UNITED PACIFIC

CLASSIC LED LIGHTING PRODUCTS

VOL. 5
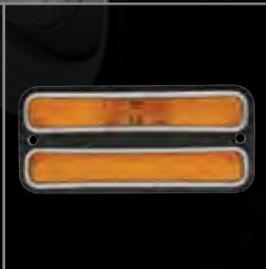

Quality.   Innovation.   Design.

MISSION STATEMENT
INTRODUCTION

MISSION STATEMENT

Here at United Pacific, we are dedicated to providing today's drivers with innovative and exciting products that deliver exceptional performance and value. Because United Pacific's continuing success depends on our customers' satisfaction, we constantly push our designers and engineers to upgrade our facilities and processes in order to bring products of superior quality and reliability to the market. We at United Pacific promise to continue our passionate pursuit to be the first in

QUALITY, INNOVATION AND DESIGN.

QUALITY

With over 30 years of experience in the heavy duty trucking industry, United Pacific Industries understand the rigors and stresses that our products are subjected to on the road. It is our mission to provide our customers with products of superior quality and reliability. In achieving this goal, United Pacific only partners with manufacturing facilities that conforms to our quality control requirements and standards. Our manufacturing partners meet or exceed ISO-9001 requirements. In addition, United Pacific's manufacturing partners must be equipped on site to perform the following quality assurance tests:

- AGING TEST
- AIR TIGHT TEST
- DUST TEST
- FLUX TEST

- PHOTOMETRIC TEST
- PULL FORCE TEST
- RAIN TEST
- SALT SPRAY TEST

- SHOCK TEST
- TEMPERATURE TEST
- HUMIDITY TEST
- VIBRATION TEST
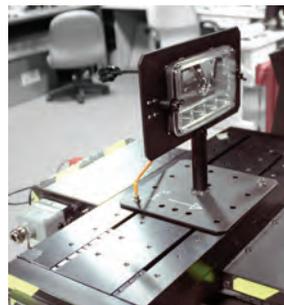

United Pacific's manufacturing partners must maintain a track record of consistent quality and low product failure rate. Furthermore, our internal quality control structure allows us to function as the final quality control station prior to shipping. With the assistance of 3D computer technology, United Pacific can adhere to strict quality control standards during prototype creation and the production process. Our engineers and technicians perform a battery of tests to ensure that our products meet the demands of today's drivers and our goal to be first in quality.

DESIGN

Located near some of the nation's most progressive automotive design centers, United Pacific established the UP Design Studio in 2002 to consolidate our position as the design leader in the heavy duty trucking industry. UP Design Studio utilizes the latest generation of computer aided design (CAD) and studio/graphic software. The design studio is equipped with the newest computers and rapid prototyping systems. In addition, UP Design Studio is staffed by graduates from the nation's most prestigious design colleges.

Unlike our competitors, United Pacific's design and manufacturing capabilities mean that we carry more new and original items than our competitors. The establishment of the design studio will enable us to generate even more new products with significant shorter concept-to-shelf time. The reduction in development cost mean that we can develop products utilizing design based development processes. Design based product development allows United Pacific to create new product concepts based on designs incorporating driver demands and needs instead of economic considerations. United Pacific's emphasis on design distinguishes and positions us ahead of our competitors.

HOW TO ORDER

To order from United Pacific Industries, you must be an authorized dealer, distributor or OEM.

INNOVATION

Known as the leader in innovation, United Pacific is dedicated to be the first to bring new and exciting products to the market. United Pacific's global expertise allows us to search the globe for new ideas and concepts. Not only do we search the globe for new products, United Pacific invest a significant amount of resources into our own research and development efforts. With the assistance of advance 3D scanning technology, our engineers and designers can acquire accurate and precise data in seconds. The 3D data allows United Pacific to verify designs, perform quality assurance tests, and reverse engineer with unprecedented speed and accuracy. Digital inspection contributes to the early detection of shape problems, provides rapid feedback on design, and eliminates unnecessary work in downstream processes. Our rapid prototyping facility permits us to have a concept-to-shelf time of less than 5 months. In addition, United Pacific's 3D printing capabilities permit our designers to have physical models of their design concepts in hours. The physical models allow our designers and marketing staff to evaluate and test the viability of different design ideas. Our rapid prototyping facility allow United Pacific to compress design cycles, improve manufacturing planning, shorten concept-to-shelf time, most importantly, generate new and innovative products.

WARRANTY

With LED (Light Emitting Diodes) rated at 100,000 hours of operation and solid-state construction, United Pacific's LED lights are extremely reliable and durable. Purchase with confidence, United Pacific offers a complete line of LED lighting products with extended warranties. Please see the warranty policy page for more details.

