

RIGID INDUSTRIES LED LIGHTING®

2013 MASTER CATALOG 5.2

RIGID 101

Learn more about the technology behind the light
and why Rigid Industries is the world leader.

WHAT IS AN LED?

An LED or Light Emitting Diode is a semiconductor diode that emits light when an electric current is applied in the forward direction of the device in the LED circuit. The effect is a form of electroluminescence where incoherent and narrow spectrum light is emitted from the P-N junction in a solid state material. The results -- a highly efficient, very bright light source, while drawing less power.

WHAT IS A LUMEN?

Lumen (symbol: lm) is the unit of measurement used for the total amount of visible light emitted by a source. Or more simply, a measurement of emitted light from the direct source, the LED.

WHAT IS LUX?

Lux (symbol: lx) is the unit of illuminance and luminous emittance, measuring luminous flux per unit area. It is equal to one lumen per square meter. In photometry, this is used as a measure of the intensity, as perceived by the human eye, of light that hits a surface. Or more simply, a measurement of emitted light from a specific distance. This measurement takes into account more variables and is a more accurate method of measurement for certain circumstances.

SPECIFICATION CHARTS

On each product family page in the Rigid Industries catalog you will find specification charts particular to that family. Within these charts are pieces of useful information to help you determine which light is best suited for your application.

AMP Draw

The measurement of electrical current drawn from a storage battery (or battery), while the motor is being operated.

Raw Lumens

Described above, this number is a measurement of light emitted (in all directions) from the source, the LED.

Lux @ 10m

Described above, this number is a measurement of light emitted 10 meters (in one direction) from the light.

Beam Distance

A measurement of distance the light travels until reaching .25 lux, the minimum lux reading of usable light.

Peak Beam Intensity

Measured in Candela, this number is the peak amount of light emitted in a certain direction of the beam.

EXAMPLE:

Product Description	Part #	Weight (lbs)	Watts	AMP Draw	LED's	Raw Lumens*	Lux @ 10m	Beam Distance (m)**	Peak Beam Intensity (cd)**
D2 - Driving	50131	1.25	34.5	2.50	6	3030	206.1	287.1	20612

* Based on LED manufacturer specifications

** Tested using ANSI/NEMA FL Standards

WHY DOES COOLING MATTER?

Keeping LED temperatures cool is key to having a reliable unit because the high-powered LEDs used on super-bright units create a significant amount of heat. We've effectively designed housings with heat sinks that transfer the heat from the circuit board efficiently. This prevents damage to the LED and surrounding components. Rigid lights are designed to maximize light output, while still protecting the light from damage. This ensures years of trouble-free operation for you.

PROBLEMS WITH OVERHEATING LEDs

- Decreased light output
- Discolored light output
- Decreased efficiency
- Shorter life span
- Unit failure

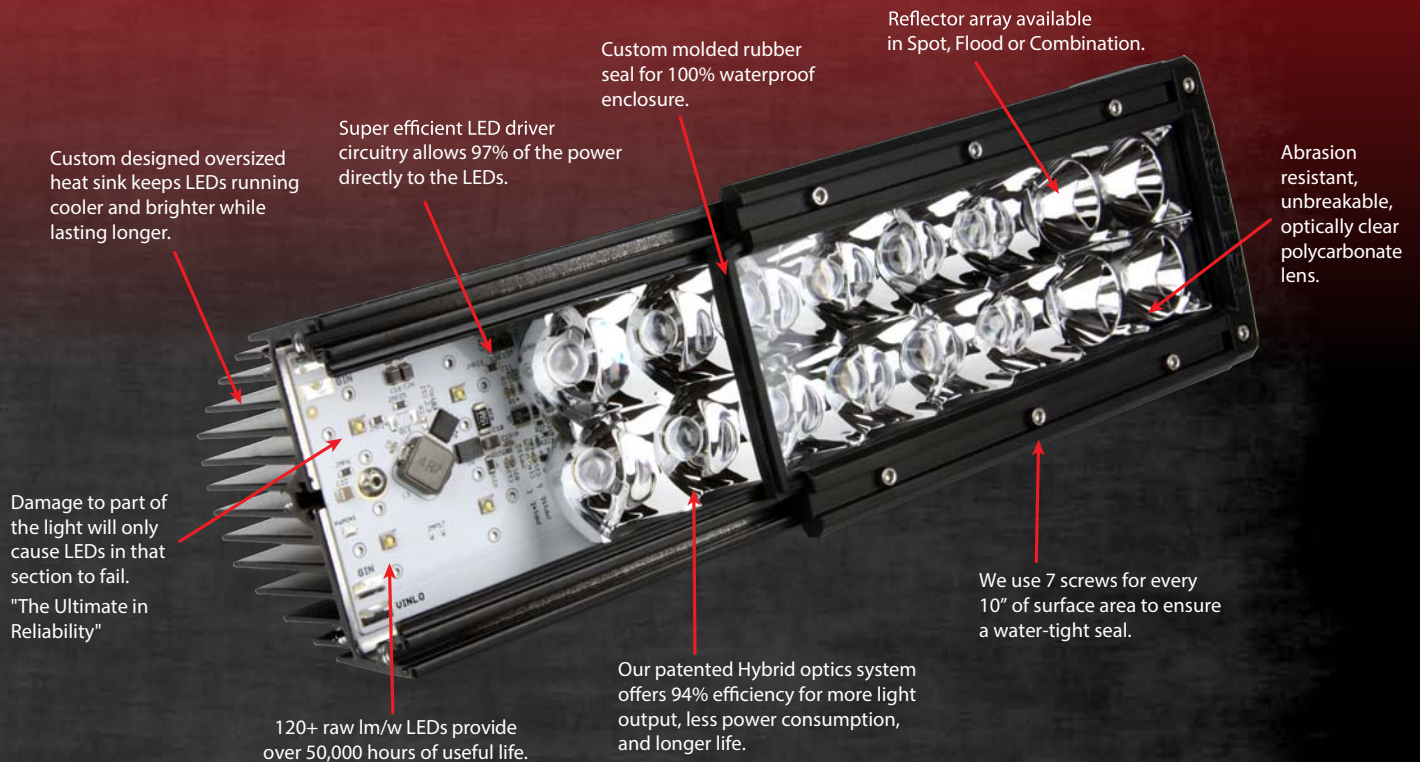

OUR SOLUTION

Rigid Industries' US made extruded housing has triple the surface area compared to our competitors' import housing.

RIGID ELECTRONICS

We measure all our lights according to the ANSI FL1 standards which are lighting standards designed for flashlights and portable lighting. We are the only vehicle light company that has joined PLATO (Portable Lights American Trade Organization). We continually test our products to ensure a higher standard of accuracy.

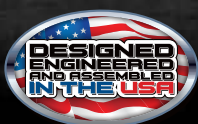

WHY ARE SUPERIOR ELECTRONICS IMPORTANT?

LED lighting requires an efficient circuitry design to maximize light output per watt consumed. Superior products are backed by superior company standards. Our circuitry designs use the latest technologies to give you the most efficient, most reliable lights available. As design innovators, our products offer you the latest state-of-the-art technology.

