FORMULATED EXCLUSIVELY FOR HIGH-PERFORMANCE TRACK USE

RACING

PROFESSIONAL RACING BRAKE PADS

Raybestos® Professional Racing brake pads are race proven by champions globally. Formulations are specifically engineered and formulated for high-performance track use. They provide reliable, consistent braking in all track conditions. Extensive high-temperature fade-resistance testing is performed on the product to ensure optimum results.

When using Raybestos® Professional Racing brake pads you can expect:

- Dependable, aggressive, and fade resistant braking
- Superior shear strength
- Low wear rate
- Extreme stopping power and optimum safety

For safe, long-wearing disc brake pads made with superior friction compounds that provide excellent value, why would you look anywhere else?

**NOT FOR STREET USE.
DESIGNED FOR TRACK RACING ONLY.**

Raybestos® Professional Racing brake pads cannot be used on the street. These brake pads are specifically designed and engineered for the demands and **extreme** usage needed on a race track only. Raybestos® Professional Racing brake pads go the extra mile to ensure top-of-the-line **performance**. They are not to be used in off track driving situations.

Mechanical Retention System

The ultimate in shear resistance and puck retention

- Mechanical Retention System securely attaches friction material to plate for greatly improved shear strength and reduces the possibility of puck end-lift.
- High-quality steel hooks mechanically attach the friction to the steel plate to reduce potential rust jacking for improved safety.

Raybestos
The Best in Brakes™ SINCE 1902

The Raybestos® brand legacy dates back to 1902. In 1957, Raybestos® started its long racing tradition by partnering with drivers in the Indy 500 and sponsoring the Safety in Speed award. Over the years, many drivers have taken the checkered flag using Raybestos® brakes, relying on the quality and innovation of Raybestos® for top-of-the-line, first-lap-to-last-lap performance.

With this in mind, Raybestos® now offers a specific Professional Racing brake pad program. This program has a strong selection of popular stocking part numbers featuring a number of compounds, caliper pad shapes, and thicknesses. There is also a large number of custom pads that are available through the Build to Order part of the program. You select which pad shape, formulation, and thickness you need, and we will formulate and press it right here in the United States.

When you need the best, turn the corner sharply to Raybestos® Professional Racing pads.
