94 2.2L (2156cc) Honda Accord, Odyssey, 1997 Acura CL.

Diameter 7-1/8"
Width 3-3/8"
Weight (lbs.) 5.5

594-068

Double Serpentine Belt

1996-90 2.2L (2156cc), 2.3 (2259cc) Honda Accord, Prelude.

Diameter 7-1/8"
Width 3-3/8"
Weight (lbs.) 5.6

594-069

Double Serpentine Belt

1993 Hyundai Excel, Scoupe w/Beta 1.5L Engine to Nov. 15,1992

Diameter 6"
Width 2"
Weight (lbs.) 3.9

594-070

Double Serpentine Belt

1993 Hyundai Excel, Scoupe w/Beta Engine from Nov. 15,1992

Diameter 6"
Width 2-1/8"
Weight (lbs.) 7

594-071

Single Serpentine Belt

1998-90 3.0L (2972CC) Hyundai Sonata.

Diameter 6-3/8"
Width 2"
Weight (lbs.) 5.3

594-073

Double V-Groove

1995-78 Toyota Celica, 4 Runner, Truck 22RE, 22REC, 22RTEC 2.4L;2.2L 20R

Diameter 6-1/4"
Width 2-3/8"
Weight (lbs.) 7

594-074

Triple Groove

1993-89 2.3L (2316cc) Volvo 740, 745, 940 B234F.

Diameter 6-1/4"
Width 3-1/8"
Weight (lbs.) 7.8

594-077

Triple Groove

1989-80 4.9L (300) Ford F-Series Pickups, Bronco, Econoline Vans.

Diameter 6-3/4"
Width 2-3/4"
Weight (lbs.) 11

594-078

Single Serpentine Belt

1995-88 3.0L (2958cc, 2959cc) Toyota Pickups, T100, 4 Runner V6.

Diameter 6-1/4"
Width 2-1/2"
Weight (lbs.) 5.6

594-080

Solid

1995-80 7.5L (460) Ford F-Series Pickups, Econoline Vans.

Diameter 6-3/4"
Width 2-1/2"
Weight (lbs.) 8.4

594-081

Serpentine Belt 6 Groove

2003-92 4.6L (281) Ford, Lincoln, Mercury, Ford Truck. 2 WD

Diameter 6-7/8"
Width 1-3/4"
Weight (lbs.) 5.8

Harmonic Balancers

Harmonic Balancers

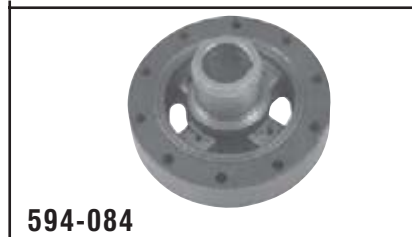

594-082

Serpentine Belt
1999-96 3.4L (207) Ford Taurus.
Diameter 8"

Harmonic Balancer Puller
This puller is designed to pull crankshafts, vibration dampers, pulleys or any gear with tapped holes. The four slots in the yoke allow the use of this tool for either two or three hole applications. The floating swivel prevents damage to the shaft ends.

Prevent a Breakdown: Watch For These Telltale Signs!

- **Corrosion**
- **Poor Grounds** - overheats electronics
- **Seals & Shafts Wear** - allows oil to get into the electronics/sensors
- **Bushing/Bearing Failure**
- **Excessive Heat** – causes burnt contacts
- **Loose Timing Belts** – allow camshaft that drives Distributor to jump or spin causing loose screws

Diagnostic Tips

Distributor failures are generally mechanical or electrical type failures.

- **Mechanical:** are often the result of a loose timing belt. The slack in the timing belt allows the camshaft that drives the distributor to jump or spin back and forth. Over time, the back and forth motion will loosen screws. The result is a damaged distributor.
- **Electrical:** A poor ground connection will cause the ignitor to fail.

Tech Tips

- Mark the position of the rotor prior to removal of the Distributor. This will aid in installing the replacement unit into the proper position.
- Install the replacement Distributor so the rotor points in the same way.
- Always compare the original distributor to the replacement unit. Pay special attention to the area below the flange. Check all dimensions!
- Lubricate the O-ring before inserting the Distributor into the engine to prevent it from tearing.
- Use caution when plugging in the electrical connectors to prevent bent pins.
- Do not force the Distributor into the engine or use a bolt to pull it into the block! Damage to the Distributor and/or engine may occur.
- Inspect all components (spark plugs, wires, etc.) in the ignition system for wear and/or corrosion. Replace as necessary.

