PLATINUM RATED DATA

OVER 15,000 SKUs READY TO LOAD!

With ORACLE Lighting offering over 15,000 SKUs, we know how important it is to provide accurate and timely data to our customers. Being platinum status means ORACLE Lighting has provided every applicable data field in the SEMA Data Co-Op (SDC) score card. Platinum data provides nearly 60 PIES (product) fields and ACES (application & fitment) data, making it a complete set of information to build detailed product listings with descriptions, digital assets including images and videos, tariff codes and sales metrics. This data makes it easy for retailers to create impressive and informative product listings.

These information-rich product listings allow the consumer to gain a full understanding of what they are buying and how it will benefit them. According to SDC, end-users of the data are more likely to build listings from platinum suppliers than from suppliers with a lower data status.

ACES is the Auto Care Association Catalog Exchange Standard. The standard was established to standardize information for proper product selection and fitment. ACES drives how Year-Make-Model product searches and look-ups work.

PIES are Product Information Exchange Standards. The standard was established to define the attributes of the automotive products. These attributes include, but are not limited to: brand ID, description, price, dimensions, weights, NAFTA, UPC and HAZMAT.

NEW WHOLESALE WEBSITE

ONLINE PLATFORM EXCLUSIVELY FOR RESELLERS

The all new ORACLE website makes it easy to find the information that you are looking for! Visitors can now search for parts using the search bar, by Year/Make/Model, by category, or by part # search. This lets you get to the information you need quickly. Product pages now show detailed product information including download-able PDF installation guides, product videos, and Retail Pricing details.

ORACLE Authorized dealers can log into the new dealer section to access dealer support and resources such as logo download, sell sheets, order displays, and access information not otherwise available on the website. Dealers can also create an Online account to view products at their discounted price point, create and track RMAs, and to place their orders Online rather than by phone. Contact your sales representative for assistance setting up your dealer account login.

To become an ORACLE Certified Installer we offer *FREE-of-Charge* installer workshops at our location in Metairie. Take advantage of this free program and get your team certified today!

Pre-Assembled headlights are great for customers that do not want to open their existing headlights to install a halo kit. These headlights come pre-assembled with ORACLE halos professionally installed. We offer these lights for almost every make and model and we are constantly adding new vehicles. Our Pre-Assembled Headlights have either Chrome or Black Headlight Housing depending on your choice. In addition to pre-assembled headlights we also offer matching halo fog-lights. Pair both of these items with an ORACLE wireless controller for a perfect lighting package.

ORACLE Pre-Assembled Headlights meet DOT and SAE standards and are stamped accordingly. Unlike other aftermarket headlights, ORACLE lights are CAPA CERTIFIED.

OCULUS™ BI-LED HEADLIGHTS FOR WRANGLER JL/JT

Part# 5839

Introducing the all-new Oculus™ Bi-LED Headlamp by ORACLE Lighting. Featuring advanced LED projection with 3,200 Lumens of high-quality illumination for enhanced driver visibility in all weather conditions. Light focus is very important for not only driver safety but others on the road who can have their vision obstructed by glare. This is especially significant on lifted Jeeps where the light is in a position to interfere with the vision of other drivers.

CONCEPT SMD STRIP

Concept SMD Strips are semi-rigid high powered SMD strips used to add additional customized lighting to your headlights. Each strip contains over 140 SMDs. The SMDs on the strip are in a continuous pattern with no gaps, thus giving the appearance of a laser straight illumination. This uniform intensity gives any project that "high end" look.

Input:	12V Universal Application
Construction:	Semi-Rigid High Powered SMD Strip
LED Count per 16" Strip:	Each 16" Strip Contains over 140 LEDs
Quantity:	Sold in Pairs
Sizes:	16", 12", 8" or 4" Length
Color:	White, Blue, Red, or Amber
Customization:	Can be cut down to smaller sizes

COLORSHIFT RGB CONCEPT SMD STRIP

You can now have limitless color effects added to a stylized DRL or custom headlight application. These premium, super bright 5050 SMDs are attached to a rigid but flexible straight PCB board allowing for bending and curving without the risk of fragmenting.

Input:	12V Universal Application
Construction:	Thicker PCB board makes the strips easier to bend and mold into shapes.
LEDs:	Bridgelux 5050 RGB SMD chips (Made in the U.S.A.)
Quantity:	Sold in Pairs
Sizes:	16", 8" or 4" Length
Color:	Can produce thousands of color hues with the use of a ColorSHIFT RGB Controller
Customization:	Can be cut down to smaller sizes

TL 2.5" D2S BI-XENON RETROFIT PROJECTORS

The Acura TL Bi-Xenon Projectors are widely popular in HID retrofitting applications. These projectors are considered one of the best performing projector assemblies available on the market. The Acura TL projectors come with crystal clear ZKW R lens. Instead of a 'fuzzy' light dispersal, caused by low end lenses, these lenses create a distinct cut-off pattern (where the light output meets the top of the lens). Resulting in razor sharp and vibrant light.