WE PUT OUR LIGHTS TO THE TEST

- Vibration Tested (MIL-STD-810G)
- Corrosion Tested (ASTM B117)
- Water Pressure Tested (IP-69K)
- Submersion Tested (IP-68)
- Dust Tested (IP-68)
- Variable Voltage Range 9-36V DC
- Over/Under Voltage Protection
- Full Range of Accessories & Mounting Options
- Unbreakable Polycarbonate Lens
- GORE® Pressure Equalizing Vent
- Limited Lifetime Warranties

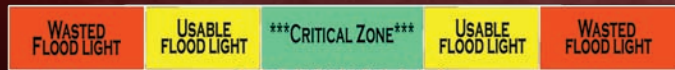

RIGID OPTICS

WHY DO OPTICS MATTER?

Practically all LED fixtures measure light output in lumens at the source - the LED itself. Rigid Industries has revolutionized the way LED light is projected. Our patented Hybrid LED reflector system projects significantly more LED light forward than other comparable products. Our patented Hybrid and Specter optics capture the maximum amount of light rays emitted from the LED and project the light forward exactly where you want it.

Superior optics is a key advantage of LED lighting. Rigid Industries will continue to lead optic innovation for forward projecting LED technology.

RIGID INDUSTRIES SPECTER OPTIC

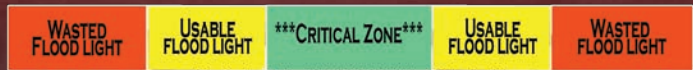

ADVANTAGES

- Small Footprint
- Extremely Efficient
- Smooth Beam
- Minimal Waste of Light
- Available in Wide & Driving
- Patented Technology

RIGID INDUSTRIES HYBRID OPTIC

ADVANTAGES

- Extremely Efficient (93%+)
- Incredible Light Control
- Durable
- Max Distance (10° Spot)
- Broad Beam (20° Flood)
- Patented (Patent #'s 6,986,593 B2, 7,114,832 B2)

HYBRID VS SPECTER OPTICS

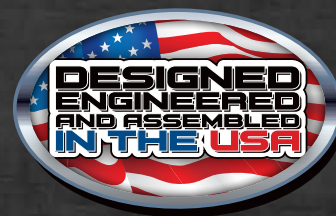

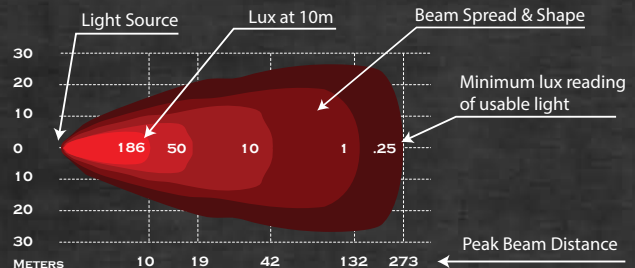

Rigid's patented Hybrid and Specter optics offer the highest in forward projecting LED technology. Visually, these are both chrome reflectors which encompass the LED and project the light forward. The Hybrid Optic System comes in either a Flood or Spot configuration. Our Specter Optic comes in either a Driving Beam or Wide Beam. Both optics serve their individual purposes and can work together for a perfect balance of distance and spread.

RIGID DIFFUSION LENS

The Rigid Diffusion lens offers the ultimate in scene and area lighting. Visually they can be identified by their textured appearance. This lens is engineered specifically to distribute the light at a 60 degree angle to create smooth, even coverage. This is a great option for area lighting where slow to no vehicular movement is involved.

