

**SPYDER™**

The background of the lower half of the page is a high-contrast, red-tinted photograph of a car's front end. It shows a large, multi-faceted headlight assembly and a portion of a wheel with a multi-spoke hubcap. The lighting is dramatic, highlighting the geometric shapes of the car's components.

**2013 COLLECTION**

AUTOMOTIVE PERFORMANCE LIGHTING

# ABOUT US

SPYDER AUTO has been serving the automotive industry for nearly a decade, and has outshined the competition in both style and quality. The performance lighting offered by SPYDER AUTO are compliant with all applicable federal regulations such as D.O.T. and compliant to FMVSS code no. 108 and are not only ISO-9000 certified but also ISO-9002 certified as well, unless stated otherwise. As further proof of our regulation compliance, all SPYDER AUTO products are also approved by the Society of Automotive Engineers (SAE). State and local laws may vary.

Every SPYDER AUTO light assembly goes through rigorous testing and quality control. They are sealed with high quality silicone to insure no moisture will be trapped inside your lights. All wiring is tested before being sent out with volt meters to make sure the item is in working condition when it arrives at its destination.

All of our products are packed in the securest way possible. They are wrapped in bubble wrap, in a plastic sleeve, and a foam sleeve. Prior to being shipped out they are taken out of the box and inspected thoroughly; assuring that the item is in 100% in tact.

The most integral part of SPYDER AUTO is our support team; Tech Support and Customer Service. We have an excellent group of representatives that are not only knowledgeable, but friendly and accomodating. They exhibit a vast know-how with not only our parts, but with a plethora of various conflicts that may occur. They are willing to put in both the time and effort to resolve any issue that arises in a quick and efficient manner.