Prevent Comebacks

IMPORTANT!

Compare replacement distributor to original unit before replacement. The replacement distributor's gear size, number of teeth, shaft length and hex drive size (where applicable) must **MATCH** original to prevent damage to engine.

Intake Manifold Kits

Dorman-engineered to prevent failure from reoccurring

- Offering the Manifolds That Are Most **Failure Prone**
- Direct OE Replacement

4.6L GM

Dorman® OE Solutions™

Intake Manifold Kits Feature:

- Reinforced aluminum coolant crossover means no repeat failure due to corrosion and vibration.
- Integrated silicone gaskets mean no separate gaskets to deal with, and fewer leak paths at cylinder heads and throttle body.
- Components included.

Typical Failure

- OE Intake cracks due to coolant corrosion and alternator vibrations.

3.8L GM

Dorman® OE Solutions™

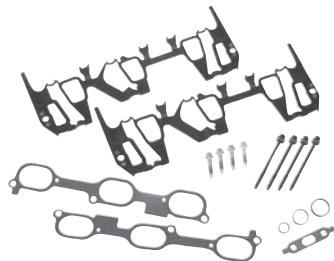

Intake Manifold Kits Feature:

- Reinforced EGR and coolant passage walls for greater durability.
- Includes everything needed to install:
 - Throttle body and intake manifold gasket
 - PCV O-ring and valve cap
 - Breather tube assembly and O-ring
 - Replacement EGR sleeve

Typical Failure

- EGR gas and coolant corrode plastic passages, causing leakage into the engine.

GM Intake Manifold Reseal Kit

- For GM 3.1-3.4 Intake Manifolds
- **ALL** the components needed to **COMPLETE** the job
- Kit includes:
 - New bolts with thread locker
 - Two heater tube O-rings
 - Distributor O-ring
 - EGR valve gasket

Ford Windstar Intake & Valve Cover Repair Kit

- **Dorman Solution:**
 - Complete Kit/One SKU
 - Includes all parts to repair the problem and prevent recurring symptoms
- OE Recognized Problem - Ford TSB - 03-16-1

Activant Path

Applications begin on page 275.

Intake Manifolds Kits

- Reinforced In Failure Prone Areas
- Complete with all Gaskets and O-Rings Needed for Installation

615-175

Ford V8 - 4.6L
2006-99, Includes Thermostat, Alternator Brackets and all Gaskets and O-Rings needed for Installation.

615-176

Ford - 4.0L
2001-97, Includes all Gaskets and O-Rings needed for Installation.

Intake Manifold Kits

615-178

Ford 4.6L V-8
2000-96, Includes Thermostat, Alternator Brackets and all Gaskets and O-Rings needed for Installation.

615-179

GM 3.8L Series I V-6
1995-93, Includes Plastic Vacuum Manifold, and all Gaskets and O-Rings needed for Installation.

615-180

GM 3.8L Series II V-6
2005-95, Includes PCV Valve Retainer, Plastic Vacuum Manifold, and all Gaskets and O-Rings needed for Installation.

615-181

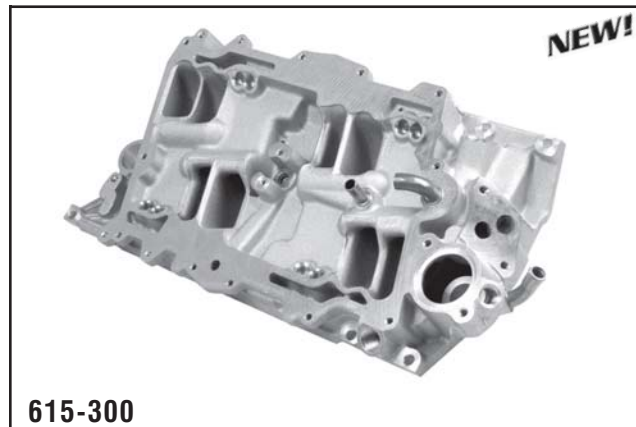

GM 5.0L & 5.7L Vortec® V-8
2002-96, Includes Plastic Vacuum Manifold, and all Gaskets and O-Rings needed for Installation.