HOW TO READ A LUX CHART

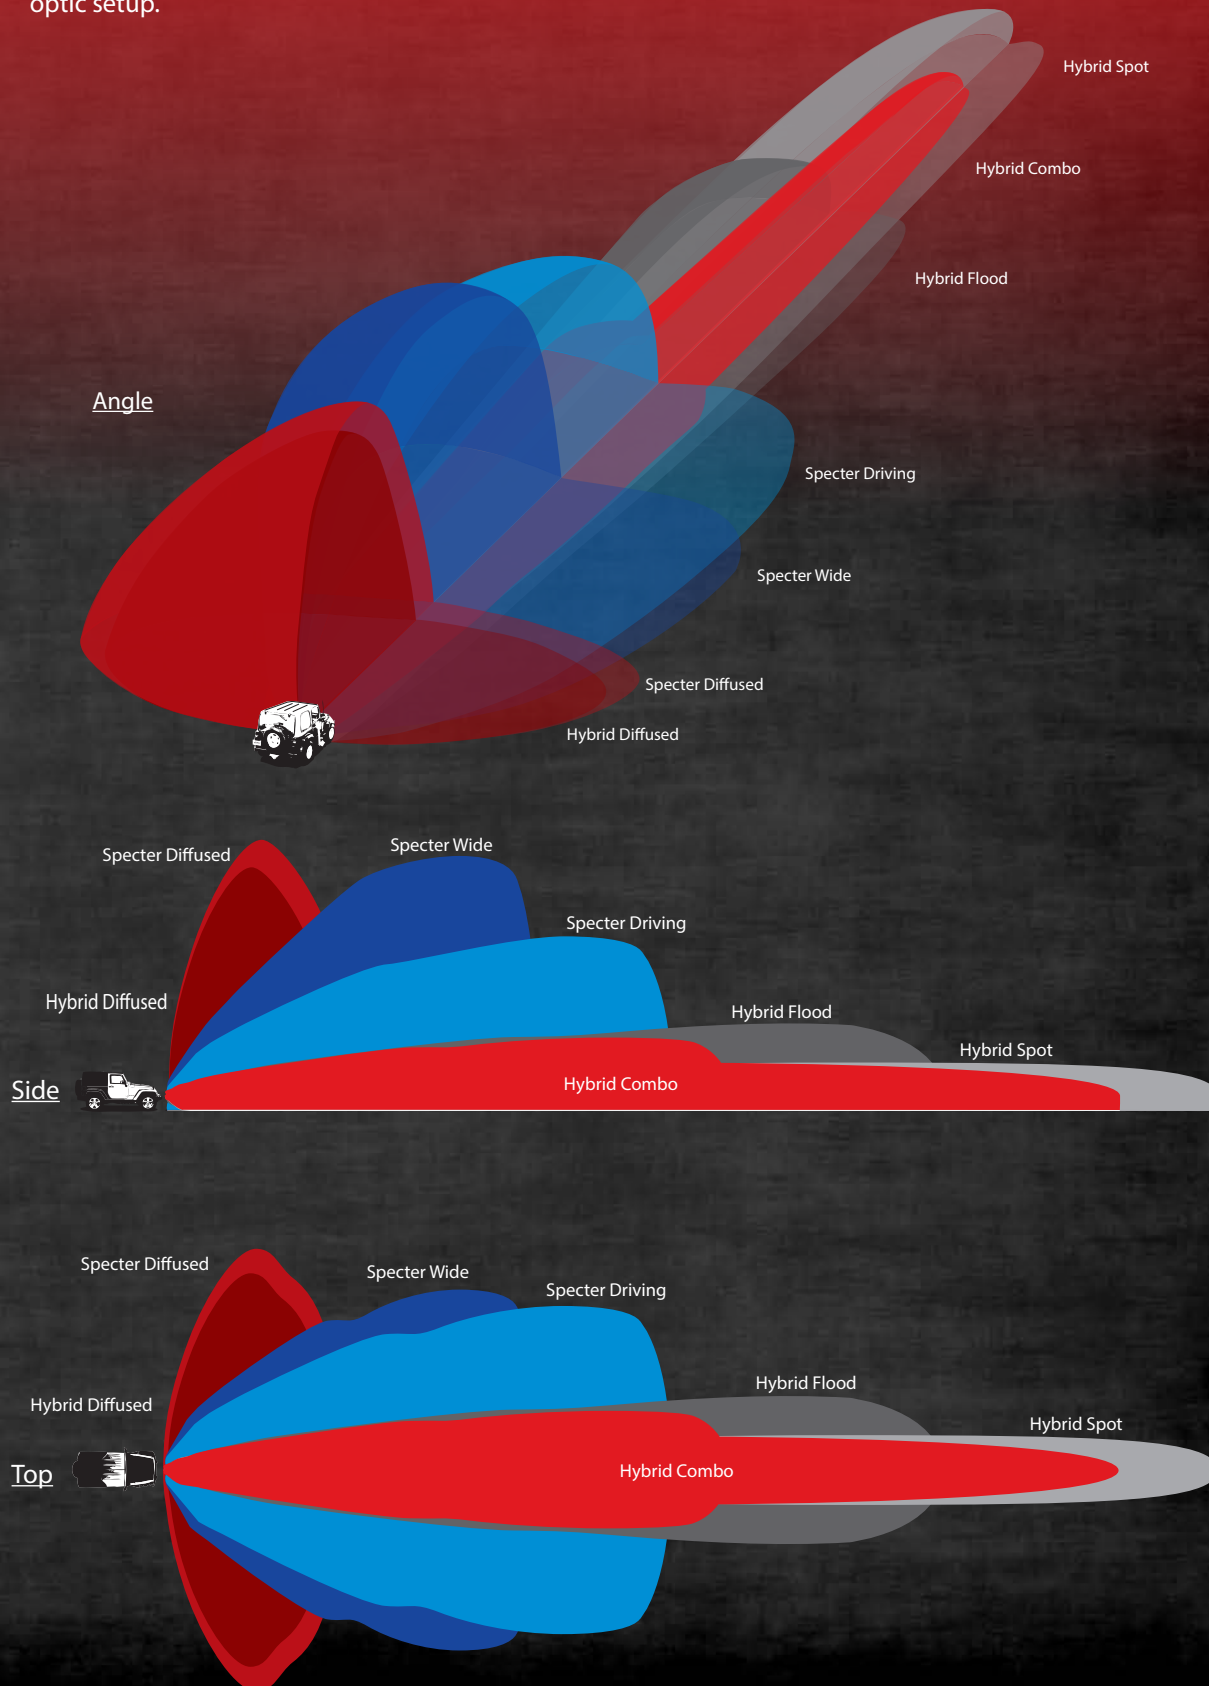

Throughout this catalog and other Rigid Industries material, you will see this badge. It represents something that few American companies are able to claim these days. It is a badge we wear proudly.

Rigid Industries is proud to design, engineer, and assemble its products in the United States of America.

BEAM PATTERNS

Each Rigid Industries patented optical systems provide a unique solution to any lighting requirement. From the Specter Diffusion's 60 degree spread of light to the Hybrid Spot's mile long beam, Rigid has perfected the way you light up the night. See below our different graphs showing height and distance projections. While they are not representative of an individual light, the patterns below will show you the general spread and distance of a particular optic setup.

E-SERIES

TORTURE TESTED

As LED technology evolves, so does the E-Series product line. This flagship Rigid product best utilizes the patented Hybrid optic system. It is available in a Hybrid Spot for the max distance coverage, or choose the Hybrid Flood for a broader beam pattern. The ideal light bar is Rigid's Combination optic system that features a row of Spot optics with outer Flood optics to provide impressive exposure over a great distance and width. Rigid's latest improvements include an updated extrusion, an improved GORE® pressure equalizing system, ultra efficient circuitry, and unmatched strength and durability. Add in Rigid's limited lifetime warranty and there's only one choice: Rigid Industries.

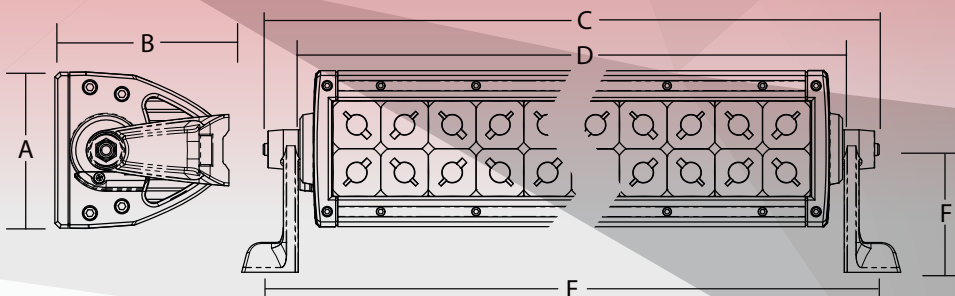

4" to 50"

FACTS

- Available in Hybrid Optics System
- GORE® Pressure Equalizing Vent
- Unbreakable Polycarbonate Lens
- 6063 Aluminum Extrusion
- Durable UV 3800 Polyester Powder-coat
- Sealed Deutsch Connector
- Runs on 9 to 36V DC
- 50,000+ Hour Lifespan
- IP68 Certified
- MIL810-STDG Vibration Certified
- ROHS Compliant
- Over / Under Voltage Protection
- Operating temp -40° F ~ +145° F
- Protected Against RFI/EMI
- Integrated Thermal Management System
- Updated Hybrid Optic System
- Patented Optics (6,986,593 b2, 7,114,832 b2)

E-SERIES ACCESSORIES

CLAMP KITS

Our 3 piece adjustable clamps are the perfect way to mount your new light bar to virtually any size tubing from .875" to 3.25". The sleek design allows for easy installation and extreme versatility in positioning your light. These clamps are machined from aircraft-grade billet aluminum and hard anodized in black for a durable finish. Hardware included.

Lights Sold Separately

Tubing Size	Part #	Tubing Size	Part #
.875"	40820	2.0"	42020

Rigid E-Series light covers not only give your LED light bars a unique look, they also provide another layer of protection. Available in 10" increments, these covers are made from durable polycarbonate plastic and are designed to snap onto your lights with ease. Our E-Series LED light covers are available in a variety of colors. The white and black versions are opaque and feature the Rigid Industries star logo. The translucent version comes in red, blue, green, amber, clear, and smoked. Our light covers are often used to improve visibility in harsh environments.

