

LIGHTING CATALOG 2013

Don't Change... Evolve.

VISTAS

What are Vistas?

Vistas bulbs are DOT approved and can be legally operated on all roads in the United States. They have the same tone of white light that the vehicle's existing OEM bulb has and their brightness level is about 15% higher. They are manufactured with high-quality components and will continue functioning for more than 2000 hours.

Why Choose Vistas?

Choose Vistas if you want to replace the original factory headlight bulb with a product that offers equal or better quality and brightness. In addition, Vistas are DOT approved.

- Vistas use long life filaments. They provide more than 2000 hours of light.
- Vistas project white light with a tone that is similar to a vehicle's original factory bulb.

DOT Approved

Vistas*
~1300 Lumens

~1000 Lumens
Original

1300 Lumens Can vary depending on the bulb size

SPECTRAS

What are Spectras?

Spectras bulbs emulate the wide variety of headlight colors that can be achieved through HID Xenon lighting systems. There are two performance oriented colors available in the Spectras program: "Ultra-White", which emulates a 5000K HID bulb. And a "Cold-Blue", which emulates a 8000K HID bulb.

- Completely safe for any vehicle

- Spectras emit **90/100 Watts of Light**

For only **65/75 Watts of Power**

Ultra-White
5,000K

Blue
8,000K

ALFAS

What are Alfás?

Alfas are the best approximation to a full HID lighting system. They are extremely bright and don't require a complicated electrical installation. Simply remove your existing bulb and install the Alfás bulb. They require no modifications to your vehicle, no complications and do not have the excessive cost of an HID system.

There are four distinct types of Alfás that fulfill specific lighting needs.

ALFAS
MAXIMUM INTENSITY

MAXIMUM
LIGHT OUTPUT

Choose these Alfás if you want the maximum amount of light output. Project approximately two times the amount of light compared to a normal halogen bulb.

LED HEADLIGHT STROBES

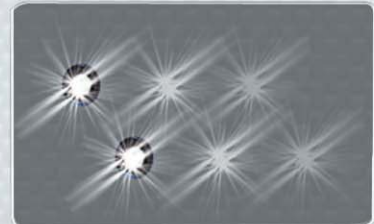

Brighter than Traditional Strobes
Huge 3Watt LEDs emit more than 180lm per bulb.

Use a special acrylic lens that focuses and amplifies the light.

New Base - Twist into position

"Fast, Triple-Flash Action"

- Resistant:** Made with strong materials. Water and impact resistant.
- Better:** Strobes made with LEDs are better than traditional glass strobes.
LED strobes are whiter, brighter and last longer.
- 12V Connection:** Connect directly to the vehicle electrical system without transformers.

Part Number - Color:

WHITE	BLUE	RED	RED - BLUE
#93184	#93195	#93194	#93192

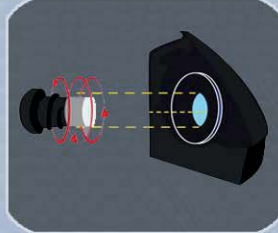

LED COP STROBES

- Powerful, Professional Grade Strobes

- Each bulb emits more than 300lm of light

NEW BASE TWIST INTO POSITION

USE SWITCH TO SELECT BETWEEN "STEADY ON" AND 5 DIFFERENT FLASHING SEQUENCES

EACH BULB PROJECTS LIGHT IN ALL DIRECTIONS

PROJECT LIGHT IN ALL DIRECTIONS

STEADY ON + 5 FLASHING SEQUENCES

Waterproof: Control box and strobe bulbs are waterproof

FLEXIBLE STROBE BAR / EVO EYES

Flexible Strobe Bar

Fast, Scanning strobe sequence

Completely flexible

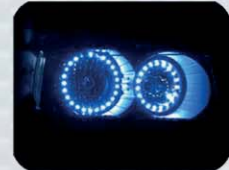

- **New LEDs:** Massive Strobe Flashes
- **100% Waterproof:** Completely encapsulated inside of a protective resin
- **Thin:** Only 1.5mm thick. Easy to hide anywhere
- **Easy to Install:** Includes **AUTHENTIC ADHESIVE 3M**
- **Try-Me Button:** Includes batteries and a button to test inside of the package.
- **12V Connection:** Connect directly to the vehicle electrical system without transformers