Intake Manifolds Kits

615-182

GM 4.3L V-6 Vortec
2006-96, Includes Plastic Vacuum Manifold, and all Gaskets and O-Rings needed for installation.

615-300

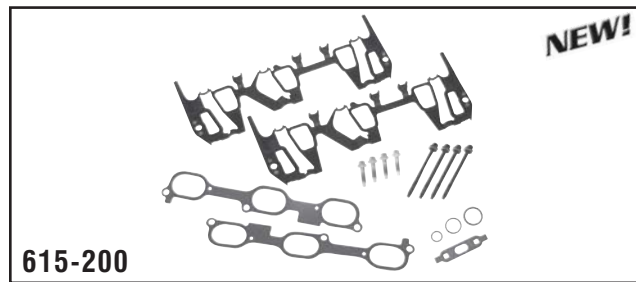

GM
2002-96 Chevrolet/GMC Trucks. Aluminum lower manifold (use with 615-181 upper plenum).

Gasket Kits

615-177

Valve Cover Repair Kit
Ford Windstar 3.8L, 2003-99. Includes Valve Cover, PVC Line, Fuel Pressure Regulator Vacuum Line, 8 Intake Isolator Bolts, Throttle Body Gasket, Idle Speed Control Gasket, Upper Intake Gasket, 6 Intake Port Gaskets.

615-200

Valve Cover Repair Kit
GM 3.1L & 3.4L. Includes Upper & Lower Manifold Gasket Set, 8 Intake Bolts with Thread Locker, 2 Heater Tube O-Rings, Distributor O-Ring, EGR Valve Gasket.

Latches

Coverage for most failure-prone domestic and import applications

- Quality construction for long life
- Latches should be checked during routine inspection for rust and/or corrosion

315-100 Hood Latch
GM
2005-82

315-102 Door Latch
GM
2005-93

315-401 Hood Latch
Toyota
1997-93

Features and Benefits

- Direct OE Replacement - Fit, Form and Function
- A “must replace” item (safety)
- Not just a crash item - 65% of failure due to mechanism failure

Related Sales *Door Striker Bolts*

Oil Drain Plugs
with Gaskets

Oil Pans

Dorman OE Solutions Oil Pans Feature:

- 75 SKUs of failure-prone domestic-import applications
- 95% market coverage
- Steel pans coated for superior corrosion resistance
- New, not reconditioned

Includes Drain Plug
and Drain Plug
Seal

3 Cast Aluminum Aftermarket Exclusives

264-101

GM Beretta, Cutlass Calais & Supreme,
Grand Am, Grand Prix, Skylark 1991-87

264-102

Quick Disconnect™

The only Aftermarket Source for a Full Line of Quick Connectors...

Fuel Sending Unit & Fuel Line Repair Kits

- Repairs rusted, twisted, or broken nylon & steel fuel lines
- Repairs rusted, broken sending unit lines...No need to replace entire unit!

Transmission and Oil Cooler Connectors

- Connect transmission lines to transmission & radiator
- OE exact-fit replacements

Cooling System Quick Connectors

- Heater hose quick connectors & retaining clips
- Direct OE Replacement

Activant Line Codes

DMC - Cooling/Heating Connectors
DFQ - Fuel Line Connectors
DMT - Transmission Connectors

Applications begin on page 343.

800-500 Steel Fuel Line Repair Kit

**OVER
150
PIECES**

- **Easily Repair Any Fuel Problem**
- **Save Time & Money! Replace Only the Damaged Section**

Like Having 1,000 Fuel Lines in Your Toolbox!

800-300 Nylon Fuel Line Repair Kit

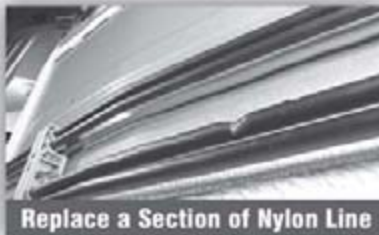

Quick Disconnect

- Easily Attach Quick Connector Fittings
- Splice Plastic Lines

Repair a Broken Plastic End

Replace a Section of Nylon Line

Replace the Entire Plastic Fuel Line Assembly

- Easily Repair Any Fuel Problem
- Save Time & Money!
Replace Only the Damaged Section

Like Having 1,000 Fuel Lines in Your Toolbox!