AMBER LED

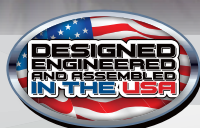

- Cuts Through Fog, Dust and Other Air Debris
- Patented Hybrid & Specter Optical Systems
- Available in Spot, Flood or Combination
- 50,000+ Hours Average Lifespan
- 93% Optical System Efficiency
- 9-36V DC Input
- 100% Optically Clear, Scratch Resistant Lens
- Instant On / Off - No Warm-up
- Operating Temp: -40° F ~ +145° F
- Shock Proof
- Over / Under Voltage Protection
- Limited Lifetime Warranty
- Oversized Heat Sink
- Low Power Consumption
- IP68 Rating
- Integrated Thermal Management
- Zero UV Emissions

Rigid Industries' amber LED lights are designed to work in rain, snow, fog, smoke and dust. To achieve the best light output, use a narrow beam amber light. By using a dedicated amber LED, all the light produced is between 550 and 590nm wavelength. By only projecting narrow wavelength light, it cuts through the elements better than any other light system. Rigid recommends our Hybrid Spot or Specter Driving as the ideal beam patterns for amber lights.

COMPACT DESIGN. EXTREME PERFORMANCE.

DUALLY

The Rigid Dually offers many uses. A 4 LED light in a compact package can be used for virtually anything -- from a reverse light for a truck to a handlebar light for a motorcycle to a flood light for a trailer. With 1,568 lumens of light, this small unit has more light output than a 50 watt MR16. At just 3" x 3", this light can fit anywhere. Pulling only 20 watts, you won't find a more efficient, compact light source anywhere.

D2

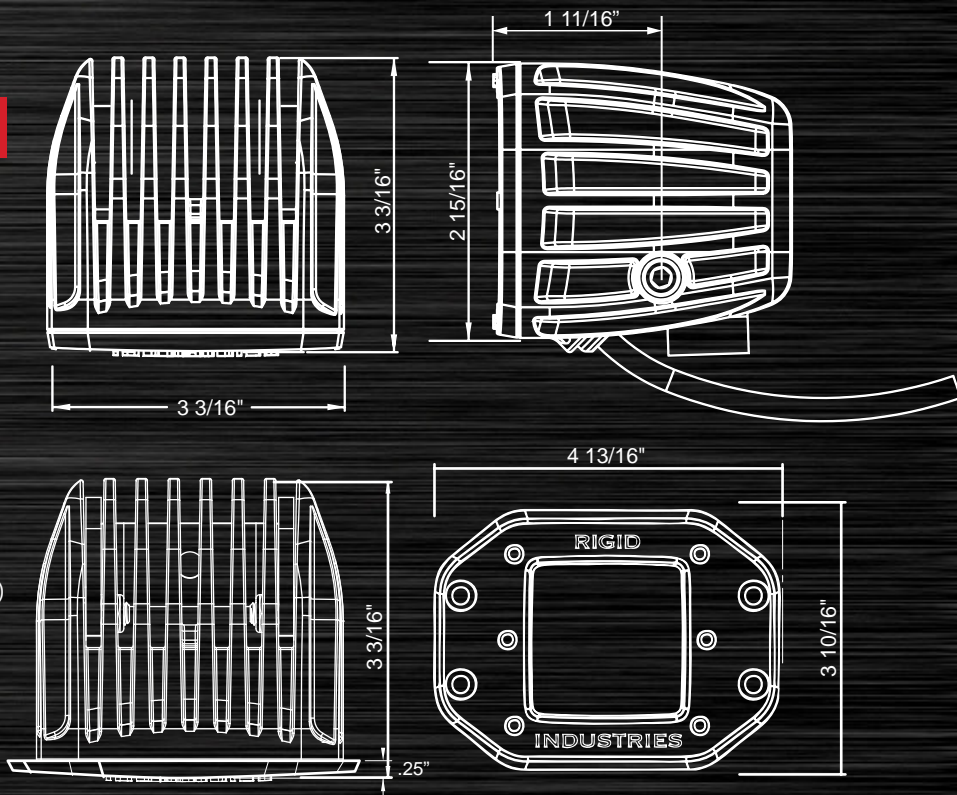

The Rigid D2 is one of our most powerful LED lights. Versatile mounting options and superior patented optics make the D2 a preferred solution to many high-performance lighting needs. At only 34.5 watts, the Rigid D2 produces 3,030 lumens. Thermally managed circuitry prevents overheating. The D2 is one of the brightest compact auxiliary lights available and is backed by a limited lifetime warranty.

DUALLY / D2 DIFFUSED

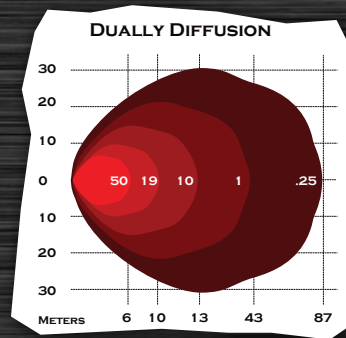

Rigid Industries' Diffusion lens is the ultimate small package area light. Using a Hybrid Flood optic and a Diffusion lens, the D-Series produces a 60 degree spread reaching 87 meters. The Driving D2 LED light can use the Diffusion lens to create the same 60 degree spread reaching 122 meters. It is a great option for all types of area lighting.

All clamp styles are designed for E-Series, D-Series, SR-Series, SR-M, SR-Q and M-Series lights.

Fresh water applications only.

FLUSH MOUNTS

This model is designed to be recessed into a bumper, a utility bed, on a boat or any application where you need the light to look clean and out of the way. Once installed, the light is only 1/4" exposed, which means you can have all the benefits of our surface mount lights in an OEM quality, flush installation.

Rigid snap-on light covers are perfect for the Dually/D2 line of products. Made of polycarbonate plastic, these covers are tough and snap easily into place to protect your light. The black and white covers are opaque and meet DOT regs in most states. Also available in clear, amber, blue, red, green, and smoked for different colored tinting applications. The amber cover provides instant improvements in harsh environments.

AMBER LED

Rigid Industries' amber LED lights are designed to work in rain, snow, fog, smoke and dust. To achieve the best light output, use a narrow beam amber light. By using a dedicated amber LED, all the light produced is between 550 and 590nm wavelength. By only projecting narrow wavelength light, it cuts through the elements better than any other light system. Rigid recommends our Hybrid Spot or Specter Driving as the ideal beam patterns for amber lights.

- Cuts Through Fog, Dust and Other Air Debris
- Patented Hybrid & Specter Optical Systems
- Available in Spot, Flood or Combination
- 50,000+ Hours Average Lifespan
- 93% Optical System Efficiency
- 9-36V DC Input
- 100% Optically Clear, Scratch Resistant Lens
- Instant On / Off - No Warm-up
- Operating Temp: -40° F ~ +145° F
- Shock Proof
- Over / Under Voltage Protection
- Limited Lifetime Warranty
- Oversized Heat Sink
- Low Power Consumption
- IP68 Rating
- Integrated Thermal Management
- Zero UV Emissions

SR-SERIES

Short and long brackets are included with every SR-Series light bar for mounting versatility.