LED EVO EYES (Halos)

Made with High-Temperature Resistant Materials
Completely safe for using inside of the headlights

Large quantity of LEDs in each ring.
Looks like an uninterrupted ring of light

Two Sizes: 9cm (with 24 LEDs)
and 12cm (with 36 LEDs)

- Maximum Intensity
- Easy to Install, Includes **AUTHENTIC ADHESIVE 3M**
- Available in two sizes: 12cm and 9cm
- All components are able to handle the high temperatures of a headlight
- **12V:** Connect directly to the vehicle 12V electrical system without a transformer.
- **Lots of LEDs:** 36 LEDs in the 12cm rings and 27 LEDs in the 9cm rings.

LED DOME LIGHTS/CANBUS LED T-10

MEGA Dome Light

Like having HID Xenon inside of your car.

Actual Size

Uses 15 LEDs for Maximum Intensity

Includes 4 adapters for universal installation

12V: Simply connect to any included socket on the vehicle. Adheres with **3M** AUTHENTIC ADHESIVE.

Part Number - Color:

White - #93346

Canbus T10 Bulbs

"SENSOR SAFE" Will not activate warning lights

Canbus 4 Leds

4 Lateral LEDs: Perfect for interior lights on a vehicle

Actual Size

Easy Installation: Installs on any vehicle without modifications.

12V Installation: Works with 12V vehicle electrical systems.

Part Number - Color:

T-10 4 Leds

White

#93140

CANBUS Dome Light

SENSOR SAFE: Will not activate warning lights
Powerful 3WATTS LED - 180lm

Small: Only 25mm x 30mm - easily fits inside majority of vehicle dome lights

12V: Simply connect to any included socket on the vehicle
Adheres with **3M** AUTHENTIC ADHESIVE.

Actual Size

Includes 4 adapters for universal installation

Part Number - Color:

Blue - #93344

White - #93345

LED T-10 Bulbs 4 Leds

Powerful and Economic: Each bulb uses 4 LEDs

New Color: "Xenon" - created by combining White and Blue.
Perfect for using with HID kits.

2 X White
2 X Blue

Project light forward

Actual Size

Easy to Install: Connect to any vehicle without modifications

12V: Simply connect to any T-10 socket on the vehicle

Part Number - Color:

White - #93156

Xenon - #93158

LED T-10/T-5 BULBS

LED "Bullet" Strobes

Fast, "Triple-Flash" Strobe Sequence
"Plug n' Play" - No installation required
Great option for Strobes that require no installation.

LED "Bullet" T-10 Bulbs

Very Powerful: 1WATT LED per bulb
Most powerful LED T-10 Bulbs in the market

Easy to Install: Connect to any vehicle without modifications **12V:** Simply connect to any T-10 socket on the vehicle

Part Number - Color:

White - #93186

Red/Blue - #93196

Part Number - Color:

White - #93160 Blue - #93159

LED T-10 Bulb Luz de Pellizco

Light: Bulbs emit a large amount of light for their price level
Connection: Connect with any T-10 socket
Size: Use a large, 10mm LED for more light.

Part Number - Color:

White - #93146

Blue - #93143

LED T-5 Bulb Dashboard Light

High Diffusion LEDs for Dashboard Indicator Lights

Replace all T-5 bulbs,
the most common bulb type
behind dashboards

Project a more pure light tone
Easy to Install: They connect to any vehicle without modifications
12V: Simply connect to any T-5 socket on the vehicle

Part Number - Color:

White - #93256