Radiator Fan Assemblies

Dorman Radiator Fan Assemblies Save Time and Money

Option 1: Unprofitable

Rebuild the Fan Assembly with replacement motors

- Rebuilding takes up to an extra 1-1/2 hours to replace the motors.
- Some OE motors are permanently staked to the shroud, requiring grinding to remove.
- Replacement motors do not include new fan retainers and motor mounting hardware.
- Rebuilding risks breaking the fan or shroud.

Option 2: Profitable

Install a NEW Dorman Radiator Fan Assembly

- Reduce labor complexity with a bolt-off/bolt-on installation.
- Saves valuable service bay time vs. component replacement.
- Better value vs. component pricing
- More professional job/reduce comebacks when second motor fails.

Dorman Radiator Fan Assemblies Offer Quality Products and High Application Coverage

- Dorman assemblies meet or exceed service dealers expectations for electrical performance, air flow, and strength
- All motors are tested by an independent lab to ensure quality
- Dorman has re-engineered failure-prone OE versions correcting original design problems
- Dorman offers 259 assemblies, leading the marketplace in application coverage

Dorman Rear Axle Shaft Kits – Do the job right!

Common signs to replace your Rear Axle:

- Grinding sound in axle area could mean the bearing has seized to the shaft surface
- Bent Rear Axle – Shakes vehicle when driving
- Unusual tire wear
- Loss of rear wheel drive or power

Always **CHECK** Rear Axle Splines and Axle Shaft for cracks or flat spots when doing Rear Axle overhauls and repairs.

Related Rear Axle Shaft Sales

81048

Differential Shaft Lock Bolt

Fits GM vehicles 1994-90, Ford 2003-80, Ford cars and trucks 2003-80. Retains pinion shaft. Must be removed to perform rear differential work or when replacing rear axle shafts. Bolts break, wear out or are often misplaced.

81050

Axle Shaft Lock (C-Clips)

GM. Replaces lost or damaged rear axle locks. Worn or damaged locks should be replaced to ensure proper axle lock-in. Axle locks should be replaced whenever axle work is performed. Available in two sizes to provide a proper fit.

81053

Pinion Nut

GM 1995-61. Prevailing torque style. 7/8"-14.

Timing Cover Kits

Signs that a Timing Cover needs to be replaced:

- Aluminum Timing Covers can
 - Leak
 - Warp
 - Crack
- Can be damaged upon removal
- Failure of the Timing Chain can also cause damage internally to the Cover.

Kit contents include:

- Timing Cover
- Gasket
- Seal, if necessary
- Oil Pump Gasket, when required

Replace Timing Cover during:

- Front End Collision
- Harmonic Balancer Failure
- Oil Pump or Water Pumps Failure
- Timing Chain Replacement

- Investigate all unusual engine noises! A wobbling water pump impeller can rub through the Timing Case Cover, causing antifreeze to enter the engine oiling system. Engine lubrication failure and damage to the bearings and other engine components will occur very quickly!
- When performing Timing Case Cover replacement, check all accessory drive belts, timing belt, harmonic balancer, water pump, and engine hoses. Replace as necessary.