Measuring only 1.5" tall, our SR-Series light bars are half the footprint of the E-Series. Only Rigid offers the brightest, furthest projecting LED light bars. SR-Series is offered in both Hybrid and Specter optics systems producing over 5,000 raw lumens in the Specter 10" version. Limited lifetime warranty.

SR-SERIES ACCESSORIES

CLAMP KITS

Our 3 piece adjustable clamps are the perfect way to mount your new light bar to virtually any size tubing from .875" to 3.25". The sleek design allows for easy installation and extreme versatility in positioning your light. These clamps are machined from aircraft-grade billet aluminum and hard anodized in black for a durable finish. Hardware included.

Lights Sold Separately

Rigid SR-Series light covers not only give your LED light bars a unique look, they also provide another layer of protection. Available in 10" increments, these covers are made from durable polycarbonate plastic and are designed to snap onto your lights with ease. Our SR-Series LED light covers are available in a variety of colors. The white and black versions are opaque and feature the words 'Rigid Industries' along the bottom. The translucent version comes in red, blue, green, amber, clear, and smoked. Our light covers are often used to improve visibility in harsh environments.

SR-M SERIES

The new SR-M Series (Single Row Mini) is housed in one of our smallest and lightest fixtures ever produced. This compact LED light can be mounted in virtually any location and can project almost 1,000 feet with Hybrid Spot optics or produce an unbelievable 1,125 raw lumens with Specter Driving optics. Limited lifetime warranty.

Each SR-M and SR-M2 light kit includes plug and play wiring harness and switch.

These models are designed to be recessed into a bumper, a utility bed, on a boat or any application where you need the light to look clean and out of the way. Once installed, the light is only 1/4" exposed, which means you can have all the benefits of our surface mount lights in an OEM quality, flush installation. Limited lifetime warranty.

Each SR-Q and SR-Q2 light kit comes with plug and play wiring harness and switch.

M-SERIES

ENHANCING YOUR BOATING EXPERIENCE

Whether you're lighting up your deck, the water, or heading back to the dock, the M-Series lighting solution makes your boating experience more fun and enjoyable.

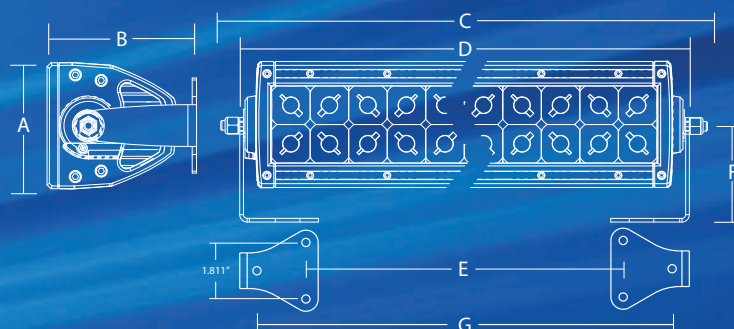

Marine Grade - Rigid marine lighting products are given special attention due to the elements they will be exposed to in a marine environment. First, the aluminum housing receives a chromate conversion coating. This acts as a corrosion inhibitor against elements such as salt. The housing then receives a UV-resistant powder-coat. Second, our marine products use 316 marine-grade stainless steel hardware. All hardware receives a coating that's been tested for over 1,000 hours of corrosion resistance. Mounting hardware for the marine products is also 316 marine-grade stainless steel. Marine products do not include a wire harness or switch, due to the fact that most installs on marine equipment are custom and require smaller holes and unique components. Limited lifetime warranty.

FACTS

- Available in Hybrid Optics
- GORE® Pressure Equalizing Vent
- Unbreakable Polycarbonate Lens
- 6063 Aluminum Extrusion
- Durable UV 3800 Polyester Powder-coat
- Runs on 9 to 36V DC
- 50,000+ Hour Lifespan
- IP68 Certified
- MIL810-STDG Vibration Certified
- ROHS Compliant
- Over / Under Voltage Protection
- Operating Temp -40° F ~ +145° F
- Protected Against RFI / EMI
- Integrated Thermal Management System
- Updated Hybrid Optic System
- Patented Optics (6,986,593 b2, 7,114,832 b2)

Rigid M-Series light covers not only give your LED light bars a unique look, they also provide another layer of protection. Available in 10" increments, these covers are made from durable polycarbonate plastic and are designed to snap onto your lights with ease. Our M-Series LED light covers are available in a variety of colors. The white and black versions are opaque and feature the Rigid Industries star logo. The translucent version comes in red, blue, green, amber, clear, and smoked. Our light covers are often used to improve visibility in harsh environments.

Rigid snap-on light covers are perfect for the Marine D-Series line of products. Made of polycarbonate plastic, these covers are tough and snap easily into place to protect your light. The black and white covers are opaque and show the Rigid star logo. Also available in clear, amber, blue, red, green, and smoked for different colored tinting applications. The amber cover provides instant improvements in harsh environments.

FLUSH MOUNTS

These models are designed to be recessed into a bumper, a utility bed, on a boat or any application where you need the light to look clean and out of the way. Once installed, the light is only 1/4" exposed, which means you can have all the benefits of our surface mount lights in an OEM quality, flush installation.

MARINE SR-M SERIES

The new Marine SR-M Series (Single Row Mini) is housed in one of the smallest and lightest fixtures ever produced. This compact LED light can be mounted in virtually any location and can project almost 1,000 feet with a Hybrid Spot or produce an unbelievable 1,125 raw lumens with our Specter Driving optics. Limited lifetime warranty.

- Protected Against RFI / EMI
- Instant On; Flashing won't damage bulb or circuitry.
- Scratch Resistant Lens Coating
- 15' Marine Rated Connection Wire