50MM 2" H1 7.1 BI-XENON RETROFIT PROJECTORS

Small enough to fit in tight spaces for quad retrofits or fog light upgrades, these 50mm H1 Retrofit Projectors offer optically clear lenses and radically curved cutoff shields for maximized light output. Retracting bi-xenon mechanisms unleash a reliable and intense low/high beam. The threaded mounting shaft makes for ease of installation for many applications.

Gatling Bezels Included

70MM 2.5" H1 6.1 BI-XENON RETROFIT PROJECTORS

Virtually the easiest projector to retrofit into any headlight housing, the 70mm H1 offers a low cost unit without sacrificing performance. This projector bolts right into the pre-existing hole in the back of your reflector bucket with little to no modification. The 70mm H1 offers amazing light output, the most precise sharp cutoff line, and non existent glare.

SQUARE 2.75" D2S BI-XENON RETROFIT PROJECTORS

The D2S Square Projector is the successor to the normal D2S Projector, but offers a new designed lens. With its table-top light spread design, this projector is compatible with D2S and D2C bulbs, and produces a very sharp, attractive cut-off line (Vibrant band of colors across the top of light cut-off line). These projectors are very easy to install with a virtually no modification.

COLORSHIFT DEMON EYE KIT

Part# 8529-333

Take your projectors to the next level with the new ORACLE "Demon Eye" ColorSHIFT Projector Illumination Kit. This powerful ColorSHIFT LED device will allow you to illuminate or back light your projector lenses, giving your vehicle the "Demon Eye" look. By using one of our ColorSHIFT controllers, you can change colors at your command. Installation is relatively simple.

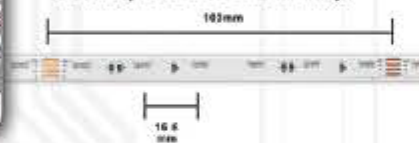

SIDE FIRING FLEXIBLE LED STRIP

The light output on these strips display sideways instead of forwards. Meant to be placed in areas where you don't want the led strip to be visible, but want the light to peek through. Good for tight areas and small enclosures. The side-firing LED strip is used in applications where the light needs to shine parallel with the mounting surface rather than perpendicular with the mounting surface like normal LED strip.

Part# 3801	
LED Type:	Side Firing LEDs
Quantity:	Sold by the Foot or 200' Spools
Input:	Direct 12V Wiring
Wattage:	1.5W per Foot
Backing:	3M Adhesive
Waterproof Rating:	IP65
Customization:	Can be cut to smaller lengths
Warranty:	1 Year

ORACLE LED strip maintains high-end double-layered P.C.B. circuit boards. Double Layer circuit boards have better heat dissipation and thermal properties which results in longer LED lifetime, durability, and overall reliability.

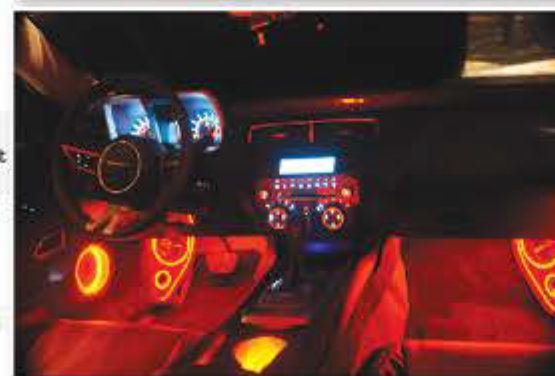

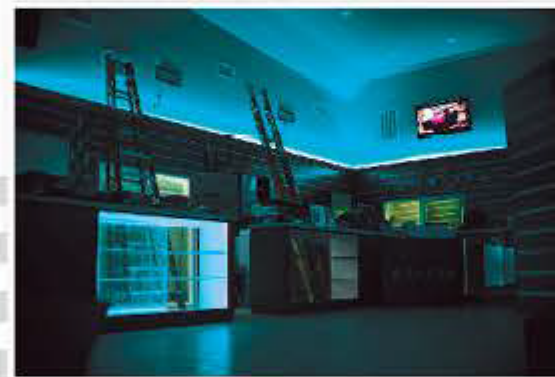

INTERIOR FLEXIBLE LED STRIP

Our "interior" flexible strip is most commonly used on projects where the lights will not come in contact with water or moisture. The absence of the waterproofing material allows the strips to fit into tighter spaces, become slightly more flexible, and are less expensive than the waterproof version.

