# INTEGRATED TOUCHSCREEN KITS

ITC kits are the most complete radio replacement solutions available today. These kits retain vehicle setting and convenience menus that would otherwise be lost when removing the factory radio. The ITC control unit includes 8 back-lit buttons for common features plus touchscreen control for specific trim level features. All models\* include an integrated Stereo Replacement Interface. Scosche ITC kits are the new standard for radio replacement.

# CUSTOM FIT KITS

Scosche custom fit kits are specifically designed for a perfect install every time. A pocket is included so one SKU covers both Single DIN and Double DIN applications. Most Scosche installation kits utilize ABS+PC, the same material that the auto manufacturers use. This insures that the kit doesn't warp or fade due to temperature or sunlight. Whenever possible, Scosche kits incorporates metal brackets. This provides the most secure mount possible.

# HARNESSES

Using a Scosche car stereo wiring harness is the best way to ensure a safe, correct connection between an aftermarket stereo and the vehicle without cutting into the factory wiring. Scosche car stereo wiring harnesses include power and speaker wires, individually labeled with their specific functions. All wires use the EIA color standard for easy matching with most aftermarket car stereos.