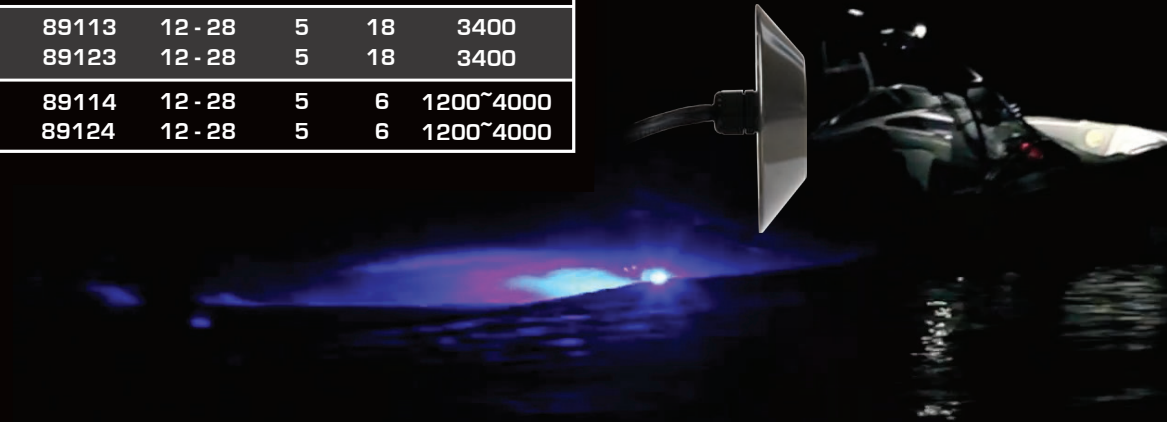

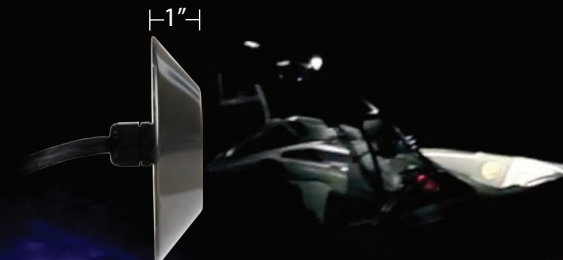

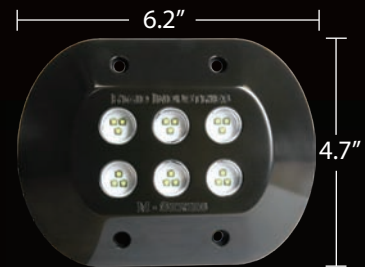

LED COLORS

Rigid Industries is proud to introduce the newest addition to the Rigid marine lighting family, the Under Water Light (UWL). It utilizes a Triplex coating process that is up to 5 times stronger than any military spec anodized coating. The coating allows the use of aluminum in a salt water environment. After rigorous testing for over 9,000 hours, the light had zero pitting or corrosion. Using lightweight, heat-dissipating aluminum, the UWL can operate longer and will keep the LED's cooler. The UWL provides up to 9,000 lumens using the latest generation of US made LED's available. The virtually unbreakable polycarbonate lens is coated with a proprietary sealant that protects and makes it easy to clean; this includes algae and other organisms. The UWL is available in a surface mount with exposed mounting hardware, or stealth mount with concealed mounting hardware.

SPECIFICATIONS

Product Description	Part #	Min/Max Voltage (V)	AMP Draw	LED's	Fixed Lumens
UWL 2X3 Surface Mount White	89111	12 - 28	7	18	9000
UWL 2x3 Stealth Mount White	89121	12 - 28	7	18	9000
UWL 2X3 Surface Mount Blue	89112	12 - 28	5	18	1440
UWL 2x3 Stealth Mount Blue	89122	12 - 28	5	18	1440
UWL 2X3 Surface Mount Green	89113	12 - 28	5	18	3400
UWL 2x3 Stealth Mount Green	89123	12 - 28	5	18	3400
UWL 2X3 Surface Mount RGBW	89114	12 - 28	5	6	1200~4000
UWL 2x3 Stealth Mount RGBW	89124	12 - 28	5	6	1200~4000

SURFACE

The Surface mounted UWL provides a quick and easy installation.

STEALTH

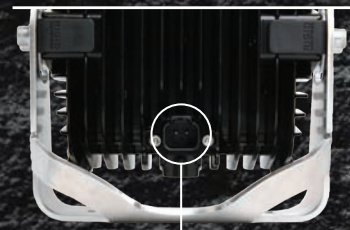

The Stealth mounted UWL provides a sleek look that is characteristic to the marine world.

Q4

Integrated Sealed Deutsch Connector

When facing the challenge of severe darkness, the new Rigid Q4 light will illuminate the path. Designed specifically to function in harsh working environments and made of the toughest and most durable materials, this light can withstand abuse. The new Q4 is available in a 4,000 lumen Hybrid model or 9,000 lumen Specter model with a Diffused lens option. The Q4 is a big, bright, heavy duty light developed especially for mining operations, agriculture, oil and gas industry, and construction. Mounting locations include a bracket or threaded eyelets on the bottom of the light housing. Limited lifetime warranty.

SPECIFICATIONS

* Based on LED manufacturer specifications
 ** Tested using ANSI/NEMA FL Standards

FACTS

- Available in Hybrid & Specter Optics
- GORE® Pressure Equalizing Vent
- Unbreakable Polycarbonate Lens
- Durable UV 3800 Polyester Powder-coat
- Integrated Deutsch Plug on All Housings
- IP68 Certified
- MIL810-STDG Vibration Certified
- ROHS Compliant
- Over / Under Voltage Protection
- Operating Temp -40° F ~ +145° F
- 50,000+ Hour Lifespan
- Protected Against RFI / EMI
- Integrated Thermal Management

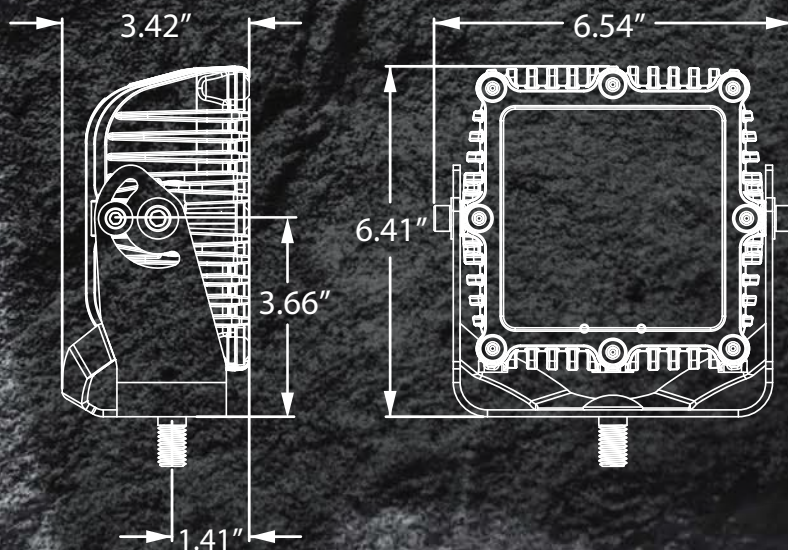

Our patented Hybrid and Specter optic systems and state of the art technology makes our LED products second to none. We continue to lead the industry in innovation with our new Q4 – an extra heavy duty, multi-purpose light, with multiple diffusion options. Q4 Driving light with Downward Diffused lenses shown above.

DIFFUSION KIT

This all new diffusion kit is specially designed for the Q4 to provide a wide array of diffusion options. You have the choice of a regular diffusion lens to spread the light in a 60 degree angle in all directions, or only downward with the downward diffusion lenses. The unique screw-on diffusion plate and lenses also allow for a combination of diffusion that is ideal for any heavy duty task. Diffusion plate measures 5 1/2" x 5 1/2".