Part# 3802	
LED Type:	3528 Bridgelux
Quantity:	Sold by the Foot or 200' Spools
Input:	Direct 12V Wiring
Wattage:	1.5W per Foot
Backing:	3M Adhesive
Waterproof Rating:	N/A
Customization:	Can be cut to smaller lengths
Warranty:	1 Year

ORACLE LED strip exclusively uses Bridgelux LEDs which have an excellent lumen-to-watt efficiency rating, have a very long lifetime, and are made in the USA.

EXTERIOR FLEXIBLE LED STRIP - WHITE BACKING

Our waterproof LED strips have an IP67 rating and are suitable for exterior or outdoor applications and areas subjected to high heat. For the waterproofing material we use a high grade silicone rather than epoxy. The reason is that epoxy is not as flexible and tends to yellow over time. For your convenience we offer 2 different color circuit boards- white and black. This helps conceal the LED strips in different types of applications.

3W UNIVERSAL CREE LED BOLT LIGHT

3 Watt LED Bolt Light is a High Intensity LED with a stud style screw design. It can be used on any type of vehicle or practical application. Used for interior/ exterior applications including running light and flood lighting etc. The ORACLE 3-Watt CREE LED Bolt can also be used as a rock light. With a stud style screw design, the unit is resin injected making it 100% water tight and weatherproof. This makes it perfect for rugged applications such as under-cab rock lighting. This gives the driver increased visibility while crawling.

ORACLE G.O.B.O. Door LED Projectors is an acronym for "GO Between Optics". It is an image that can be projected when a light source is introduced. In this case, the light source is a high powered LED so the image is crisp, the housing is small, and puts out very little heat. This allows these image projectors to be mounted in a variety of locations: in door panels, under hood, trunk, and many other custom locations.

These genuine factory badges are modified to stand out from the crowd! We take the original emblems from the vehicle manufacturer and modify them to accept an acrylic plate fitted with ORACLE LEDs for a smooth visual pop. Simply remove the existing factory badge and install this in its place. Wiring is routed through existing holes in the trunk lid and ties into the parking lights and also includes pre-installed 3M adhesive backing. Add an ORACLE Dual-Intensity LED circuit and these illuminated badges can also be used as a 3rd brake light.

LED WHEEL RINGS

ORACLE Lighting illuminated LED wheel rings are an easy and effective way to light up your car or truck's wheels and suspension! This head-turning lighting product consists of a set of (4) LED illuminated aluminum rings which install around the brake rotor and attaches to the brake dust shield. These can also be mounted to older vehicles with drum brakes. The effect is a large ring of light which accents custom wheels and stands out at events. Oversized 16.5" diameter is the largest on the market and can easily accommodate oversized brake rotors. Each ring is equipped with super-bright 2835 LEDs which outshine any competitors.

The design is sleeker for a more aerodynamic look. The integrated LED's inside the mirrors can be used as both turn signals and parking lights. An aspherical mirror is added for a wider field of view, so no visibility is compromised. These are plug & play design and hook right up to the factory harness to allow for full control over the mirror adjusters. The mirrors can be custom painted to match any factory GM color.

- Aerodynamic Sleek Design
- Integrated LED Marker Lights
- Aspherical Mirror Glass
- Fits C6 Corvette Models
- Total 2 PCS- Driver & Passenger
- Connects to Factory Harness
- 2 Year Warranty

Full functioning integrated amber LED's can be used as parking lights and turn signals. Inside components allow for full control over power mirror adjusters.

⚡ Add Dual Intensity Circuits (Part #2016-504) to enable the integrated Amber LEDs to function as BOTH a supplemental turn signal AND a Running Light (additional wiring required)

🔧 Color-Matched painted mirrors can be special ordered. The "Ghost" option paint hides the integrated LEDs, but allows the Amber light to still shine through the paint.

2015-2020 FORD MUSTANG HIGH OUTPUT LED REVERSE LIGHT

ORACLE Lighting's new reverse light is a complete housing replacement for the 2015 and up Ford Mustang. These solid-state LED emitters generate 450% more light than the factory halogen version. Installation is a simple "Plug and Play" process making it easy for a novice to install in under 15 minutes. Besides the improvement in styling, this unit offers a wider field of vision and greater rear visibility for driver safety. The LEDs are a bright 5000K color which works very well with the factory reverse light camera, making the field of view easier to see for the driver. The CREE XP-E LEDs draw a total of 27 watts and produce approximately 2,500 lumens of light output.