INVENTORY & SHIPPING

United Pacific carries over 20,000 items in our California distribution center. No other company in the heavy duty trucking industry can match United Pacific in the variety and range of in-stock inventories. With an order fill rate of over 98.5%, United Pacific is the largest and most reliable supplier in the industry. Our shipping department ships 96.8% of all orders within 24 hours and 98.9% within 48 hours. United Pacific's vast inventory and prompt shipping has made United Pacific the only source for our customer's chrome and lighting needs.
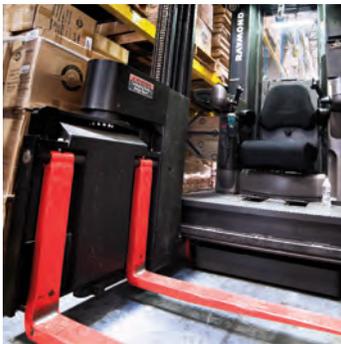

ASSEMBLED IN U.S.A

United Pacific strives to provide today's drivers with innovative and exciting products that deliver exceptional performance and value. With our international background and expertise, we search the globe for the best and most reliable products. However, as an American company, we believe and support the American way of life. Look for the "Assembled in the USA" label on many of our products. Although the components are manufactured overseas, the products, bearing the "Assembled in the USA" labels, are hand assembled with pride in the United States.

Hard at Work for Our Customers. Hard at Work for the Environment

United Pacific

Distribution Center
Long Beach, CA

U.S. GREEN BUILDING COUNCIL
LEED SILVER
USGBC®

100% reduction in potable water used for landscaping

40% reduction in total energy use due to high-efficiency mechanical and lighting systems

82% of construction waste was diverted from landfills

LEED ACCOMPLISHMENTS

Sustainable Sites
- On-site bicycle storage, showers and changing areas for company employees
- Preferred parking for low-emitting, fuel-efficient and carpool vehicles
- Stormwater is infiltrated on-site and treated to remove contaminants to reduce environmental impact on local waterways

Water Efficiency
- In addition to using reclaimed water, drought-tolerant plants and a high-efficiency irrigation system were installed to reduce the use of potable water for irrigation by 100%
- High-efficiency water closets, lavatory faucets, and showers were used to reduce annual water use by 30%

Energy and Atmosphere
- Efficient HVAC equipment and a lighting system with daylight controls reduces energy consumption by over 30%
- Enhanced commission verifies that the building's energy and water-related systems are performing as intended by the initial design

Materials and Resources
- Over 81% of construction and demolition waste was diverted from landfills

Indoor Environmental Quality
- Building ventilation system was designed to provide enhanced levels of fresh outside air to building occupants
- Interior finishes (paints, sealants, adhesives, coatings, carpet systems and composite wood) were selected with low levels of volatile organic compounds (VOCs) to reduce indoor air contamination

1933 - 36 Chevy LED Taillight
Description

- 30 Super Bright Red LEDs, Driver Side Includes a 6 White LED License Light
- Easily Installs in Your Original Housing with 1156 Plugs
- Epoxy Coated, Fully Sealed Electronics
- Solid State Circuit Boards are Designed for 7.7 - 14.0 VDC
- Licensed by General Motors

Item Number	LEDs	Lens	Application	Pack
CTL3336LED-L	30 Red 6 White	Red Clear	Driver License	1 Pc./Card

Load Resistor - 50 Watt, 6 OHM

Description

- Load Resistor, 50 Watt, 6 OHM
- Simulate the Load of an Incandescent Bulb, Solve Turn Signal Problem such as Hyper Flashing, no Flashing, or Burnt Out Bulb Indication
- Mounting Hardware Included

Item Number	Description	Package	Pack
34205	Load Resistor	Carded	1 Pc./Card

Headlight Relay Harness Kit

Description

- Sends Higher Amperage to Headlight, Handles Higher Wattage Bulbs
- Corrects Dim Lights on Trucks and Cars, Fits Most Vehicles
- Select Proper Kit to Match Your Headlight Bulbs, 12V Operation
- H4 Kit Also Works on Original Style 6014 Sealed Beams

Item Number	Description	Package	Pack
34263	H4 Relay Harness	Bulk	1 Pc.
34264	9005/9006 Relay Harness	Bulk	1 Pc.
34265	9007 Relay Harness	Bulk	1 Pc.
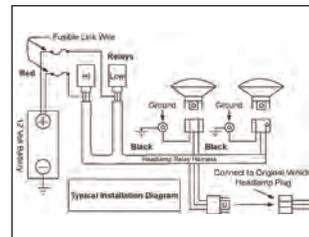