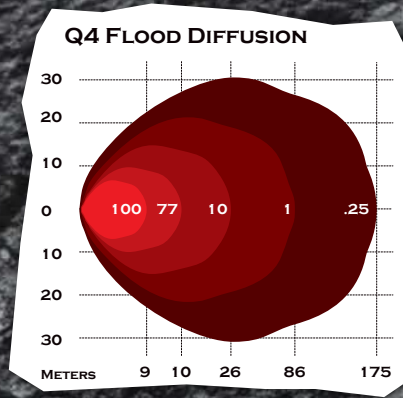

Diffusion Kit Sold Separately (Part Number 49003)

All Q4 lights feature a vibration isolator to reduce internal component failure and to extend the lifespan of the light.

R-SERIES

PAR-36 RETROFIT

Diffused Lens (RD, RD+)

Hybrid Optic (R+, RS)

Back

Side

The Rigid R-Series Par-36 Retrofit fits into any standard Par-36 bulb application, offering clear, white LED auxiliary illumination. Using Rigid Industries patented optics paired with either 10 watt or 5 watt LEDs gives the ultimate versatility to choose the right light. The R+ is the best choice as an all around light. Using 10 watt LEDs paired with our Hybrid Spot optic give the ultimate in width and distance. If lower power draw and long range lighting is what you need, the RS will give over 500 meters of light in a very narrow pattern. Offering both 10 watt and 5 watt versions of wide diffused will fill the need for wide area lighting. Using Rigid Industries 9-36V DC input driver these lights will work with almost all vehicle and aviation electrical systems. This Rigid retrofit light uses a polarity insensitive stainless screw terminal wiring identical to the outdated sealed beams, just attach your wires and go. Limited lifetime warranty.

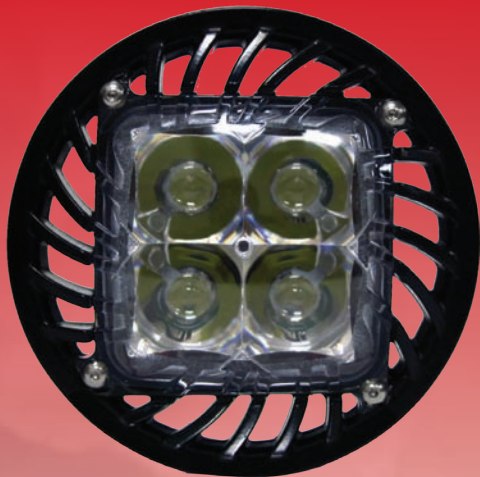

- 25,000 Hour Lifespan
- Runs on 9 to 36V DC
- Non Polarity Sensitive
- IP68 Certified
- Extremely Durable
- DO-160 Compliant
- Lightweight Cast Aluminum Housing
- Over / Under Voltage Protection
- Integrated Thermal Management

A-SERIES

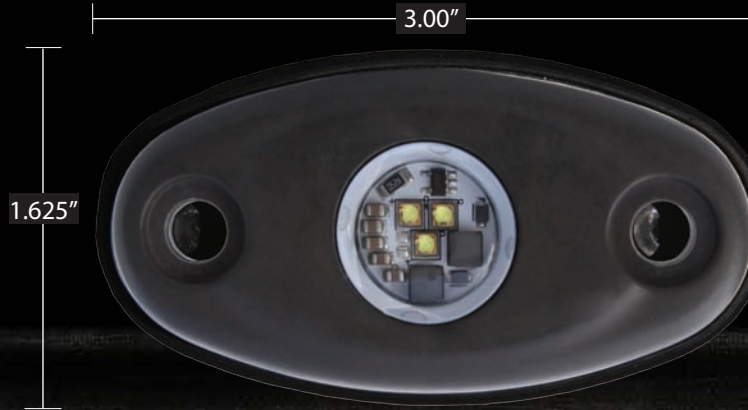

LED ACCESSORY LIGHT

Rigid Industries introduces the new A-Series LED Accessory Light. It's a small light with a large projection – 200 lumens interior and 400 lumens exterior. All A-Series lights are waterproof and come in a black, white or Triplex™ housing. The Triplex™ housing is designed for extreme salt water applications. This LED Accessory Light uses a polycarbonate lens with UV anti-scratch coating. Typical uses for the A-Series LED Accessory Light are used for interior vehicle lighting, or to illuminate a boat. Limited lifetime warranty.

FACTS

- Fully Submersible Cast Aluminum Housing
- .2 amps / 10 - 28V / 3W Total Draw - 200 Lumen
- .3 amps / 10 - 28V / 4W Total Draw - 400 Lumen
- Polycarbonate Lens with UV /Anti-Scratch Coating
- Reverse Voltage Protected
- Triplex™ is for Extreme Salt Water Conditions
- 38 Series Polyester Powder-coat
- Includes Adapters for Radius Tube or Flat Surface Mounts
- Includes Internal or External Wiring Options
- VHB Adhesive Pad Included for Stick-on Surface Mounting

HALO TORCH

Halo
800 Lumens

The Rigid Industries Halo Torch is the best all-around flashlight you'll ever find. It combines the latest in US made LEDs with a machined aluminum reflector, making this an extremely versatile flashlight. The Halo Torch has a nice wide beam for area illumination. The focused center projects 1,000 feet at the highest setting. At about the same length as a Mini Maglite®, the Halo Torch has almost 10x more light output. Dual AC and car charger included. Limited lifetime warranty.

Part # 30120

Light Output

A measurement of the total quantity of emitted overall light energy.

Impact Resistance

The degree to which a portable light resists damage when dropped on a solid surface.

Water Resistance

Resistance to temporary immersion in water, continuous immersion in water, and splashing water.

Beam Distance

The distance from the device at which the light beam is .25 lux.

Peak Beam Intensity

The maximum luminous intensity typically along the central axis of a cone light. This is the brightest part of the beam.

Run Time

The duration of time from the initial light output value (30 seconds after the light has been turned on with fresh batteries) until the light output drops to 10% of the initial value

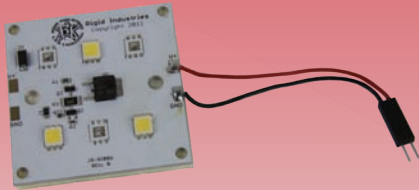

LIGHT KIT INCLUDES

- 1 - 800 Raw Lumen Halo Flashlight
- 1 - 110V Wall Charger (Part # 30112)
- 1 - AC/DC Cigarette Charger Adapter (Part # 30112)
- 1 - 18650 Rechargeable Li-Ion Battery (Part # 30111)

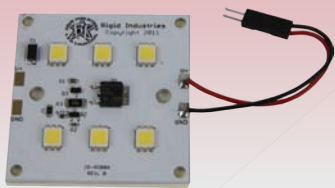

RV LEDS

The Rigid RV LED retrofit kit comes with your choice of bulb adapters to adapt to most bulb styles. It provides thermal and over voltage protection -- and uses 80% less power than stock RV lights and still provides more light. Now you can remove your existing 20 watt bulbs and replace them with super-efficient 4 or 6 watt LEDs. Great for extending times between charges in your RV/Travel Trailer. Available in Natural and Cool white.