TINTED LENS #3003-020

CLEAR LENS #3003-001

ORACLE Lighting S3 LED Conversion Bulbs instantly provide 3200 Lumens of Crystal Clear 6000K light output. The electronic components of the S3 Headlight bulbs are housed in a sealed waterproof heat-sink design, eliminating the need for external drivers and cooling fans.

The CSP (Chip Scale Package) LED Chip Design features a small package size but high intensity volume per unit with less heat value resulting in industry-leading Luminous Efficacy (science talk for "Best Bang for your Buck"). This new low-profile design reduces common bulb fitment issues for an easy Plug & Play DIY installation.

- Color temperature: 6000K
- PCB Substrate: Aluminum
- Current Demand: 0.8A/Bulb
- LED Chip Type: CSP LED
- Warranty: 1 Year Limited
- Brightness: 3200 Lumens
- Power Draw: 12W/Bulb
- Efficacy: 130Lm Per Watt

The V-Series bulbs feature fcCSP Flip-Chip Scale LED Packaging. The advantages of flip-chip technology are multiple: it provides enhanced electrical performance over standard wirebond technology, allows for a smaller form factor due to increased routing density, and eliminates wire-bond loops. What does this mean for you? An ultra-luminous and extremely efficient light output with superior durability and reliability.

- Third Party DOT Compliance Tested and Verified.
- FIRST 6-Volt Daytime Running Light Compatible LED Bulb Available.
- LED Bulb features Precision Filament Geometry for no-Glare Illumination.
- No Fan, Heat-Sink, or other obstructing/ cumbersome cooling system.
- Physically matches original bulb for OEM fitment and easy DIY installation.

- Color temperature: 6000K
- PCB Substrate: Copper
- Current Demand: 0.9A/Bulb
- LED Chip Type: fcCSP LED
- Warranty: 1 Year Limited
- Brightness: 3800 Lumens
- Power Draw: 17W/Bulb
- Efficacy: 100Lm Per Watt

4000+LM PREMIUM LED

These new high-output LED Headlight bulbs create a 4,000+ Lm blanket of light for the driver to increase safety and nighttime visibility. High Quality Luxeon ZES chips allow for the increased Lumen output while still drawing less than half the power of the factory halogen bulbs.

These premium chips also have excellent heat dissipation characteristics, making them extremely reliable even in harsh environments. The new internal driver components were designed by Samsung and offer excellent performance in a smaller package. The new adjustable heat sink makes fitment issues a thing of the past since it is reversible to mount in the headlight back-cap for added adaptability. More illumination, increased reliability, and easier installation than before!

- Color temperature: 6000K
- PCB: Dual Layer Copper
- Current Demand: 1.2A/Bulb
- LED Chip Type: ZES
- Warranty: 2 Year Limited
- Brightness: 4000+ Lumens
- Power Draw: 20W/Bulb
- Efficacy: 120Lm Per Watt

LED Lighting is a great way to update the look of your fog lights, daytime running lights, tail lights, and turn signals. You can give your lights the look of expensive HID's without the higher cost, longer installation and additional heat of an HID system. These are also great replacements due to the high-tech look of LED, which modernizes the vehicle instantly. Most applications take less than five minutes to install.

35W CANBUS HID BALLAST

Part# 5906

The key component of all HID ballasts is the "controller" which controls the functions from the initial ignition to continually ensuring the xenon gas inside the bulb stays ignited. The quality of every ballast starts with the controller inside. The new ORACLE 35W CANBUS Ballast utilizes an ASIC chip controller.

ASIC integrated decoder circuit is visible on the 35W CANBUS ballast.

24W BALLAST

Part# 5904

Commonly for HID Fog Light Bulb applications

XENON RECTIFIER

Part# 5903

Eliminates HID "Flicker" by stabilizing the input into the HID Ballast. Fits ALL Aftermarket HID Kits.

XENON CONVERSION KITS:

ORACLE Xenon Conversion kits were developed with strict standards and the latest technology available on the market. The new "Plug and Play" wiring makes this installation as simple as changing your headlight bulbs and simply plugging in the ballasts. ORACLE digital ballasts are equipped with new processors that have a startup of a much more efficient 5 amp compared to the industry standard 10 amp. The 2018 ballasts also have an ASIC control chip to make this ballast compatible with any vehicle and can correct most of HID installing issues such as fault indicator lights, and bulbs flicking during operation. These changes are what makes ORACLE HID Kits an even higher quality and once again increased the standards of what makes a "Premium" kit different from the others out there.

REPLACEMENT BULBS

Whether you are replacing a bulb that is no longer working or just want to change the look of your factory HID lights, these bulbs are the answer.