Timing Cover Kits

Transmission Line Assemblies

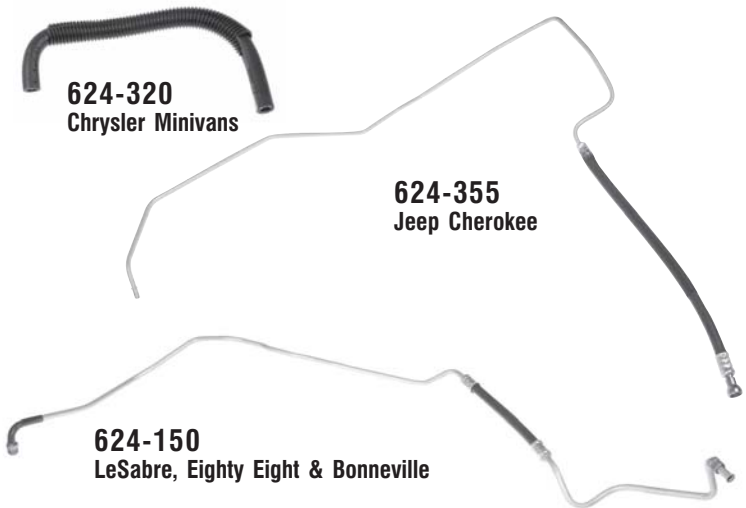

*A little leak could mean big problems down the road.
Replace transmission lines at the first sign of failure.*

• **191 SKUs—the coverage you need**

Typical Failures

- Combination steel and rubber lines fail at the crimps due to compression set
- Steel lines corrode at connections
- Rubber lines dry-rot and crack
- If not replaced leaking lines can cause costly transmission damage

624-320
Chrysler Minivans

624-355
Jeep Cherokee

624-150
LeSabre, Eighty Eight & Bonneville

Dorman® OE Solutions™
Transmission Lines
feature:

- Exact OE Replacement
- Quality construction to prevent comebacks

Transmission Lines should be checked for leaks at every service.

Transmission Shift Solenoid Pack

Direct OE Replacement

1 SKU
Covers Over
20 Different Models
and 10 Million
Registered
Vehicles

Easy to Diagnose

- Poor Shifting Quality
- Suddenly Locks into Second Gear (“Limp Home” mode)

Easy to Replace - Externally Mounted

- Extremely Failure-Prone Chrysler Transmission Shift Solenoid Available at a Price That is Competitive with OE!
- Fits 2004-89 Chrysler Cars/Minivans with Overdrive (A604) Transmissions
- New **Hydraulic** Solenoid Technology — NOT Included in Most Traditional Transmission Solenoid Suppliers’ Programs

Transmission Shift Solenoid #698-100

Symptom: Poor Shift Quality. Car goes into "Limp Mode."

Solution: Dorman OE Solutions™ #698-100, just one SKU covers 2005-89 Chrysler Cars/Minivans with A604 transmission. That translates into coverage for over 20 different models and 10 million registered vehicles.

Dorman's **698-100** provides a solution that is easy to replace and externally mounted.

Window Lift Motor Kits

100% NEW!

Dorman Window Lift Motor Kits – NEW for the same price as reman!

- Dorman quality Window Lift Motor Kits mean fewer comebacks.
- Supplied with OE type connector, no wire cutting or splicing.
- Do the job right the first time.
- All the parts necessary to do the job.

Install With Confidence Using 100% NEW Dorman Window Lift Motors

OE and Other Aftermarket Suppliers – 3 SKUs

WINDOW LIFT MOTOR KITS

- Compare the replacement unit to the original. Note all mounting bolts and brackets locations.
 - Follow all window alignment procedures outlined in the shop manual.
 - Carefully follow all warnings and cautions outlined in the vehicle's service manual.
-
- Use the proper tools for removal of the door panel.
 - Use caution when removing interior door panels. Plastic panels can be easily damaged.
 - Replace all broken door panel clips.
-
- Use caution when handling or removing glass.
 - Bolts and nuts may be substituted for pop rivets.
- See instructions included with part.

45319 (10)

Door Panel Retainer Assortment

Special molded nylon. Holds panel to door frame. Four sizes. Fits domestic models.

Window Lift Motor Kits

WINDOW LIFT MOTOR KITS

- Compare the replacement unit to the original. Note all mounting bolts and brackets locations.
 - Follow all window alignment procedures outlined in the shop manual.
 - Carefully follow all warnings and cautions outlined in the vehicle's service manual.
-
- Use the proper tools for removal of the door panel.
 - Use caution when removing interior door panels. Plastic panels can be easily damaged.
 - Replace all broken door panel clips.
-
- Use caution when handling or removing glass.
 - Bolts and nuts may be substituted for pop rivets.
- See instructions included with part.

45319 (10)

Door Panel Retainer Assortment

Special molded nylon. Holds panel to door frame. Four sizes. Fits domestic models.