12V Relay

24V Relay

RELAY

Part # 49012 12V Relay
Part # 49024 24V Relay

Relay replacement for 12 and 24V DC systems. Works with all Rigid Industries wiring harnesses.

ROCKER SWITCH

Part # 40191

This water resistant switch with an IP56 rating features a lit 12V rocker with protective rubber boot and is a great addition to any Rigid Industries lighting system. This switch will fit all Rigid Industries wiring harnesses.

LED FLASHER

Part # 40312 3 amp - 12 Volt
Part # 40324 3 amp - 24 Volt
Part # 40612 6 amp - 12 Volt

This 12V and 24V flasher will flash up to a 10 inch LED light and features a waterproof housing. Available in the following 7 patterns:

- Double alternating
- Double simultaneous
- Quad alternating
- Quad simultaneous
- Quint alternating
- Random
- Mega Alternating

SECURITY KIT

Part # 40281

Extra protection for your light bars; Spanner nuts and driver with washers for E-Series, SR-Series, and M-Series mount bolts.

OE APPLICATIONS

Rigid OE application mounts are specifically designed to fit your vehicle's requirements. Superior LED technology and specifically designed mounts mean easy installation and unmatched lighting for your vehicle. Follow installation instructions carefully or consult a professional installer for proper installation.

FORD RAPTOR

RAPTOR ROOF MOUNT KIT 50"

Part # 40236 **Roof Mount Brackets**
The Rigid Raptor Roof Mount Kit is your choice for adding our largest light bar onto your Ford Raptor. Drill holes will need to be made for installation. Mounting brackets and all necessary hardware included for installation. Your choice of white or amber color LEDs.

Light Sold Separately

RAPTOR FOG KIT

Part # 40235
These Rigid brackets mount in the existing fog openings in the lower corners of the bumper utilizing aluminum mounting plates. Two lights per side. Wire harness, mounting brackets and all necessary hardware included for installation. Your choice of white or amber color, with Dually or D2 optics.

Lights Sold Separately

RAPTOR UPPER GRILLE KIT 40"

Part # 40236 **Light Sold Separately**

Rigid Upper Grille Kits mount a 40" light bar behind upper grill to existing mounting holes on both sides of the inner frame assembly. Wire harness, mounting brackets and all necessary hardware included for installation. Your choice of white or amber color LEDs.

40" Upper Grill Brackets

RAPTOR LOWER GRILLE KIT 20"

Part # 40133 **Light Sold Separately**

Rigid Lower Grille Kits mount in the existing lower grill opening. Simply remove the lower grill and install our bracket/light kit and securely mount one single 20" light bar. Mounting bracket and all necessary hardware included for installation.

20" Lower Grill Kit

4"x2 Alternative Lower Grill Kit

RAPTOR LOWER GRILLE KIT 4"x 2

Part # 40134 **Lights Sold Separately**

Rigid Raptor Lower Grille 4" E-Series x 2 kits are perfect for states requiring a front license plate. This system mounts a 4" E-Series LED light on both sides of the license plate in the lower grill area. Your choice of white or amber color, and either spot or flood reflector patterns with an optional diffused lens. Mounting bracket and all necessary hardware included for installation.

FORD SUPERDUTY

SUPERDUTY LOWER GRILLE KIT 20"

Rigid Ford Superduty Lower Grille Kits use existing real estate on the front of your F-250 & F-350 truck. This mount system calls for a 20" E-Series LED light, fitting right into the stock lower bumper opening. This black powder-coated steel bracket bolts into place by drilling 2 small holes that are out of sight if the light is removed.

Part # 40136

Light Sold Separately

DODGE

DODGE BUMPER MOUNT KIT

Part # 40240

The sleek add-on for your Dodge Ram truck is the Rigid Dodge Bumper Mount Kit that securely fits a SR-Series 20" light bar without any major interruption to the radiator. The black powder-coated brackets mount directly onto the bolt holes on the tow hooks.

Fits 2004 - 2013 Dodge Ram 2500-3500

Light Sold Separately

TOYOTA

Part # 40132 TOYOTA FJ ROOF RACK

Light up your FJ with 16,000+ lumens of the latest LED lights available from Rigid Industries. Bolting directly to the vehicle utilizing existing bolt holes in the roof rack, the FJ Roof Rack carries a 20" E-Series in the center and one 10" E-Series on each side. Textured black powder-coat (matches stock roof rack). **Lights Sold Separately**

TOYOTA TUNDRA FOG LIGHT KIT

Part # 40155 **Lights Sold Separately**

With so many requests for such an OE mount, we are happy to introduce the Toyota Tundra Fog Light Kit. These brackets are powder-coated and firmly mount a set of D-Series lights in your fog light fixtures.

Amber LEDs are optional when choosing the correct D-Series light to include with this very effective kit.

Fits 2008 - 2013 Toyota Tundra

TOYOTA TACOMA BUMPER MOUNT KIT

Part # 40156 **Lights Sold Separately**

To show our continuous innovation to our OE line of LED lighting, we introduce the Toyota Tacoma Bumper Mount Kit. These powder-coated brackets make a SR-Series 30" light bar a part of your Tacoma's front bumper, bringing thousands of lumens to your Tacoma's front bumper.

Fits 2012 - 2013 Toyota Tacoma

ATV MOUNTS

Universal 6", 10" E-Series, SR-Series and D-Series handlebar mounts fit most ATV's. All Rigid Industries lights require DC voltage. If your ATV has this power source - bolt it up and go!

LED GRILLES

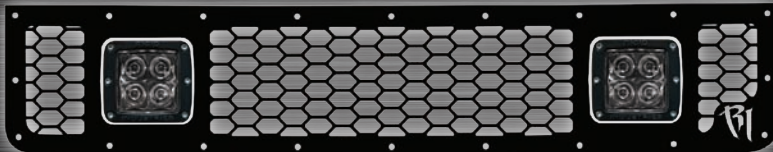

BY RIGID INDUSTRIES

LED Grilles by Rigid Industries are the new way to customize your rig with high output Rigid lights. Not only does this new accessory mount Rigid LEDs in your grille but it gives your vehicle a whole new Rigid look. Each LED Grille by Rigid Industries consists of two parts laser cut out of 304 Stainless Steel. There's zero welding.

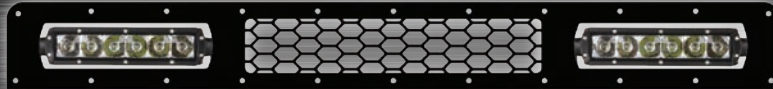

LED Grilles by Rigid Industries receive the same Satin Black powder-coat treatment as our lights for a seamless look then bolted together with stainless steel button socket head bolts and nyloc nuts. All mounting hardware is included. Cutting and drilling of OE grille shell is required for select grilles. Installation instructions included for specific details.

Professional installation is recommended for your LED Grille by Rigid Industries to be properly installed. May not fit all body styles for recommended make and model. Some select LED Grilles may be sold in separate pieces. Limited Lifetime Warranty.