Dealerships may charge a high price for a single replacement HID bulb. ORACLE Factory HID bulb replacements are accurately manufactured to match OEM fitment. When changing your factory HID bulbs with ORACLE OE replacements, it is advisable to change both bulbs.

60" DOUBLE ROW LED TRUCK TAILGATE LIGHT BAR

Part # 3825-504

The ORACLE 60" Double Row LED Truck Tailgate Light Bar is the perfect way to add an extra layer of safety and functionality to your pick-up truck. Equipped with IP67 rated Waterproof Silicone surrounding the entire strip, it can be installed in minutes by simply applying the 3M adhesive tape backing. Simply inserting directly into your 4-pin trailer light plug, you'll be able to utilize an extra smooth running light that turns into an attention-grabbing brake light and turn signals. The strip also comes with a 12V wire which can be tapped into your factory wiring to create an ultra-bright, pure white reverse light.

- IP67 Waterproof Rated
- 3M VHB Adhesive Backing
- 2x the LEDs. 2x the Brightness
- 216 total LEDs; 144 Red LEDs and 72 White LEDs.

HIGH BRIGHTNESS DOUBLE-ROW LEDS 216 TOTAL CHIPS.

Besides being functional, these LED Mirrors from ORACLE Lighting look great as well! The LED light bar is a custom design that features a total of 24 Cree XPE 1W LEDs. This gives the driver a total of 24W of LED power producing approximately 2200lm. Each unit has a 45° beam angle to optimize the driver's peripheral visibility, whether riding on the trail or in the desert. The housing material is made from rugged Poly-carbonate and bolts onto the vehicle using the factory mounts for easy installation. A set of anodized rock guards protects the LED acrylic lenses, which also houses the DBM Reflex LED optics. These efficient optics focuses the light for optimal visibility from the driver seat position.

ORACLE Off-Road Sleek LED Light Bars boast a slim design and the latest optical lenses on the market, 4D optics. These new optics allow for precision spot illumination with the least amount of light fall-off. Utilizing a separately designed fish eye lens, instead of a reflector, the new optics system captures the maximum amount of light emitted from the LED and projects it exactly where you need it.

Adjustable Bolt Sliding Mount Brackets included

High Intensity Discharge (HID) lighting is excellent for Off-Road applications. HID lights have no filament and can sustain vibration and impact better than incandescent and halogen lights. HID is also very efficient and produces six times the amount of light per watt as its incandescent counterparts. Our HID Off-Road lights are available in Spotlight and Floodlight configurations, two different styles, and three different sizes. Regardless of your Off-Road lighting needs, ORACLE has you covered!

Output:	1 Channel
Output Power:	144 Watts
Dynamic Modes:	5
Levels of Control:	256
Levels of Speed:	6
Levels of Brightness:	8

IN-LINE RGB CONTROLLER

Part# 1614

Input:	8-16V DC
Max Load Current:	12 Amps
Output:	3 Channels
Output Power:	144 Watts
Dynamic Modes:	5
Levels of Control:	256
Levels of Speed:	6
Levels of Brightness:	8

IN-LINE AMPLIFIER

Part# 1615

Input:	12V
Max Load Current:	4 Amps per Channel
Output:	3 Channels
Output Power:	144 Watts
Accessories:	Wireless IR Remote Control
Special:	Auto Save Function

SIMPLE RGB LED CONTROLLER

Part# 1612

Input:	12V
Max Load Current:	6 Amps
Output:	3 Channels
Output Power:	Single RGB Device
Function:	Entry-level generic controller with a wireless IR Remote.

LED DIMMER SWITCH

Part# 1708

Input:	12-24V DC
Max Load Current:	8 Amps
Output:	1 Channel
Output Power:	100 Watts
Function:	Dim LEDs from 01% - 100% brightness. PWM Dimmer.

LED PIR MOTION SENSOR

Part# 1618

Input:	12-24V DC
Max Load Current:	8 Amps
Output:	1 Channel
Output Power:	100 Watts
Sensor:	"Passive Infrared"
Function:	Activates LEDs when IR Motion is detected.

WALL PANEL SWITCH

Part# 1707

Input:	9-16V DC
Max Load Current:	4 Amps per Channel
Output:	3 Channels
Output Power:	144 Watts
Function:	Control RGB LEDs with Touch Panel.

RGB LED AMPLIFIER

Part# 1605

Input:	8-16V DC
Max Load Current:	4 Amps per Channel
Output:	3 Channels
Output Power:	144 Watts
Function:	Amplifier allows user to surpass a LED Controller's maximum output rating.
