# MOFO SUBWOOFER

MOFO X subwoofers are refined and increase efficiency dramatically! MOFO-X subs use a composite sandwich cone with a polypropylene surface for durability and Spruce pulp backing for smooth low bass. Like the original MOFOs, the new models still use an aluminum dustcap that couples to the voice coil former and extends over the cone. Why? The fins brace the cone and eliminate cone flex during high excursion. And since they are aluminum and couple to the voice coil, they act as a heatsink or heat extractor. Using the latest materials, the new MOFO subs yield superior performance. Cast aluminum baskets? Of course! Increased bottom octave output? You Bet! Louder than the original design? Duh!!

- Overcompensating Motor Structure for Increased Magnetic Strength
- 12mm T-Yoke & Top Plate Improve Low Frequency Dynamics
- Vented T-Yoke & Frame Reduces Voice Coil Heat Build-up
- Die Cast Aluminum Heatsink Dust Cap Absorbs Voice Coil Heat
- Aluminum Dust Cap Fins Dissipate Heat & Strengthen Cone
- Non-Magnetic Non-Resonate Die-Cast Aluminum Frame

# BAMF SUBWOOFER

BAMF subwoofers are the newest secret weapon for you bass BURP fanatics! These beasts are engineered for the most extreme conditions. Massive 3" 4-layer voice coils built on an aluminum former can take the heat. Freakishly oversized motor structures provide more magnetic inertia than is ever necessary for a woofer. Spruce tree pulp cones, high density extended excursion foam surround, and hybrid suspension dampers work together to contain the momentum to a shattering roar...

# GOthic SUBWOOFER

### Twisted & Woven Flax Fiber Cone

All Gothic woofers use torsion twisted Flax fibers woven together for ultimate strength and less elasticity. A heavy soaking in epoxy combined with the sonic qualities of pulp paper, Flax proves itself worthy of any system.

### Extended Excursion NBR Surround

A strong and flexible heat resistant compound, nitrile butadiene rubber is used widely in automotive applications. Gothic woofers utilize an extended excursion NBR surround for it's strength and flexible properties during extreme movement.

### Back Plate & T-Yoke Venting

Heat build-up is a leading cause of catastrophic woofer failure. Venting built into the T-Yoke, back plate, and voice coil extract and dissipate heat, ensuring Gothic woofers keep their cool.

### Overcast Stitched Cone Assembly

Surrounds of Gothic woofers are double overcast stitched directly to the Flax cone surface. In addition to superior adhesives, overcast stitching improves the conventional bond between cone and surround.

### 100% OFC 4-Layer Voice Coil

Gothic woofers use generous 1.50" long, 2.5" diameter 100% OFC Copper voice coils. A vented Aluminum former extract and dissipate any heat build-up, resulting in improved power handling.