Window Regulators

189 SKUs Covering Over 120,000,000 Vehicles

- Largest coverage of window regulators in the aftermarket. Coverage includes most domestic and import applications, **MANUAL and POWER** regulators
- Regulators include all of the components necessary to do the job right the first time
- Engineered to match original equipment quality, PLUS includes additional value-added components to help with installation not offered with OE regulator.

740-836, 740-835
Grand Am, Skylark, Achieva; Manual

Where applicable Kit contents include:

Rivets, Hardware, and Door Panel Clips

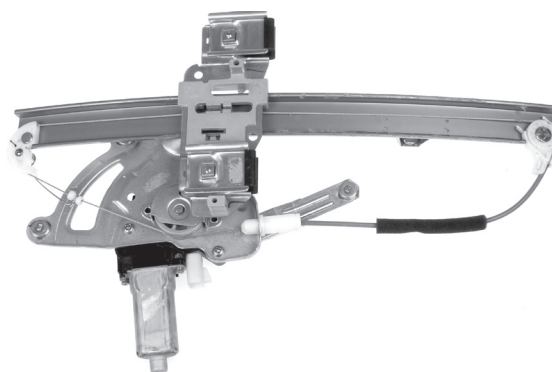

Part No. **Prefix 740 = Regulator w/o Motors**

740-664, 740-665
Ford Crown Victoria

Part No. **Prefix 741 = Regulator/Motor Assembly**

741-817, 741-818
Pontiac Bonneville

Trucks & Vans

AVOID COMEBACKS

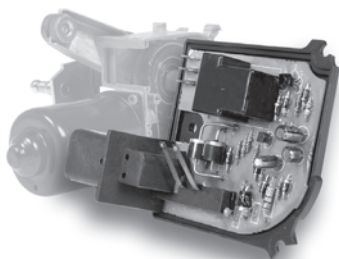

Avoid comebacks from inconsistent reman quality. Would you want your customers to see smoke?

REMAN LABEL WARNING:

NOTICE: Do not be alarmed, smoke coming from motor is due to fresh paint. Condition is normal. Allow 1 hour of operating to clear smoke.

Also Available from HELP! Check Motormite® Catalog #MM24010 for more details.

88136

Related Sales - Windshield Wiper Linkage Bushings

49447 (7)

Windshield Wiper Linkage Bushing Assortment **BETTER VALUE**

Chrysler 2004-74, Jeep Cherokee 2000-93, GM C/K Series 2004-88. Bushings are part of wiper transmission linkage and connector assembly. Not sold separately at OE dealer. Kit contains 49440, 49445 and 49446.

49448 (5)

Windshield Wiper Linkage Bushings

Fits Toyota Camry 2001-97, Corolla 2002-98. Bushings are part of the wiper pivot arm and connector assembly. Easily repair worn bushings instead of replacing entire linkage. Bushings not available separately from OE dealer.

49449 (2)

Windshield Wiper Linkage Bushings

Nissan Altima 2001-88. Not available separately from dealer.

Wiper Transmission Linkages

Will it Work or Not?

- **GM Recalls OE Boards**

General Motors used an intermittent wiper board assembly that covered GM trucks from 1988 through 2003 model years. Unknown at the time of production, were several design defects that did not surface until later. These defects eventually led to a recall by GM.

88136
GM Wiper Pulse Board

GM trucks, 2003-88. Includes new cover plate and hardware.

- **Original Unit Failures**

The original unit used a technique in which the electronic components were soldered to the surface of the board. As part of the build process, a clear coating called “Conformal” coat was sprayed on the board to protect the electronic components and the circuit board from corrosion. In the original configuration, the Conformal coating would move components that were soldered to the board as it heated and cooled. This pushing and pulling motion caused component connections to come loose. As a direct result of thermal stress, cracks would appear on the surface of the printed circuit board. These cracks (due to poor quality solder joints), would open when the board got hot. Any of these conditions could lead to intermittent operation or in some cases complete failure of the intermittent function of the wipers.

- **DORMAN® Improvements**

The Dorman® **88136** incorporates several improvements:

- new soldering techniques
- a double sided board with plated through holes
- better terminal solder adhesion
- better resistance to thermal stress