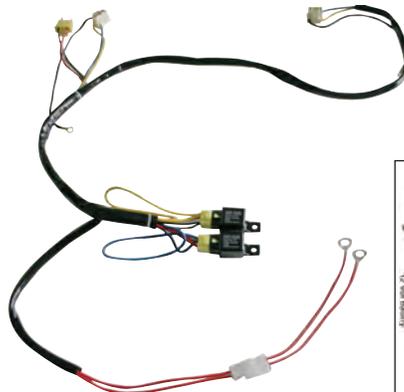

ON MOST VEHICLES, THE POWER TO THE HEADLIGHTS IS ROUTED FROM THE BATTERY, THROUGH THE VEHICLE WIRING HARNESS TO THE HEADLIGHT SWITCH, THEN BACK OUT TO THE HEADLIGHTS. THIS LONG ROUTE FROM BATTERY TO HEADLIGHT CAUSES A VOLTAGE DROP AND HEAT BUILDUP, RESULTING IN DIM HEADLIGHTS AND FAILURE OF HEADLAMP SWITCHES.

THIS HEADLIGHT RELAY UPGRADE HARNESS WAS DESIGNED TO IMPROVE VOLTAGE TO THE HEADLIGHTS BY USING BETTER, NEWER, SHORTER HEAVY-DUTY WIRES AND RELAYS, DIRECTLY POWERED BY THE BATTERY.

LED Flasher Warning Module

Description

- Converts Regular LED Lights into Flashing Warning Lights
- 24 Selectable Flash Patterns, Sync or Alternating Flash
- 12V Application, 2 Outputs, 20 AMP Max Draw
- 1 Module Works with 2 LED Lights

Item Number	Description	Package	Pack
90660	LED Warning Module	Carded	1 Pc./Card

Fog Light Wiring Harness

Because LED lights have much lower electrical current draw than incandescent bulbs, current in the turn signal circuit may be reduced significantly. However, in some cases the current may be so low that the turn signals/flashers might think that the bulb is burn out and 1) flash too rapidly, 2) not flash at all, or 3) flicker or stay on continuously when signaling.

There are several ways to eliminate this problem.

1. **The simplest solution is to leave at least one incandescent lamp in the circuit. However, since eliminating the high draw and unreliability of incandescent bulbs is what LEDs are all about, this is often not the most attractive option.**

2" INCANDESCENT MARKER LIGHT
HOT (BLACK WIRE)
TURNING (ORANGE WIRE)
RUNNING (BROWN WIRE)
GROUND (WHITE WIRE)
GROUND (GREEN WIRE)
LED TURN SIGNAL LIGHT
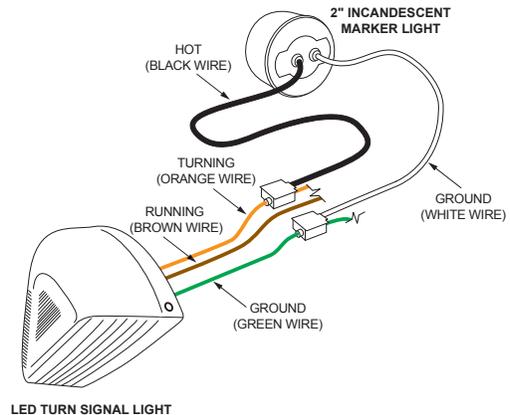

2. **Add a special electrical resistor to the circuit. This prevents the flasher from malfunctioning, but it does so by eating up electrical energy unnecessarily.**

**50W 6Ω Load Resistor
United Pacific Item # 34205**

LOAD RESISTOR
HOT (BLACK WIRE)
TURNING (ORANGE WIRE)
RUNNING (BROWN WIRE)
GROUND (WHITE WIRE)
GROUND (GREEN WIRE)
LED TURN SIGNAL LIGHT
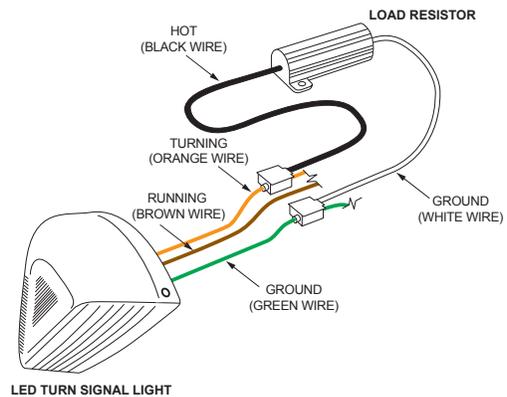

3. **The best solution is to replace the flasher with an LED-compatible solid state flasher that is designed to function properly even at very low load currents.**

Please see Page 175 for Detail
