# ARRANGEMENT OF ...

Trucks  
Buses  
Vans  
Motor Homes  
Truck Engines  
Related Equipment

## English

### ALPHABETICALLY BY MAKE

All trucks (medium to heavy-duty), buses, vans, motor homes, truck engines and related equipment are listed in this section alphabetically by make. (Light-duty trucks are listed in the Automotive Section of this catalog in year sequence).

Names starting with initials are listed under the last name, while names which are initials only are listed as if the initials spelled a word. Therefore, G. H. Tennant is listed under "T". Wherever the possibility of confusion may exist, a reference to the correct listing will be found in this section.

### ALPHABETICALLY BY MODEL NAME

Within each make, all models are arranged alphabetically.

### BY ENGINE MAKE

Under each model, the engines are listed according to make and then size, from the smallest to the largest engines. If you don't know the model of the equipment, refer to the engine listing in this section.

### OPTIONAL FILTERS

Optional filters often appear at the beginning of the list ahead of the first model listing. Refer to the Hastings Cross-Reference Catalog (F111-18) or the Hastings Electronic Catalog on the internet at [www.hastingsfilter.com](http://www.hastingsfilter.com) if you have an Original Equipment (OE) or competitive part number.

### ENGINE LISTING

Not all air filters are listed under the engine listing. Refer to the Hastings Cross-Reference Catalog (F111-18) or the Hastings Electronic Catalog on the internet at [www.hastingsfilter.com](http://www.hastingsfilter.com) if you have an Original Equipment (OE) or competitive part number.

### NUMBERS IN BRACKETS OR PARENTHESES

The number in square brackets in front of our bold face part number shows the quantity for a single change per piece of equipment. If the number is in parentheses at the close of our part number, that is the quantity included in the package and sold as a unit.

A number in parentheses ahead of our part number is the Original Equipment number for that filter. Verify that the OE number is the same on your piece of equipment before use. If the OE number is different on your equipment, refer to the Hastings Cross-Reference Catalog (F111-18) or the Hastings Electronic Catalog on the internet at [www.hastingsfilter.com](http://www.hastingsfilter.com) for the proper replacement filter. Help us make a better catalog by letting the Hastings Catalog Department know of any exceptions.

### MEANING OF SYMBOLS USED IN THIS SECTION

When there are variations of a Hastings product, a plus sign (+) (FF945+) indicates you can find these variations in the Hastings Product Guide Catalog (F111-18) or the Hastings Electronic Catalog on the internet at [www.hastingsfilter.com](http://www.hastingsfilter.com).

Numbers representing screens or other permanent filters (not replaced by Hastings) are marked CLN&R\* (Clean and Reuse) if they have been reported as capable of being cleaned and reused. Hastings cannot be responsible for such reuse.

### IMPORTANT NOTICE

All product applications and specifications in Hastings catalogs are based upon the most authoritative information available at the time of publication. However, there are many filter options offered by equipment manufacturers during a given model year making it impossible to be absolutely certain that all equipment of the same make, model and year will use the same filter. For this reason, we cannot be responsible for misapplications.

Original equipment manufacturer's tradenames or trademarks are for identification purposes only. There is no affiliation, sponsorship or connection with the original equipment parts or manufacturer.
